# 4Q24 results at first glance

# 4Q24 net profit was in line with our estimate

#### **Highlights**

- SIRI reported a 4Q24 profit of THB1.2b (-5% q-q, -4% y-y), in line with our estimate. Excluding extra gains of THB40m from land and asset sales, the core profit equaled THB1.2b (-4% q-q, -4% y-y).
- The q-q and y-y decline in profit was primarily due to a lower property gross margin at 27.7%, down from 31.1% in 3Q24 and 35.2% in 4Q23, pressured by price promotions and fierce competition.
- SIRI's transfers grew 10% q-q but dropped 7% y-y to THB9.1b, split 70:30 between low-rises and condos. The q-q growth came from higher low-rise transfers amounting to THB6.4b (+16% q-q, -16% y-y), while the y-y increase in condo transfers worth THB2.7b (-2% q-q, +22% y-y) was led by the continued realization of new condos from 3Q24.
- Sharing from JVs amounted to THB382m in 4Q24, down 5% q-q but up 319% y-y, driven by two newly built condos.
- SG&A to sales was controlled at 21.1% (vs 20.4% in 3Q24 and 20.8% in 4Q23). However, interest expenses increased to THB216m (+81% q-q, +52% y-y), as all hotels resumed operations following renovation closures.
- SIRI's 2024 net profit totaled THB5.25b (-13% y-y). Excluding extra items, the core profit stood at THB4.9b (-5% y-y).
- At the end of 2024, the D/E and IBD/E was 2.0x and 1.6x, down from 2.1x and 1.7x in 2023, respectively. The IBD/E was still below its covenant of 2.5x.

## Outlook

- In the short term, we expect 1Q25 core profit to be flat q-q but grow y-y. Transfers might be stable with 4Q24, while the GPM should gradually recover from the low base in 4Q24. Moreover, the net profit might have an upside from an extra gain from land sales to new JVs.
- We maintain our 2025E core profit of THB5.1b (+5% y-y). We expect to see positive momentum in 2H25, rising h-h, led by more newly built condos and GPM improvement.
- SIRI has announced a 2H24 DPS of THB0.08, implying a yield of 4.8%. The stock's XD is on 17 March and the dividend will be paid on 20 May 2025.

#### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 03-Mar-2025 unless otherwise stated.

# RECOMMENDATION STRUCTURE

# Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

# **Industry Recommendations**

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
