**EQUITY RESEARCH - COMPANY REPORT** 

# COM7 COM7 TB

THAILAND / COMMERCE

- We have a slightly bullish view of the Opportunity Day meeting due to its improving sales and gross margin trends.
- We maintain our 2024E net profit of THB3.18b (+11% y-y) and expect growth of 8% in 2025.
- We roll over to our 2025 TP of THB30 and retain our BUY rating.

#### A slightly favorable view due to recovering sales and GPM

We have a slightly bullish view of the Opp Day meeting on Nov 14, 2024, due to the iPhone16 sales growth of over 27% y-y after product shortages in Sep during its introduction. Also, overall sales in October should grow by over 10%. We expect stable growth in 4Q24, with several new launches planned throughout the quarter, including the Apple Watch and iPad mini debuted in October, Mac products in November, and Android smartphones in the remainder of this year.

#### Net profit jumped y-y in 3Q24 and should peak in 4Q24

COM7 posted a 3Q24 net profit of THB709m, down 6% q-q due to seasonality but up 16% y-y owing to smartphone sales, especially after the launch of the iPhone16 and government stimulus. Also, NCAP reported improved performance while GPM and SG&A to sales were flat v-v.

#### Maintain 2024E profit growth of 11% y-y and 2025-26E of 8% CAGR

The 9M24 net profit accounted for 72% of our 2024 estimate (vs. 70% in 9M22). We reaffirm our 2024E net profit of THB3.18b (+11% y-y), with an expected peak in 4Q24, sales growth of at least 10%, and a GPM of over 13%.

#### Retain BUY call after rolling over to our 2025 TP of THB30

We maintain our BUY recommendation after rolling over to our 2025 TP of THB30, assuming 21x 2025E P/E (its five-year historical average P/E +0.5SD). We believe AI PC and AI Smartphones will be sales and profit drivers in 2025. Moreover, more new businesses, such as Solar Cells and Accessory would provide a high margin. However, we see GPM as a crucial risk. If it recovers slowly in 4Q24, it would pressure our estimate and TP.

#### Investment thesis

COM7 targets a 2024 growth of 10%, which is viable, in our view, due to its continued channel expansion, including shop-in-shop, standalone, and online platforms, and a shift to focus on 5G compatible devices since the Thai 5G adoption rate was low at just 11%. Also, COM7 has developed new sales tools, such as consumer loans via UFund and warranty extension, and expanded to other businesses, such as Dr.Pharma drugstore, Pet Paw pet food, and BeBePhone accessories. However, the slower-than-expected purchasing power recovery outlook and the low-impact government stimulus measures have forced COM7 to extend its aggressive promotion, pressuring its overall gross margin.

#### Company profile

COM7 distributes IT products such as laptops, desktops, mobile phones, tablets, and computer peripherals through various distribution channels. Also, it operates Apple repair & service centers.

### **Catalysts**

Key potential growth drivers for COM7 shares include 1) changing consumer behavior in the digital era where consumers turn to use more IT products and change them more frequently, 2) domestic consumption and purchasing power recoveries, and 3) the 10% sales growth target.

#### Risks to our call

Risks to our P/E-based TP include 1) lower/higher domestic consumption and purchasing power, 2) store cannibalization/expansion, and 3) lower/higher-than-expected gross margin.

#### Earnings sensitivity

- For every 1% increase in sales, we estimate 2025 net profit to rise by 1.0%, and vice versa, all else being equal.
- For every 0.1% increase in GPM, we estimate 2025 net profit to rise by 2.0%, and vice versa, all else being equal.
- For every 0.1% increase in SG&A expenses, we estimate 2025 net profit to fall by 2.0%, and vice versa, all else being equal.

#### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 18-Nov-2024 unless otherwise stated.

#### RECOMMENDATION STRUCTURE

#### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

#### **Industry Recommendations**
