EQUITY RESEARCH - TRANSFER OF COVERAGE

BANGKOK BANK

THAILAND / BANKING

- We foresee positive catalysts for BBL including room for loan expansion, resilient NIM, strong asset quality and lower credit cost.
- BBL is now trading at 0.5x 2025E P/BV vs the ROE projection of around 8.3%. We see BBL's valuation as undemanding.
- Maintain top BUY rating with a new TP of THB194.

Positive catalysts for BBL's operations

Overall, we foresee positive catalysts for BBL including 1) room for loan expansion; 2) resilient NIM, despite the negative impact from one policy interest rate cut to 2.0% in 2025E; 3) cost to income reaching c47-48% in 2025-26E following loan expansion; and 4) strong asset quality with room to lower credit costs to 116bp in 2025E vs 130bp in 2024.

Strong demand for loans from corporate and international loans

BBL targets overall loan growth of 3-4% in 2025 vs our estimate of 3.4%, mainly driven by the domestic corporate and international loan segments (led by Indonesia and Vietnam). Note that BBL's loan growth target of 3-4% is the highest guidance level among Thai banks (0-3% loan growth). In detail, the demand for loans among the corporate segment would be mainly driven by 1) digital transformation; 2) relocation of supply chains to ASEAN, which is reflected by higher foreign direct investment (FDI); 3) the ESG and energy transition trend; and 4) infrastructure investments.

Easing asset quality allows for lower credit cost

BBL reported a large reduction in its NPL ratio to 3.19% in 4Q24 from 3.94% in 3Q24. There was a THB18b reduction in NPLs q-q in 4Q24 vs the normal reduction of cTHB9b from 3Q to 4Q in the past years. BBL disclosed that the reduction was due to the successful restructuring progress for many NPL accounts from various industries. We believe part of the NPL reduction in 4Q24 was likely from Thai Airways following the successful rehabilitation plan. With easing asset quality conditions and ample loan loss reserves of more than 10% of total loans, we expect BBL to record lower credit costs of 115-116bp in 2025-26 vs 130bp in 2024.

Raised forecast by 8%; maintain our top BUY with TP of THB194

We have raised our 2025-26 forecast by 8% on the back of lower loan loss provisions, a lower cost-to-income ratio and higher operating income following our loan growth projection. We raise our GGM-based 2025 TP to THB194 (from THB184), which implies 0.63x 2025E P/BV (COE of 10.0%, ROE of 7.4%). In addition, with an undemanding valuation at only 0.5x 2025E P/BV vs the ROE projection of around 8.3% in 2025-26, we believe BBL has an attractive share price upside for investors. With this report, we transfer coverage of BBL to Nathapol Pongsukcharoenkul.

Investment thesis

- Overall, we foresee positive catalysts for BBL including 1) room for loan expansion from corporate and international segments; 2) resilient NIM despite negative impact from one policy interest rate cut to 2.0% in 2025E; 3) the cost-to-income ratio gradually reaching c47-48% in 2025-26E following loan and revenue expansion; and 4) strong asset quality with room to lower credit costs to 116bp in 2025E vs 130bp in 2024.
- In addition, with an undemanding valuation at only 0.5x 2025E P/BV vs our ROE projection of around 8.3% in 2025-26, we believe BBL has an attractive share price upside for investors.
- Based on our calculation, if BBL raised its dividend payout ratio to 45% from 36%, we would expect BBL's ROE to increase by 20bp by 2026, and thus could be a positive catalyst for BBL's share price in terms of better capital management.

Company profile

Bangkok Bank is a leading bank in Thailand and a major regional bank in Southeast Asia. It is a market leader in corporate and business banking, with a large retail customer base.

www.bangkokbank.com

Principal activities (revenue, 2024)

■ Net interest income - 76.2 %

Non-interest income - 23.8 %

Source: Bangkok Bank

Major shareholders

■ Thai NVDR - 23.2 %

■ Social Security Office - 2.7 %

State Street Europe Ltd - 2.5 %

■ Others - 71.6 %

Source: Bangkok Bank

Catalysts

- Higher loan demand for corporate loans from foreign direct investment into Thailand and ASEAN countries.
- Lower-than-expected impact from interest rate cuts.
- A lower credit cost from asset quality improvement.

Risks to our call

Downside risks are 1) prolonged economic sluggishness affecting loan growth and asset quality; and 2) the impact of new regulations from the Bank of Thailand.

Undemanding valuation with catalysts

Maintain top BUY rating with a new TP of THB194

Overall, we foresee positive catalysts for BBL including 1) room for loan expansion; 2) resilient NIM, despite the negative impact from one policy interest rate cut to 2.0% in 2025E; 3) the cost-to-income ratio gradually reaching c47-48% in 2025-26E following loan and revenue expansion; and 4) strong asset quality with room to lower credit costs to 116bp in 2025E vs 130bp in 2024.

We have raised our 2025-26 forecast by 8% on the back of lower loan loss provisions, a lower cost-to-income ratio and higher operating income on our loan growth projection. We now expect BBL's loan growth to be around 3.2-3.4% for 2025-26, driven by corporate loans and the international segment (led by Indonesia and Vietnam) following a new investment cycle in Thailand as well as Indonesia and Vietnam.

As a result, we expect BBL to post net profit growth of 5-6% for 2025-26, which is higher than the industries projected net profit growth of 4.5% during the same period.

After our earnings revisions, we raise our GGM-based 2025 TP to THB194 (from THB184 previously), which implies 0.63x 2025E P/BV (COE of 10.0%, ROE of 7.4%).

In addition, with an undemanding valuation at only 0.5x 2025E P/BV vs the ROE projection of around 8.3% in 2025-26, we believe BBL has an attractive share price upside for investors.

We conservatively project BBL's payout ratio to be 36% for 2025-26, which is the lowest level among Thai banks under our coverage. Based on our calculation, if BBL raised its dividend payout ratio to 45% from 36%, we would expect BBL's ROE to increase by 20bp by 2026, and thus could be a positive catalyst for BBL's share price in terms of better capital management.

We maintain our top BUY rating for BBL with a new GGM-based 2025 TP of THB194.

Expect positive loan growth momentum from corporate, international segments

BBL targets overall loan growth of 3-4% in 2025 vs our estimate of 3.4%, mainly driven by the domestic corporate and international loan segments (led by Indonesia and Vietnam). Note that BBL's loan growth target of 3-4% is the highest guidance level among Thai banks (0-3% loan growth). In detail, the demand for loans among the corporate segment would be mainly driven by 1) digital transformation including investment for data centers and manufacturing for integrated circuits (IC); 2) relocation of supply chains to ASEAN, which is reflected by higher foreign direct investment (FDI); 3) the ESG and energy transition trend; and 4) infrastructure investments.

From the exhibit below, BBL's corporate loan proportion has increased consistently to 46% in 2024 vs 41% in 2019. In addition, the international loan segment has increased to 25% in 2024 vs 17% and 23% in 2019-20, respectively. BBL targets loan growth for both segment at 3-5% for 2025.

Part of the international loan expansion is supported by the acquisition of Permata Bank Indonesia (BNLI IJ) in 2020. With high GDP growth forecasts for Indonesia and Vietnam for 2025 at 5.1% and 6.7%, respectively (source: IMF World Economic Outlook January 2025), we believe both countries will be the key loan growth drivers for BBL's international loan segment. On the other hand, BBL also has loan exposure in China. With slower GDP growth of 4.5% in 2025E vs 4.8% in 2024 (source: IMF), this could slow BBL's loan expansion somewhat, in our view.

Exhibit 7: BBL's loan segmentation

Sources: BBL, FSSIA compilation

Back to the domestic corporate loan segment for BBL, the high demand for loans among the corporate segment is in line with the senior loan survey from the Bank of Thailand (BOT) in January 2025. We believe the demand for loans should be mainly driven by the recovery of Thai exports at 8.7% growth y-y in Dec-24 (source: Ministry of Commerce), new project investment and high FDI following the request for Board of Investment (BOI) promotion in 2022-24 at THB619-1,139b (see Exhibits 8-9).

According to BBL's management, they observed that the requests for BOI promotion should translate into corporate loans after 3-5 years of the request. Thus, we believe the consistent and higher request frequency for BOI promotion in the past three years should be positive for the backlog of corporate loans in Thailand. Thus, we believe BBL, as the major bank for corporate loans in Thailand, should be the major beneficiary of this theme.

Exhibit 8: Request for BOI promotion is at a decade high

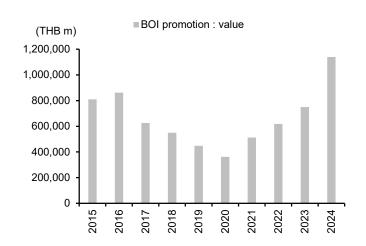

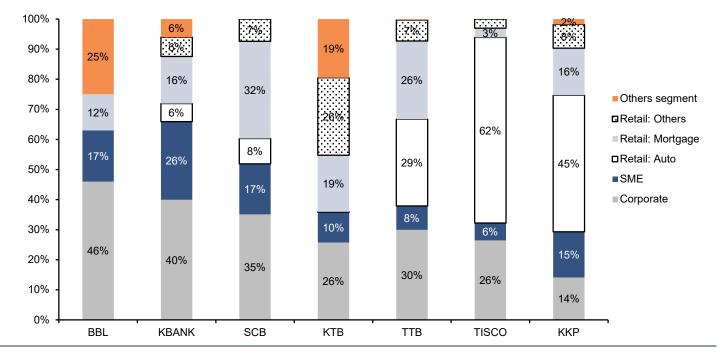

Exhibit 9: BOI promotion targeted industries

Targeted industries (12M24)	(THB m)

Resilient NIM despite negative impact from policy interest rate cut

Our BBL earnings forecast is based on one policy rate cut (-25bp) in 2025E to 2.0%. As the majority of BBL's loans are corporate loans, which are normally quoted as the floating interest rate, we have factored in the negative impact from one rate cut into our forecast already. We expect BBL's NIM to decline to 2.94% in 2025 vs 3.03% in 2024.

The resilient NIM forecast, in our view, would be supported by 1) slow deposit cost repricing from both the CASA portion (61% of total deposits with only 0.25% cost, the lowest rate in the industry) and fixed deposits (39% proportion); and 2) room to raise the loan-to-deposit ratio to 86% in 2025E vs 83-84% in 2023-24.

In the case there is a further policy interest rate cut by 25bp from our base case, our sensitivity analysis suggests that the negative impact on BBL's NIM would be around 5.6bp, with a net profit impact of 5.2% for 2025E, all else being equal.

Bangkok Bank BBL TB Nathapol Pongsukcharoenkul

Sources: Banks' company data, FSSIA estimates

Easing asset quality with room to lower credit cost to 115bp

BBL reported a large reduction in its NPL ratio to 3.19% in 4Q24 from 3.94% in 3Q24. There was a THB18b reduction in NPLs q-q in 4Q24 vs the normal reduction of cTHB9b from 3Q to 4Q in the past years. BBL disclosed that the reduction was due to the successful restructuring progress for many NPL accounts from various industries (not specific). We believe part of the NPL reduction in 4Q24 was likely from Thai Airways following the successful rehabilitation plan and ITD, which relapsed last year. We believe these major accounts were upgraded to loans under stage II (underperforming loans) from stage III (NPLs). With its easing NPL ratio in 4Q24, BBL booked a credit cost of 115bp in 4Q24, which is a benign level, in our view.

Exhibit 13: Large reduction of NPL and benign credit cost in 4Q24

Sources: BBL, FSSIA compilation

Going forward in 2025-26, we expect BBL's NPL ratio to be around 3.15% +/- which is supported by continued debt serviceability among corporate loans and a lower interest burden following one policy rate cut in 2025E. BBL's management commented that the relapse of NPLs may happen from time to time during the year. Nonetheless, BBL has not raised any concerns for specific industries and believes that overall asset quality should be controllable.

With easing asset quality conditions, we expect BBL to record lower credit costs to 115-116bp in 2025-26 vs 130bp in 2024. In addition, as of 4Q24, BBL had a high NPL coverage ratio of 334% and a high loan loss reserve to gross loans at 10.7%, which are the highest levels among Thai banks. With ample loan loss reserves, this should allow BBL to lower credit costs in 2025-26, in our view. Note that our credit cost estimates of 115-116bp are more conservative than BBL's target of 90-100bp.

Exhibit 14: Expect benign credit costs for 2025-26 ...

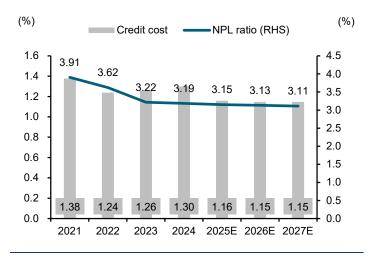

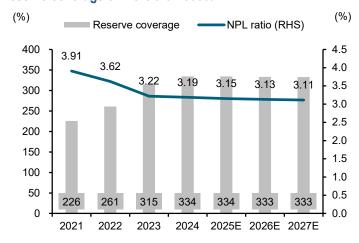

Exhibit 15: ... supported by controllable NPLs and high NPL reserve coverage of more than 300%

Need further actions for better capital management and ROE

For its 2024 financial performance, BBL has announced a dividend payout ratio of only 36%, which is the lowest level among Thai banks. Meanwhile, BBL has high capital in terms of a CET1 ratio at 17.0% and CAR ratio of 20.4%, which are much higher than the regulatory requirement of 8.0% and 12.0%, respectively.

Exhibit 16: Banks' 2024 dividend payout ratio comparison – BBL needs further action, in our view

2024A	Dividend payout ratio	Dividend yield	XD Date	ROE	CET1	CAR ratio	Comments
BBL	36%	5.7%	23-Apr-25	8.3%	17.0%	20.4%	*** Need further actions, in our view.
KBANK	46%	6.2%	17-Apr-25	8.9%	17.5%	19.6%	Raised payout from 36%, No treasury stock
SCB	80%	8.4%	16-Apr-25	9.1%	17.8%	18.9%	High payout already
КТВ	49%	6.7%	16-Apr-25	10.4%	18.8%	20.8%	Raised payout ratio from 33%, positive surprise
ТТВ	60%	6.8%	25-Apr-25	9.0%	16.9%	19.3%	Treasury stock during 2025- 27E
TISCO	90%	7.8%	25-Apr-25	16.1%	17.0%	18.6%	High payout already
KKP	68%	7.1%	2-May-25	8.1%	13.1%	16.6%	Raised payout ratio for capital optimization, positive surprise

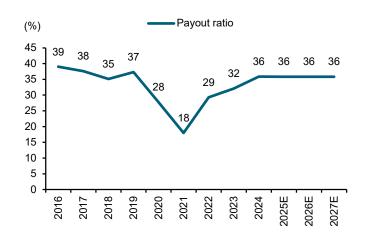

Sources: Banks' company data, FSSIA compilation

With a low dividend payout ratio, this is not supportive of BBL's ROE generation at only 8.3% in 2024 and implies the need for further actions for better capital management, in our view. Arguably, BBL sees high demand for corporate loans and has decided to keep its high capital ratio for loan growth in the future. Nonetheless, we believe the capital ratio is quite sufficient and should follow its peers for better capital management as well as ROE.

BBL mentioned that the bank aims for double-digit ROE but has not provided specific details, including a target timeline or better capital management. This stance is different from peers like KBANK, SCB, and TTB.

We conservatively project BBL's dividend payout ratio to be 36% for 2025-26. With this low payout ratio, we expect ROE to be around 8.3% during the same period. Assuming a higher dividend payout ratio to 45% from 36%, our calculation suggests higher ROE from our base forecast by 20bp, and thus should translate into a positive catalyst, in our view.

FSSIA ESG rating ★ ★ ★ ★

Exhibit 22: FSSIA ESG score implication

62.41 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
***	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 04-Mar-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
