FSSIA ESG rating

ประหยัดต้นทุนในการกู้ยืมได้ลดลง

- MTC อาจประหยัดต้นทุนในการกู้ยืมเฉลี่ยในปี 2025 ได้น้อยกว่าที่คาดไว้ในขั้นต้น เนื่องจากบริษัทฯ จะขยายระยะเวลาในการกู้เฉลี่ยให้ยาวขึ้น
- คณภาพสินทรัพย์น่าจะดีต่อเนื่องพร้อมคาดตันทุนความเสี่ยงในการปล่อยสินเชื่อใน ระดับต่ำเพียง 2.8% ในปี 2025
- คงคำแนะนำซื้อและเลือก MTC เป็นหุ้นเด่นที่ราคาเป้าหมายปี 2025 ใหม่ที่ 56 บาท

ประเด็นเก็บตกสำคัญจากที่ประชุมนักวิเคราะห์ของ MTC

เราได้ประเด็นเก็บตกสำคัญจากที่ประชุมนักวิเคราะห์หลังผลประกอบการ 4Q24 ของ MTC (20 ก.พ.) ประกอบด้วย: 1) การประหยัดต้นทุนในการกู้ยืมเฉลี่ยที่น้อยกว่าคาดเนื่องจาก MTC จะ ขยายระยะเวลาในการกู้ยืมเฉลี่ยเป็น 3.5 ปี; 2) คุณภาพสินทรัพย์ที่ดีจากการปรับปรุง ประสิทธิภาพพนักงานและมาตรการกระตุ้นเศรษฐกิจของรัฐในปัจจุบัน; และ 3) ประมาณการ เติบโตของสินเชื่อในระดับสงที่ 13% y-y ในปี 2025 พร้อมสัดส่วนค่าใช้จ่ายในการดำเนินงาน ต่อรายได้ที่คาดว่าจะลดลง

ระยะเวลาในการกู้ยืมที่ยาวขึ้นจะทำให้ประหยัดต้นทุนในการกู้ยืมได้น้อยลง

แม้ว่า Fitch Thailand จะปรับอันดับความน่าเชื่อถือเป็นระดับ A- rating MTC จะขยาย ระยะเวลาในการกู้ยืมเฉลี่ยเป็น 3.5 ปีซึ่งยาวกว่าอายุเงินกู้เฉลี่ยที่ 2.5 ปี ทั้งนี้บริษัทฯ ให้ เหตุผลว่าเพื่อต้องการหาแหล่งเงินทุนสำหรับการขยายธุรกิจและลดภาระในการออกหุ้นกู้ใหม่ เพื่อทดแทนของเก่าหลังตลาดมีความผันผวนในปี 2024 จากทิศทางดังกล่าวเราคาดในขั้นตัน ว่า MTC จะประหยัดต้นทุนในการกู้ยืมปี 2025 ได้น้อยกว่าค่าเฉลี่ย 40bp y-y ที่คาดไว้เดิมอยู่ มาก บริษัทฯ ให้เป้าประมาณการว่าต้นทุนในการกู้ยืมเฉลี่ยในช่วง 1H25 น่าจะอยู่ที่ประมาณ 4.6% (ระดับเดียวกันกับใน 4Q24) ก่อนค่อย ๆ ลดลงในช่วง 2H25 ตามอัตราดอกเบี้ยนโยบาย ที่ลดลง

คุณภาพสินทรัพย์น่าจะดีต่อเนื่อง

้ในด้านบวกคุณภาพสินทรัพย์รวมยังอยู่ในเกณฑ์ดี จนถึงปัจจุบันสถานการณ์ในเดือน ม.ค. และ ก.พ. 25 ค่อนข้างเหมือนใน 4Q24 โดยมีประสิทธิภาพของพนักงานเก็บเงินที่สูงขึ้นและผลบวก จากมาตรการกระตุ้นเศรษฐกิจของรัฐบาล (การแจกเงินสด 10,000 บาท มาตรการอุดหนุน รายได้เกษตรกร ฯลฯ) เป็นปัจจัยหนุ้นสำคัญ ทั้งนี้ MTC ตั้งเป้าสัดส่วนหนี้ด้อยคุณภาพในปี 2025 อยู่ที่ 2.7% และต้นทุนความเสี่ยงในการปล่อยสินเชื่อที่ 2.8% ใกล้เคียงกับที่เราคาด

ปรับลดประมาณการกำไรของเรา 7-8% คงคำแนะนำซื้อและเลือกเป็นหุ้นเด่นที่ราคา

เราคงคำแนะนำซื้อและเลือก MTC เป็นหุ้นเด่นที่ราคาเป้าหมายปี 2025 ใหม่ที่ 56 บาท (GGM) จากเดิมที่ 60 บาท เราปรับลดประมาณการกำไรปี 2025-26 ของเราลง 7-8% จากการประหยัด ต้นทุนในการกู้ยืมเฉลี่ยที่ต่ำกว่าคาด ปัจจุบันเราคาดว่า MTC จะมีต้นทุนในการกู้ยืมเฉลี่ยที่ 4.34% ในปี 2025 เทียบกับ 4.39% ในปี 2024 อย่างไรก็ดีเราคาดว่าผลลบจะชดเชยได้จาก แนวโน้มคุณภาพสินทรัพย์ที่เอื้ออำนวยและต้นทุนความเสี่ยงในการปล่อยสินเชื่อที่คาดว่าจะอยู่ ที่ประมาณ 2.8% ในปี 2025-26 จากสินเชื่อที่โตต่อเนื่อง ประสิทธิภาพในการดำเนินงานที่ดีขึ้น และคุณภาพสินทรัพย์ที่เอื้ออำนวย เราคาดว่า MTC จะรายงานกำไรสุทธิในช่วงปี 2025-27 โต 16% CAGR

Investment thesis

We maintain our top BUY rating for MTC, supported by the positive outlook on its profitability as follows:

- Benign funding conditions in 2025-26E thanks to the better credit rating of 'A- (tha)' by Fitch Ratings compared to 'BBB+' by TRIS previously.
- An ongoing decline in the NPL ratio and credit costs after MTC's proactive balance sheet cleanup and prudent new loan underwriting since 2023.
- We expect a net profit CAGR (2025-27E) of 16.0%, reflecting MTC's highest profit growth expected among Thai diversified finance companies under our coverage. The key drivers include a loan growth CAGR of 10.9%, higher branch efficiency, economies of scale with a lower cost-to-income ratio and lower credit costs following benign asset quality.

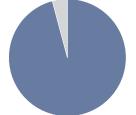

Company profile

MTC has provided lending services since 1992, focusing on motorcycle title loans, and commands the highest market share in Thailand. The company has also expanded its business to personal and other title loans such as car, agricultural and land title loans.

Catalysts

- Government stimulus acceleration to upcountry households;
- A stronger-than-expected improvement in asset quality;
- Better-than-expected OPEX control;
- Increase in loan yield to customers.

Risks to our call

Downside risks to our GGM-based TP include 1) a further weakening of asset quality that could potentially hit both loan yield and credit cost; and 2) changes in financial regulations by the Bank of Thailand and the Office of Consumer Protection Board.

Smaller funding cost savings

Longer funding duration will lead to smaller funding cost savings

We attended MTC's 4Q24 analyst meeting today (20 Feb). Overall, we have negative feedback from the meeting as the savings on funding costs will be lower than our initial expectation. The benign asset quality may help, but likely cannot offset the impact from the funding cost, we believe.

Despite being upgraded to an A- rating by Fitch Thailand, MTC will extend the average funding duration to 3.5 years, which is longer than the average loan duration of 2.5 years. According to MTC's deputy managing director Mr. Parithad Petaumpai, the rationale behind the longer funding duration is to secure funding sources for MTC's business growth and reduce the burden on MTC's debenture rollover after the market turbulence in 2024.

MTC also disclosed that the company has no plan to raise USD-denominated debentures in the near term. Note that MTC raised social bonds for offshore investors totaling USD335m in 3Q24 with an interest rate of 6.875% under a BB international rating by Fitch Global Rating. The interest rate is considerably high, in our view. Nonetheless, the USD-denominated social bonds will support MTC's mission of being a world-class microfinance operator from Thailand and MTC's new funding source beyond domestic funding.

With this direction, our initial expectation of savings for MTC's average funding cost by 40bp y-y in 2025E will be much lower. MTC provided guidance that the average funding cost in 1H25 would be around 4.6% (same level as 4Q24) before gradually subsiding in 2H25 following the lower policy interest rate.

On the other hand, MTC maintains a competitive yield pricing stance for customers with no change in pricing policy in the near future. This will limit the NIM expansion and MTC's profitability outlook in the near term, we believe.

Intact asset quality to continue

On the positive side, MTC sees its overall asset quality remaining intact. So far, the situation in Jan and Feb-25 is roughly the same as in 4Q24. Higher efficiency among collection staff and the positive impact from government stimulus measures (THB10,000 cash handout, farm income subsidy, etc.) are key supports. MTC targets a 2025 NPL ratio at 2.7% and credit cost at 2.8%, which is in line with our expectation.

For the new forbearance program by the Bank of Thailand "You Fight We Help", MTC expects that c100,000 customers will be in this program out of the 3.6 million total customer base for MTC (or 2.7% of total customers). In addition, MTC expects the impact on its financial performance to be minimal and manageable.

High loan growth and operating efficiency to pursue

MTC targets up to 15% y-y loan growth for 2025, which is in line with our projection of 13% growth y-y. Such loan growth in 2025E would be driven by 1) 600 new branches to 8,772 (from 8,172 branches in Dec-24); 2) higher internal efficiency with higher loans per branch from THB19.7m in 2024 and THB18.4m in 2023. In terms of products, the key focus for MTC remains secured loans (motorcycle title, auto title, and land title loans) rather than unsecured loans.

With higher loan efficiency at the branch level, aggregate operating efficiency will be another focus for MTC. Management believes it is possible that the cost-to-income ratio could decline from 47.4% in 2024 to 45% in the next 2 to 3 years. This is in line with our forecast, with a cost-to-income ratio at 45-47% in 2025-27E vs 47.4% in 2024.

Lower forecast by 7-8% for 2025-26, lower TP to THB56

We maintain our top BUY rating for MTC with a new GGM-based 2025 TP of THB56 (lower from THB60). We have cut our 2025-26 earnings forecast by 7-8% on lower-than-expected average funding cost savings. We now expect MTC's average funding cost to be at 4.34% in 2025 vs 4.39% in 2024. Our new projection implies only 5bp funding cost savings y-y in 2025E vs our initial expectation of savings of 40bp y-y. Nonetheless, we expect the negative impact to be partially offset by the benign asset quality outlook with credit costs at c2.8% in 2025-26E. With continued loan growth, better operating efficiency and benign asset quality, we expect MTC to post a 2025-27 net profit CAGR of 16%.

FSSIA ESG rating

★ ★ ★

Exhibit 14: FSSIA ESG score implication

59.64 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
***	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 19-Feb-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
