ปัจจัยกดดัน ROE อย่างต่อเนื่อง

- เราคงมุมมองของเราที่ว่าผลตอบแทนต่อส่วนผู้ถือหุ้น (ROE) ยังมีปัจจัยกดดันจากหุ้นปันผล ซึ่งจะลดสัดส่วนหนี้สินต่อส่วนผู้ถือหุ้นและผลตอบแทนสินเชื่อ
- SAWAD รายงานกำไรสุทธิ 4Q24 ที่อ่อนแอโดยอยู่ที่ 1.23 พัน ลบ. (-3% y-y, -6% q-q) จากผลตอบแทนสินเชื่อที่ลดลงเป็นหลัก
- งบคำแนะนำที่ราคาเป้าหมายใหม่ที่ 36 บาท (1.42x 2025E P/BV)

ควบคุมสัดส่วนหนี้สินต่อส่วนผู้ถือหุ้น (D/E) และสภาพคล่องแต่ผลตอบแทนต่อส่วนผู้ถือหุ้น (ROE) ลดลง

หลังการประชุมนักวิเคราะห์หลังผลประกอบการ 4Q24 ของ SAWAD (28 ก.พ.) เราคงมุมมองของเราที่ว่า ROE ยังกำลังประสบปัจจัยกดดัน SAWAD กำลังให้ความสำคัญกับการลด D/E ให้เหลือ 1.7x จาก 2.0x (เทียบกับ 2.2x ในเดือน ธ.ค. 24) มากกว่า ROE จากประมาณการของเราหุ้นปันผลอาจเป็นทางเลือกจนถึงปี 2026 ปัจจุบันเราคาดว่า ROE อาจต่ำกว่า 15% ในปี 2025 และ 2026 ถ้าผลตอบแทนสินเชื่อไม่ดีขึ้น ผู้บริหารย้ำว่า SAWAD ไม่มีปัญหาสภาพคล่องและเงินทุน บริษัทฯ เปิดเผยว่าสินเชื่อที่หดตัว q-q ใน 4Q24 เกิดจากการสะสมกระแสเงินสดเพื่อใช้จ่ายเจ้าหน้าที่และผู้ถือหุ้นมากกว่าเพื่อขยายสินเชื่อ

ผลประกอบการ 4Q24 ตกต่ำ

SAWAD รายงานกำไรสุทธิ 4Q24 ตกต่ำโดยอยู่ที่ 1.23 พัน ลบ. (-3% y-y, -6% q-q) ต่ำกว่าที่เราคาด 9% ทั้งนี้ ROE ที่ 15.07% ใน 4Q24 เป็นระดับที่ต่ำที่สุดในรอบ 10 ปี เราเห็นว่าปัจจัยสำคัญที่ทำให้กำไรต่ำกว่าคาดประกอบด้วย 1) สินเชื่อที่หดตัว 3% q-q เทียบกับที่เราคาดว่าจะเพิ่มขึ้น q-q; 2) ผลตอบแทนสินเชื่อและส่วนต่างดอกเบี้ยที่ต่ำกว่าคาด; 3) ค่าธรรมเนียมเงินกู้ที่ต่ำกว่าคาด; และ 4) ผลขาดทุนจากการยืมตราที่สูงขึ้น q-q

ลดประมาณการกำไรปี 2025-26 ลง 6-8%

เราปรับลดประมาณการกำไรปี 2025-26 ของเราลง 6-8% จากคาดการณ์การเติบโตของสินเชื่อที่ลดลงเหลือประมาณ 7-8% ต่อปีในปี 2025-26 และผลตอบแทนสินเชื่อที่ต่ำกว่าคาด ปัจจุบันเราคาดว่าผลตอบแทนสินเชื่อเฉลี่ยจะอยู่ที่ 18.4% ในปี 2025 ลดลงจาก 20.66% และ 18.95% ในปี 2023-24 ตามลำดับ เราเห็นว่าปัจจัยกดดันผลตอบแทนสินเชื่อจะมาจาก 1) การแข่งขันที่สูงขึ้นในธุรกิจสินเชื่อทะเบียนสินทรัพย์; และ 2) การครบกำหนดของสินเชื่อเช่าซื้อรถจักรยานยนต์ที่ให้ผลตอบแทนสูงกว่า 30% ก่อนรัฐบาลออกเพดานอัตราดอกเบี้ยที่ 23% ตั้งแต่เดือน ม.ค. 2023

คงคำแนะนำที่ราคาเป้าหมายใหม่ที่ 36 บาทหลัง ROE ลดลง

เราปรับลดราคาเป้าหมายปี 2025 ของเราลงเหลือ 36 (GGM) จาก 45.50 บาทเนื่องจากเราปรับลดค่า P/BV เป้าหมายลงเหลือ 1.42x จาก 1.77x ก่อนหน้าตามประมาณการ ROE ที่ลดลงเหลือ 13.2% จาก 15% ก่อนหน้าจากการเติบโตของสินเชื่อที่ตกต่ำ ส่วนต่างดอกเบี้ยที่ลดลงและหุ้นปันผลเพื่อควบคุม D/E เราคาดว่า SAWAD จะรายงานกำไรสุทธิในช่วงปี 2025-27 โต 7.2% CAGR และ ROE ที่ 13-14% ในช่วงดังกล่าวซึ่งต่ำกว่า 18.6% และ 16.5% ในช่วงปี 2023-24 อยู่มาก

บทวิเคราะห์ฉบับนี้แปลมาจากต้นฉบับภาษาอังกฤษ ที่ออกรายงานเมื่อวันที่ 3 มีนาคม 2025

Investment thesis

- We have a neutral view of SAWAD's outlook despite a gradual improvement in asset quality after the active balance sheet cleanup process in 1H23. This is because the cleanup process has resulted in muted loan growth in 2024, which could be prolonged to 2025-26.
- We expect lower average loan yields for SAWAD in 2025-26. This is due to the maturity of the high-yield loan segment, especially motorcycle hire-purchase (HP), and high competition in the asset title loan (ATL) business.
- Slow loan growth, NIM contraction and stock dividends could pressure SAWAD's ROE down to 14% by 2026, in our view.
- We expect a 2025-27 net profit CAGR of 7.2% for SAWAD.

Company profile

SAWAD provides loan services to retail customers. Its business operations can be classified into four main categories: 1) auto title loans against all types of used vehicles, homes, and land; 2) unsecured personal loans; 3) motorcycle hire-purchase; and 4) asset management.

www.meebaanmeerod.com

Principal activities (revenue, 2024)

- Net interest income - 83.1 %
- Non-interest income - 16.9 %

Source: Srisawad Corp

Major shareholders

- Kaewbootta Family - 28.2 %
- Thai NVDR - 9.3 %
- Others - 62.4 %

Catalysts

- Government stimulus acceleration to upcountry households;
- Better-than-expected NIM and non-NII;
- A stronger-than-expected improvement in asset quality and credit cost;
- Growth potential from new business.

Risks to our call

Downside risks to our GGM-based TP include 1) a further weakening of asset quality that could potentially hit both loan yield and credit cost; and 2) changes in financial regulations by the Bank of Thailand and the Office of Consumer Protection Board. Upside risks include 1) a faster-than-expected decline in losses on sales of repossessed cars for SCAP; and 2) an interest rate downtrend could push its interest spread.

Continued headwinds on ROE

Lower forecast by 6-8% for 2025-26; cut TP to THB36 on lower ROE projection

After the poor 4Q24 performance with the lowest ROE level in 10 years, we maintain our HOLD rating for SAWAD with a new GGM-based 2025 TP of THB36 (from THB45.50). SAWAD remains our least-preferred name among Thai auto title lenders.

We have cut our 2025-26 earnings forecast by 6-8% on the back of a lower loan growth forecast of c.7-8% pa in 2025-26 and lower-than-expected loan yield generation.

We now expect SAWAD's average loan yield to be at 18.4% in 2025, down from 20.66% and 18.95% in 2023-24, respectively. The pressure on SAWAD's loan yield, in our view, should come from 1) higher competition in the asset title loan industry; and 2) the maturity of high-yield motorcycle HP loans with yields of more than 30% before the introduction of the ceiling rate at 23% since January 2023.

On the other hand, we expect SAWAD's average cost of funds to decrease y-y to 4.39% in 2025 from 4.48% in 2024, supported by the new A- credit rating by Fitch Thailand with savings from new debenture issuances. Nonetheless, the savings in funding costs cannot offset the headwinds from the persistently lower loan yield, in our view. Sensitivity-wise, a decrease in NIM by 10bp would drag SAWAD's 2025E net profit by 1.8%, all else being equal.

Overall, the asset quality outlook for SAWAD should be controllable, in our view, following the active NPL write-offs since 2Q23. We expect the NPL ratio to be around 3.7-3.9% for 2025-27, which is in line with SAWAD's 10-year historical NPL average of 4.0%.

With poor loan growth, NIM contraction and a stock dividend option in order to control the D/E ratio, we expect SAWAD to post a 2025-27 net profit CAGR of 7.2% and ROE of 13-14% in the same period, which is much lower than 18.6% and 16.5% in 2023-24, respectively.

We cut our GGM-based 2025 TP to THB36 from THB45.50 as we are de-rating the target P/BV multiple to 1.42x from 1.77x previously. The multiple de-rating is a result of our lower ROE projection to 13.2% from 15% previously.

Key takeaways from 4Q24 analyst meeting

After SAWAD's 4Q24 analyst meeting (28 Feb), we maintain our view that SAWAD's ROE is still facing headwinds. SAWAD continues to prioritize a reduction in its D/E ratio down to 1.7x from 2.0x (vs 2.2x in Dec-24) rather than ROE. Based on our projection, the stock dividend option may last up until 2026. We now expect that SAWAD's ROE could be below 15% in 2025 to 2026, if there is no improvement in the loan yield.

Management reiterated that SAWAD has no issue with liquidity and funding. SAWAD disclosed that the loan contraction q-q in 4Q24 was a result of accumulating cash flow for creditors and debenture holders first rather than loan growth.

Nonetheless, with the new A- rating and benign funding conditions from both debentures and the loan market since Dec-24, SAWAD is resuming loan growth with a target of 10% to 15% for 2025. We conservatively expect it to be at the lower bound on the back of the conservative loan-to-value or LTV stance at 35% to 40%. In detail, we expect the key driver for SAWAD's loan growth to mainly come from asset title loans (land, pickup trucks, motorcycles), while motorcycle HP could be flat or contract y-y.

Many questions in the meeting focused on loan yield and ROE. For the lower loan yield, SAWAD argued that it was a result of loan contraction q-q in 3Q and 4Q24. Once loan growth resumes in 1Q-2Q25, SAWAD expects an improvement of the average loan yield in 2Q to 3Q25. However, we believe the lower loan yield was a result of the high-yield loans maturing, with a contraction from both asset title loans and the motorcycle HP business and ongoing competition in asset title loans with low LTV vs peers' c50% LTV.

There are not many questions about SAWAD's asset quality. SAWAD targets an NPL ratio of 3% to 4% in 2025, which is in line with our forecast of 3.7%, and a credit cost of 2.0% (also in line).

The loss on sales in 4Q24 was mainly from asset title loans (ATL), not from motorcycle HP.

(-) SAWAD – 4Q24 results review

SAWAD reported a poor 4Q24 net profit of THB1.23b (-3% y-y, -6% q-q). This was 9% below our estimate and 10% below the Bloomberg consensus. The ROE of 15.07% in 4Q24 was the lowest ROE level in the past 10 years.

(-) The key misses, in our view, include:

- loan contraction by 4% y-y and 3% q-q vs our forecast of improving q-q;
- lower-than-expected loan yield and NIM;
- lower-than-expected non-NII from loan-related fees; and
- higher loss from auto repossessions q-q.

(+) Meanwhile, credit cost was at 1.7%, better than our forecast of 2.0%, which partially offset the negative impacts mentioned above.

(0) Overall asset quality looks stable, in our view. The NPL ratio was at 3.58% in 4Q24, in line with our forecast. Meanwhile, the proportion of loans under stage II (delinquent loans) was at 10.6% of total loans and the NPL formation rate was at 1.8%; both numbers are roughly stable q-q.

For full-year 2024, SAWAD reported a net profit of THB5.05b, flat y-y from a lower loan yield, loan contraction and costs from auto repossessions, but was offset by a lower credit cost.

(-) SAWAD has announced a stock dividend at a 10:1 ratio and a small cash DPS of THB0.04, with the XD date on 8 May. The stock dividend decision was in line with our expectation, as SAWAD had to control its debt-to-equity to 2.2x in Dec-24 from 2.8x in Dec-23. ROE was down to 16.5% in 2024 from 18.6% in 2023.

Srisawad Corp PCL (SAWAD TB)

FSSIA ESG rating

57.03 /100

Exhibit 14: FSSIA ESG score implication

Rating	Score	Implication
★★★★★	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
★★★★☆	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
★★★☆☆	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
★★☆☆☆	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
★☆☆☆☆	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Disclaimer for ESG scoring

ESG score	Methodology	Rating																			
The Dow Jones Sustainability Indices (DJSI) By S&P Global	The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion.	Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe.																			
SET ESG Ratings List (SETESG) by The Stock Exchange of Thailand (SET)	SET ESG quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years.	To be eligible for SETESG inclusion , verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. SETESG Index is extended from the SET ESG Ratings companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks.																			
CG Score by Thai Institute of Directors Association (Thai IOD)	An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations.	Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%).																			
AGM level By Thai Investors Association (TIA) with support from the SEC	It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). <i>(The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)</i>	The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79.																			
Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC)	The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. <i>(Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)</i>	The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements.																			
Morningstar Sustainabilitys	The Sustainabilitys' ESG risk rating provides an overall company score based on an assessment of how much of a company's exposure to ESG risk is unmanaged. <i>Sources to be reviewed include corporate publications and regulatory filings, news and other media, NGO reports/websites, multi-sector information, company feedback, ESG controversies, issuer feedback on draft ESG reports, and quality & peer reviews.</i>	A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored. <table><tr><th>NEGL</th><th>Low</th><th>Medium</th><th>High</th><th>Severe</th></tr><tr><td>0-10</td><td>10-20</td><td>20-30</td><td>30-40</td><td>40+</td></tr></table>	NEGL	Low	Medium	High	Severe	0-10	10-20	20-30	30-40	40+									
NEGL	Low	Medium	High	Severe																	
0-10	10-20	20-30	30-40	40+																	
ESG Book	The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis.	The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance.																			
MSCI	MSCI ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. It uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. <table><tr><td>AAA</td><td>8.571-10.000</td><td rowspan="3">Leader:</td><td rowspan="3">leading its industry in managing the most significant ESG risks and opportunities</td></tr><tr><td>AA</td><td>7.143-8.570</td></tr><tr><td>A</td><td>5.714-7.142</td></tr><tr><td>BBB</td><td>4.286-5.713</td><td rowspan="3">Average:</td><td rowspan="3">a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers</td></tr><tr><td>BB</td><td>2.857-4.285</td></tr><tr><td>B</td><td>1.429-2.856</td></tr><tr><td>CCC</td><td>0.000-1.428</td><td>Laggard:</td><td>lagging its industry based on its high exposure and failure to manage significant ESG risks</td></tr></table>	AAA	8.571-10.000	Leader:	leading its industry in managing the most significant ESG risks and opportunities	AA	7.143-8.570	A	5.714-7.142	BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers	BB	2.857-4.285	B	1.429-2.856	CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks

A	5.714-7.142																				
BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers																		
BB	2.857-4.285																				
B	1.429-2.856																				
CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks																		
Moody's ESG solutions	Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term.																				
Refinitiv ESG rating	Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. <i>(Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)</i>																				
S&P Global	The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100.																				
Bloomberg	ESG Score	Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best.																			
Bloomberg	ESG Disclosure Score	Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point.																			

[Rating](#) regarding the sustainable development of Thai listed companies, both on the SET and MAI, are publicly available on the website of the Securities and Exchange Commission of Thailand (SEC). Currently, ratings available are 1) "**CG Score**"; 2) "**AGM Level**"; 3) "**Thai CAC**"; and 4) **THSI**. The ratings are updated on an annual basis. FSSIA does not confirm nor certify the accuracy of such ratings.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 28-Feb-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
