So far so good

- Management has set a revenue growth target of 5-8% y-y for 2025 and provided a positive outlook for meat prices in 1H25.
- We see upside potential for our 2025E profit. Our current TP of THB28 still offers a 15% upside, so we maintain our BUY call.
- Possibility of seeing progress on the spin-off of CP Vietnam in 2025.

4Q24 core profit significantly exceeded expectations

CPF reported a 4Q24 net profit of THB4.17b (-43% q-q, +35x y-y). Excluding several extra items, the core profit was THB6.54b (flat q-q, turning from a loss in 4Q23), which was much better than expected. Total revenue grew by 4% q-q and 1% y-y, due to an increase in sales volumes. The 4Q24 gross margin was impressive at 15.7%, up from 15.4% in 3Q24 and 9.2% in 4Q23 (we expected 14%). The share of profits from associates was strong, increasing both q-q and y-y, mainly from CPALL and CPAXT, which offset the weakness in the Chinese swine business.

CPF provided a positive meat price outlook for 2025

Management has set a revenue growth target of 5-8% y-y for 2025, driven by both increased sales volumes and sustained strong selling prices. The outlook for meat prices in 1H25 is positive, especially in Thailand and Vietnam, as supply remains tight due to ASF and the impact of flooding in late 2024. Currently, Thai swine prices have risen to THB80/kg (+13% q-q), Thai chicken to THB40/kg (+5% q-q), and Vietnamese swine to VND71,000/kg (+18% q-q). Only Chinese swine prices have weakened to RMB14.8/kg (-11% q-q), but CPF expects Chinese swine prices to improve in 2Q25 due to stronger demand.

Solid gross margin could be a potential upside

The 1H25 gross margin is expected to remain high, as raw material prices have slightly decreased from 4Q24. Corn prices are expected to start declining in March due to higher production, combined with the positive effects of improved production efficiency. Regarding the US tariff issue, there is a high likelihood that Thailand will import corn from the US, which would be positive for livestock farmers, as domestic production is already insufficient to meet demand. CPF estimates that the cost of importing corn from the US would be about THB1/kg baht/kg cheaper than domestic corn prices.

Retain BUY rating

We see upside potential for our 2025E profit currently at THB15.5b if the meat and raw material price trends continue to be favorable for business in 2H25. However, our current TP of THB28 still offers a 15% upside, so we maintain our BUY call. CPF announced a 2H24 DPS of THB0.55/shr, yielding 2.3%. In addition, the Vietnamese government will reconsider a new IPO in March, and CP Vietnam is also on the list of companies expected to be considered. We expect to see more clarity in 2H25.

Investment thesis

CPF operates an integrated agro-industrial and food business under its “Kitchen of the World” vision for sustainable growth. The company owns production bases through investments and joint ventures in 17 countries and exports to over 50 countries. Since CPF starts from upstream, especially farming, which is highly volatile in line with meat prices and feed costs, its annual performance sharply fluctuates. CPF reported a significant turnaround in profit in 2024. Meanwhile, we have a more optimistic outlook for the meat price trend in 2025, due to the strong recovery meat prices in Thailand and Vietnam in 1Q25. In addition, CPF’s management guided that the Chinese swine price may recover in 2Q25 onward, due to stronger demand.

Company profile

Established in 1978 and listed on the Stock Exchange of Thailand in 1987, CPF operates a vertically integrated agro-industrial and food business, from upstream to downstream, covering livestock and aquaculture such as swine, broilers, layers, ducks, shrimp, and fish. As of end-2024, CPF generated revenue from three units, namely Feed, Farm, and Food, with a revenue mix of 23%/55%/22%, respectively.

Catalysts

Potential drivers for CPF’s earnings growth in 2025 are 1) sales volume growth after demand increases; 2) higher meat prices; 3) flat or declining feed costs; and 4) a better-than-expected recovery of overseas associates and subsidiaries.

Risks to our call

Downside risks to our P/E-based TP include 1) slow purchasing power; 2) a slower-than-expected meat price recovery; 3) higher feed costs; 4) baht strength; and 5) a minimum wage increase and labor shortages.

Earnings sensitivity

- For every 1% increase in 2025 revenue, we estimate net profit to rise by 4%, and vice versa, all else being equal.
- For every 0.1% increase in 2025 GPM, we estimate net profit to rise by 3.5%, and vice versa, all else being equal.
- For every 0.1% increase in 2025 SG&A to sales, we estimate net profit to fall by 4.4%, and vice versa, all else being equal.

Source: FSSIA estimates

4Q24 core profit significantly exceeded expectations

CPF reported a 4Q24 net profit of THB4.17b (-43% q-q, +35x y-y). Excluding several extra items, the core profit was THB6.54b (flat q-q, turning from a loss in 4Q23), which was much better than expected, driven by higher-than-expected revenue and a better-than-anticipated gross margin.

Total revenue grew by 4% q-q and 1% y-y, better than expected despite a decline in meat prices. The increase in sales volumes helped drive revenue growth.

The 4Q24 gross margin was impressive at 15.7%, up from 15.4% in 3Q24 and 9.2% in 4Q23 (we expected 14%), due to stronger-than-expected revenue, while raw material prices continued to decline.

The share of profits from associates was strong, increasing both q-q and y-y, mainly from CPALL and CPAXT, which offset the weakness in the Chinese swine business.

CPF's 2024 net profit was THB19.6b, turning from a loss of THB5.2b in 2023, marking the highest profit in four years. The share of profits from associates was THB12.7b (65% of CPF's net profit), mainly from CPALL and CPAXT, amounting to THB9.6b (49% of CPF's net profit).

FSSIA ESG rating

Exhibit 18: FSSIA ESG score implication

81.76 /100

| Rating | Score | Implication |
|--------|---------|--|
| ★★★★★ | >79-100 | Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability. |
| ★★★★ | >59-79 | A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers. |
| ★★★ | >39-59 | Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually. |
| ★★ | >19-39 | Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable. |
| ★ | 1-19 | The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC. |

Disclaimer for ESG scoring

| ESG score | Methodology | Rating | | | | | | | | | | | | | | | | | | | | |
|--|--|---|---|--------------|---------|---|--------|-------------|-------|-------------|-------|-------------|----------|---|----|-------------|---|-------------|-----|-------------|----------|---|
| The Dow Jones Sustainability Indices (DJSI) By S&P Global | The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion. | Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe. | | | | | | | | | | | | | | | | | | | | |
| SET ESG Ratings List (SETESG) by The Stock Exchange of Thailand (SET) | SET ESG quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years. | To be eligible for SETESG inclusion , verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. SETESG Index is extended from the SET ESG Ratings companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks. | | | | | | | | | | | | | | | | | | | | |
| CG Score by Thai Institute of Directors Association (Thai IOD) | An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations. | Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%). | | | | | | | | | | | | | | | | | | | | |
| AGM level By Thai Investors Association (TIA) with support from the SEC | It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). <i>(The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)</i> | The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79. | | | | | | | | | | | | | | | | | | | | |
| Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC) | The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. <i>(Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)</i> | The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements. | | | | | | | | | | | | | | | | | | | | |
| Morningstar Sustainalytics | The Sustainalytics' ESG risk rating provides an overall company score based on an assessment of how much of a company's exposure to ESG risk is unmanaged. <i>Sources to be reviewed include corporate publications and regulatory filings, news and other media, NGO reports/websites, multi-sector information, company feedback, ESG controversies, issuer feedback on draft ESG reports, and quality & peer reviews.</i> | A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored. <table><tr><th>NEGL</th><th>Low</th><th>Medium</th><th>High</th><th>Severe</th></tr><tr><td>0-10</td><td>10-20</td><td>20-30</td><td>30-40</td><td>40+</td></tr></table> | NEGL | Low | Medium | High | Severe | 0-10 | 10-20 | 20-30 | 30-40 | 40+ | | | | | | | | | | |

| ESG Book | The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis. | The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance. | | | | | | | | | | | | | | | | | | | | |
| MSCI | MSCI ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. It uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. <table><tr><td>AAA</td><td>8.571-10.000</td><td rowspan="3">Leader:</td><td rowspan="3">leading its industry in managing the most significant ESG risks and opportunities</td></tr><tr><td>AA</td><td>7.143-8.570</td></tr><tr><td>A</td><td>5.714-7.142</td></tr><tr><td>BBB</td><td>4.286-5.713</td><td rowspan="3">Average:</td><td rowspan="3">a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers</td></tr><tr><td>BB</td><td>2.857-4.285</td></tr><tr><td>B</td><td>1.429-2.856</td></tr><tr><td>CCC</td><td>0.000-1.428</td><td>Laggard:</td><td>lagging its industry based on its high exposure and failure to manage significant ESG risks</td></tr></table> | | AAA | 8.571-10.000 | Leader: | leading its industry in managing the most significant ESG risks and opportunities | AA | 7.143-8.570 | A | 5.714-7.142 | BBB | 4.286-5.713 | Average: | a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers | BB | 2.857-4.285 | B | 1.429-2.856 | CCC | 0.000-1.428 | Laggard: | lagging its industry based on its high exposure and failure to manage significant ESG risks |
| AAA | 8.571-10.000 | Leader: | leading its industry in managing the most significant ESG risks and opportunities | | | | | | | | | | | | | | | | | | | |
| AA | 7.143-8.570 | | | | | | | | | | | | | | | | | | | | | |
| A | 5.714-7.142 | | | | | | | | | | | | | | | | | | | | | |
| BBB | 4.286-5.713 | Average: | a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers | | | | | | | | | | | | | | | | | | | |
| BB | 2.857-4.285 | | | | | | | | | | | | | | | | | | | | | |
| B | 1.429-2.856 | | | | | | | | | | | | | | | | | | | | | |
| CCC | 0.000-1.428 | Laggard: | lagging its industry based on its high exposure and failure to manage significant ESG risks | | | | | | | | | | | | | | | | | | | |
| Moody's ESG solutions | Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term. | | | | | | | | | | | | | | | | | | | | | |
| Refinitiv ESG rating | Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. <i>(Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)</i> | | | | | | | | | | | | | | | | | | | | | |
| S&P Global | The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100. | | | | | | | | | | | | | | | | | | | | | |
| Bloomberg | ESG Score | Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best. | | | | | | | | | | | | | | | | | | | | |
| Bloomberg | ESG Disclosure Score | Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point. | | | | | | | | | | | | | | | | | | | | |

Rating regarding the sustainable development of Thai listed companies, both on the SET and MAI, are publicly available on the website of the Securities and Exchange Commission of Thailand (SEC). Currently, ratings available are 1) "CG Score"; 2) "AGM Level"; 3) "Thai CAC"; and 4) THSI. The ratings are updated on an annual basis. FSSIA does not confirm nor certify the accuracy of such ratings.

You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 26-Feb-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
