EQUITY RESEARCH - ANALYST MEETING

Flattish 1Q25 presales

TARGET PRICE THB18.00 **CLOSE** THB16.20 **UP/DOWNSIDE** +11.1% **TP vs CONSENSUS** -7.9%

UNCHANGED

Highlights

- We have a neutral view of SPALI's 1Q25 presales of THB6.7b (flat qq, -4% y-y), comprising 71% low-rise and 29% condo.
- Low-rise presales stood at THB4.7b (+69% q-q, -9% y-y) as SPALI introduced six low-rise projects with a combined value of THB7.2b. Three (THB4.5b) were in Bangkok, while the remaining three (THB2.7b) were in Hat Yai, Chiang Rai and Phuket.
- The highlight was Supalai Pride Phuket Monument-Paklok (THB1.8b), a new low-rise project in Phuket. It had a favorable response, with a 30% take-up rate.
- Condo presales equaled THB1.9b in 1Q25, dropping 50% q-q due to no new launch but rising 12% y-y, driven by a new condo launched in 4Q24 and the progress of inventory sales.
- As a result, 1Q25 presales secured 21% of the full-year target of THB32b (+20% y-y).

Outlook

- Preliminarily, we project 1Q25 profit to grow y-y from the low base in 1Q24. However, it should drop q-q due to seasonality, fewer new launches, and aggressive transfers before property stimulus measures ended.
- After the earthquake stabilized, the management promptly inspected its projects. They confirmed that all building structures remain strong and safe. The damages identified were related to architectural elements, for which insurance would cover repair and restoration expenses. Although structural inspections and operations may incur costs, they should not be significant.
- We will closely monitor presales following the earthquake. The property market might be sluggish in the short term, especially for condos, and demand might shift toward low-rise projects. However, we expect confidence to be restored by 3Q25.
- Our current 2025 forecast calls for a net profit of THB5.5b (-6% y-y), based on a transfer assumption of THB29b (-5% y-y), comprising 76% low-rise and 24% condo. Note the current backlog is enough to secure 26% of our condo transfer estimate. Assuming that SPALI's condo transfers decrease by 30% (similar to the decline in low-rise presales in 4Q11-3Q12 during floods), this implies a 10% downside to our 2025E earnings.

Supalai PCL (SPALI TB)

Exhibit 7: FSSIA ESG score implication

59.80 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 03-Apr-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
