25 NOVEMBER 2024

EQUITY RESEARCH - COMPANY REPORT

OSOTSPA OSP TB THAILAND / FOOD & BEVERAGE

Market share starting to recover

- OSP's market share in Oct recovered to 45% from 44.8% in Sep. We expect 4Q24 net profit to recover both q-q and y-y.
- Management aims for 2025 revenue growth of 9% y-y, supported by existing products and new products and markets.
- Retain BUY call; passed the lowest point in 3Q24.

Energy drink market share starting to recover in October

The Thai energy drink market in October saw a healthy increase of 4% m-m and 12% y-y. OSP's market share in October recovered to 45% from 44.8% in September, with improvements in both traditional trade and modern trade channels after the flood issues were resolved. The company has also been gradually launching more new products, along with the recovery of the functional drink segment q-q. This follows the transition period between the new C-Vitt Vitamin C 1,000 mg product and existing products. OSP will also recognize a profit from the sale of its glass bottle factory in Myanmar of cTHB130m in 4Q24 after previously recognizing a significant loss in 3Q24 (same deal, different timing). We expect 4Q24 net profit to show a strong recovery both q-q and y-y.

Targeting sustainable market share growth

Management aims for 2025 revenue growth of 9% y-y, with 5% coming from existing products and double-digit growth from new products and markets. OSP will focus on maintaining and gradually increasing its market share in the domestic energy drink market sustainably. While there may not be flashy marketing promotions, the strategy will involve launching new flavored drinks priced at THB10-12/bottle, which should help gradually shift the market. Meanwhile, the THB10 drinks will still be available as an option for customers to maintain competitive positioning. OSP also aims to maintain or slightly improve its gross margin from the 2024 levels, aided by locking in lower raw material prices into mid-2025.

New products launched domestically and internationally

OSP is continuing to introduce new products, such as M150 Zaa Muscat Fizz, One Day Vitamins, Butterbear Special Collection (Calpis and Babi Mild), and is importing Shark drinks produced in Myanmar for sale to Myanmar nationals working in Thailand (priced at THB25/bottle). In addition, OSP is re-entering the Vietnamese market with the launch of M-150 2-in-1 in November.

Retain BUY call; passed the lowest point in 3Q24

We believe OSP has passed the lowest point in 3Q24 and expect the net profit in 2024 to decline by 23.3% y-y. However, we project a strong recovery of 74% y-y to THB3.2b for 2025. OSP has completed restructuring by exiting unprofitable businesses in 2024 and is currently evaluating potential M&A deals, which could provide an upside to our estimates. We maintain our target price of THB28, with the stock currently trading at a 2025E P/E of 20x. We retain our BUY call.

Investment thesis

OSP has a very long history of over 132 years. We are impressed with OSP's growth over the last century via innovative products that have evolved according to changing consumer needs, organizational advancements, and marketing breakthroughs. We think OSP conducts its business with good governance and responsibility to all stakeholders.

The company has continued to focus on cost efficiency via its Fast Forward 10x program, whose five pillars for transformation are cost, process, function, hybrid workforce, and assets. It targets THB5b in cost savings in 5-7 years (2022-28).

Company profile

Osotspa was established in 1891 as a pharmaceutical company. It is now one of the largest consumer product companies in Thailand. Revenue is derived from beverages (81% of sales), personal care (9% of sales) and others (10%). About 17% of its sales come from overseas markets, such as Myanmar, Laos and Cambodia, nearly all of which are from the energy drinks segment. It was listed in October 2018.

www.osotspa.com

Catalysts

Potential catalysts for OSP's earnings growth in 2025 are 1) revenue growth driven by sales volumes; 2) gaining more domestic energy drink market share; 3) declining energy costs; 4) successfully improving its production efficiency; and 5) the success of new product launches.

Risks to our call

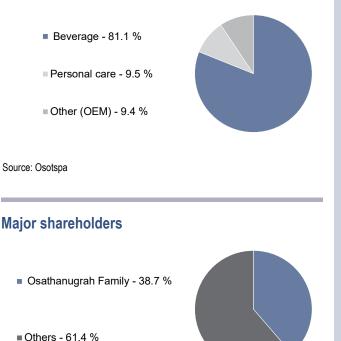

Downside risks to our P/E-based TP include 1) a slowerthan-expected consumption recovery; 2) higher-thanexpected competition; 3) high volatility in energy costs; and 4) changing legal policies both in Thailand and Myanmar.

Key assumptions

	2024E	2025E	2026E
Beverage revenue growth (%)	12.8	5.8	5.3
Personal care revenue growth (%)	2.5	5.0	5.0
Total revenue growth (%)	10.4	5.6	5.3
Gross margin (%)	36.0	36.3	36.5
SG&A to sales (%)	24.6	24.6	24.5

Source: FSSIA estimates

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2025 net profit to rise by 1.2%, and vice versa, all else being equal.
- For every 0.2% increase in GPM, we estimate 2025 net profit to rise by 2.0%, and vice versa, all else being equal.
- For every 0.2% increase in SG&A, we estimate 2025 net profit to fall by 1.9%, and vice versa, all else being equal.

You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 22-Nov-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
