EQUITY RESEARCH - COMPANY REPORT

GFPT GFPT TB

THAILAND / AGRIBUSINESS

A positive catalyst emerged

- Chicken prices have risen sharply due to the Chinese New Year.
- Expect 1Q25 net profit to recover q-q and continue to grow y-y.
- Upgrade to BUY with the same TP of THB12.5.

Expect 4Q24 profit to weaken q-q due to seasonality

We expect a 4Q24 net profit of THB434m, down 20% q-q and up 5.8% y-y due to seasonal factors. We assume the chicken export volume of GFPT would drop by 4% q-q to 9,100 tonnes and its average selling price would decrease. The average price of live chicken in 4Q24 was THB38.2/kg (-11% q-q, +1.1% y-y), and its chicken carcass price was THB14/kg (-2% q-q, +5% y-y), while raw material prices continued to decline q-q and y-y. In addition, we anticipate 4Q24 profit sharing to decrease by 13% q-q and 9% y-y due to lower profits from GFN, which saw impacts from lower chicken carcass prices.

Chinese New Year helps boost chicken prices

As the Chinese New Year season approaches, demand for meat should rise, leading to significant increases in chicken prices in January. In particular, the average chicken price increased by 10% q-q to THB42/kg, while its chicken carcass price also rose sharply by 40% q-q to THB18-20/kg, the highest in the past eight quarters. This increase is mainly due to stronger demand as national supply remained high at 38 million birds per week. As a result, we expect the 1Q25 net profit of GFPT to recover q-q and continue to grow y-y. Also, the chicken price trend in 2Q25 remains stable, supported by seasonally hot weather and high export season.

Maintain our assumptions and 2025E net profit

Assuming in-line 4Q24 results, GFPT's 2024 net profit would hit a record high of THB2b (+47% y-y). We maintain our 2025 chicken price assumption at THB40/kg (-5% y-y), expecting prices to soften in 2H25, along with a downward trend in the breakeven cost, which is currently in the range of THB36-38/kg, down from THB38-39/kg last year. Therefore, we maintain our 2025E net profit at THB1.56b (-23% y-y). However, if chicken prices in 2H25 decline less than expected, it could lead to an upside to our profit estimates.

Upgrade to BUY with the same TP of THB12.5

We maintain our 2025 TP at THB12.5 (based on a PE of 10x). The stock price has declined by 17% over the past two months, resulting in a higher upside of 26%. It is trading at 7.9x 2025E PE, the lowest in the meat sector, with an expected dividend yield of c4% for 2024. In the short term, the sharp increase in chicken prices should support a profit recovery in 1Q-2Q25, serving as a positive catalyst for the stock price. Therefore, we upgraded it to BUY from HOLD.

Investment thesis

GFPT is doubling the capacity of its slaughterhouse from 150,000 to 300,000 chickens per day. It should begin operating from 2H24 onwards, partly to cope with the processing capacity expansion of its associate McKey. GFPT is also preparing to expand its processing plant to cope with export growth since it currently runs at a 100% utilization rate.

The situation for chicken exports in 2024 appears to be quite optimistic, supporting both the volume of exports of GFPT and its associates, such as GFN and McKey. However, we have relatively conservative assumptions for our 2025 net profit forecast, partly because we have started seeing price decreases in live chicken and chicken carcasses. We will also need to monitor the chicken price trends.

Company profile

GFPT operates a vertical, fully integrated poultry business covering feed production, grandparent farms, breeder farms, broiler farms, chicken meat production and distribution, cooked chicken products, and other chicken-related products under its own and customers' brands for both domestic and export markets. In 2022, GFPT had a chicken processing capacity of 150,000 tonnes/year and a cooked chicken product capacity of 30,000 tonnes/year.

Catalysts

Potential catalysts for GFPT's earnings growth in 2025 are 1) chicken export volume growth; 2) a higher-than-expected chicken price; 3) the operation of a new slaughterhouse; and 4) lower raw material costs.

Risks to our call

Downside and upside risks to our P/E-based TP include 1) a slower or faster-than-expected consumption recovery; 2) a slower or faster-than-expected decrease in feed costs; 3) a stronger or weaker-than-expected THB; and 4) a minimum wage increase and/or a labour shortage.

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2025 net profit to rise by 0.8%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2025 net profit to rise by 4.1%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A, we estimate 2025 net profit to fall by 3.8%, and vice versa, all else being equal.

Exhibit 11: FSSIA ESG score implication

50.93 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
***	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Disclaimer for ESG scoring

ESG score	Methodolog	у			Rating					
The Dow Jones Sustainability Indices (<u>DJSI</u>) By S&P Global	The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion.				Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe.					
SET ESG Ratings List (SETESG) by The Stock Exchange of Thailand (SET)	SET ESG quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paidup capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years.				To be eligible for SETESG inclusion , verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. SETESG Index is extended from the SET ESG Ratings companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks.					
CG Score by Thai institute of Directors Association Thai IOD)	An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations.				Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%).					
AGM level By Thai Investors Association (TIA) with support from the SEC	It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). (The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)				The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79.					
Thai CAC By Thai Private Sector Collective Action Against Corruption CAC)	The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. (Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)				The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements.					
Morningstar Sustainalytics	based on ar risk is unma	n assessment on naged. Sources	sk rating provides an over of how much of a compan s to be reviewed include corpo	A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored.

SG Book	The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis.				The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance.					
<u>MSCI</u>			measure a company's mand laggards according to the						nethodology to	
	AAA	8.571-10.00	0							
	AA	7.143-8.570	Leader:	leading its industry in m	leading its industry in managing the most significant ESG risks and opportunities

Moody's ESG olutions	Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term.									
Refinitiv ESG ating	Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. (Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)									
S&P Global	The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100.									
Bloomberg	ESG Score Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best.									
	ESG Disclosure Score Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point.									

Rating regarding the sustainable development of Thai listed companies, both on the SET and MAI, are publicly available on the website of the Securities and Exchange Commission of Thailand (SEC). Currently, ratings available are 1) "CG Score"; 2) "AGM Level"; 3) "Thai CAC"; and 4) THSI. The ratings are updated on an annual basis. FSSIA does not confirm nor certify the accuracy of such ratings.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 09-Jan-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
