**EQUITY RESEARCH - COMPANY REPORT** 

# BETAGRO BTG TB

THAILAND / FOOD & BEVERAGE

- Management aims for revenue growth of 3-7% and remains positive about the outlook for meat prices in 2025.
- We expect 1Q25 net profit to grow and exceed THB1b on higher meat prices and starting to recognize the Singapore egg business.
- Reiterate BUY call with the same TP of THB24.

# We are impressed with the higher gross margin in 4Q24

BTG posted a 4Q24 net profit of THB983m (flat q-q, turning from a loss of THB660m in 4Q23). Excluding minor extra items, the core profit was THB976m (+8% q-q, turning from a loss in 4Q23). Although meat prices in Thailand in 4Q24 softened q-q, the higher sales volume from BTG helped maintain total revenue growth at 0.7% q-q and 10% y-y. We are impressed with the gross margin of 14.9% in 4Q24, up from 13.9% in 3Q24, marking the highest level in eight quarters. This benefited from low raw material prices as well as increased sales through higher-margin channels like food services, exports, overseas businesses, and pet food.

### Positive meat price outlook from management

Management aims for 2025 revenue growth of 3-7%, not including revenue from the egg business in Singapore (which is c2-3% more). They remain positive about the outlook for meat prices in 2025, including swine prices, which are expected to stay high at THB80-82/kg, similar to current prices, and chicken prices are expected to remain stable at THB42/kg due to steady supply and strong demand. The 2025 gross margin target is set at 13.5-15%, up from 13.5% in 2024. The strategy this year will focus on selling more value-added products and a channel mix with higher profitability, such as food services and exports.

### Expect 1Q25 net profit to exceed THB1b

We expect 1Q25 net profit to continue to grow q-q and y-y, driven by recovering meat prices, as well as higher prices for pork cuts, which should help improve the profitability of the domestic pork business from breakeven levels in 2024. The integration of the Singapore egg business is also expected to contribute, as management guided that the egg business profits would be able to offset interest expenses from the debt used to acquire it, further boosting BTG's overall profits.

### Positive view if Thailand needs to import raw materials from US

Regarding US tariffs, if Thailand allows imports of animal feed ingredients from the US, such as corn, which Thailand currently does not import from the US, this would be positive for animal farmers, as US corn is cheaper than local corn. This would help lower breakeven costs and could replace imports of corn from Myanmar, as the current corn supply is insufficient to meet domestic demand.

### Investment thesis

BTG operates a fully integrated food business covering the entire production chain from upstream, mid-stream to downstream. Its production and distribution bases are located in every region of Thailand, and it exports its products to overseas markets. BTG also produces in neighboring countries such as Cambodia, Laos, and Myanmar.

The company has diversified to six distribution channels which consist of Betagro branches, modern trade, traditional trade, food services, industrial customers (OEM business), and the export market (more than 20 countries). The company has strong brand recognition under the well-known BETAGRO brand, S-Pure for hygienic fresh meat, Perfecta, etc.

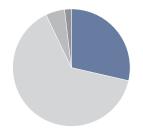

# Company profile

Established in 1967 and listed on the SET in 2022, BTG operates a full range of agro-industry businesses from upstream animal feed, pig and chicken farms, animal health products and supplements, meat processing, and food production to pet products. At the end of 2024, BTG generated revenue from Food & Protein (64.3% of total revenue), followed by Agro (28.6%), International (5.3%) and Pets (1.9%).

# **Catalysts**

Potential catalysts for BTG's 2025 earnings growth are 1) sales volume growth in line with a purchasing power and tourism recovery; 2) meat price increases; 3) flat or declining feed costs; and 4) an international business recovery.

### Risks to our call

Downside risks to our P/E-based TP include 1) a slower-thanexpected purchasing power recovery; 2) a slower-thanexpected meat price increase; 3) a slower-than-expected decrease in feed costs; and 4) a stronger-than-expected THB.

### **Earnings sensitivity**

- For every 1% increase in revenue, we estimate 2025 net profit to rise by 3.1%, and vice versa, all else being equal.
- For every 0.1% increase in GPM, we estimate 2025 net profit to rise by 4.2%, and vice versa, all else being equal.
- For every 0.1% increase in SG&A to sales, we estimate 2025 net profit to fall by 2.9%, and vice versa, all else being equal.

# **BETAGRO PCL (BTG TB)**

**FSSIA ESG** rating

n/a

# Exhibit 11: FSSIA ESG score implication

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
***	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

#### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 25-Feb-2025 unless otherwise stated.

### RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### **Industry Recommendations**

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
