Thailand Foods

ราคาเนื้อสัตว์น่าจะยังดีอย่างน้อยจนถึง 3Q25

- คาดกำไร 1Q25 ของกลุ่มเนื้อสัตว์จะออกมาสดใส (+47% q-q, +466% y-y) จากราคาเนื้อสัตว์ที่ดีกว่าคาดซึ่งทำให้เราปรับเพิ่มประมาณการกำไรสุทธิปี 2025 ของเราขึ้น 45% เป็นโต 16%
- ภาษีนำเข้าของสหรัฐฯ ไม่กระทบกลุ่มเนื้อสัตว์โดยตรงแต่การนำเข้าหมูจากสหรัฐฯ อาจสร้างบรรยากาศเชิงลบ แม้ว่าความเป็นไปได้จะมีต่ำเรายังจำเป็นต้องจับตาดูในอนาคต
- ปรับเพิ่มน้ำหนักเป็นมากกว่าตลาดโดยมี BTG เป็นหุ้นเด่น

ราคาหมูใน 1H25 ดีกว่าคาด

ราคาเนื้อสัตว์ฟื้นตัวดีกว่าคาด YTD ทั้งนี้ราคาหมูเฉลี่ยในช่วงดังกล่าวอยู่ที่ 80-82 บาท/กก. (+19% y-y) ในไทยและ VND65,000/กก. (+22% y-y) ในเวียดนามโดยได้ปัจจัยผลักดันจากอุปทานที่ลดลงจากปัญหาโรคระบาดและความเสียหายจากน้ำท่วมใน 4Q24 ในขณะที่ราคาไก่ไทยยังทรงตัวอยู่ที่ 40 บาท/กก. ราคาหมูจีนกลับยังไม่ฟื้นตัวและอยู่ต่ำกว่าที่เราคาดซึ่งทำให้เราปรับสมมติฐานราคาหมูในปี 2025 ของเราโดยปรับขึ้น 7% ในไทยและปรับลด 3% ในจีน แม้ว่าต้นทุนวัตถุดิบจะยังทรงตัวในระดับต่ำ เราปรับลดสมมติฐานราคากากถั่วเหลืองลง 18% แต่ปรับเพิ่มประมาณการราคาข้าวโพดขึ้น 5% ทั้งหมดทำให้เราปรับเพิ่มประมาณการกำไรสุทธิปี 2025 ของกลุ่มเนื้อสัตว์ขึ้น 45% เป็นโต 16% y-y นำโดย BTG (+62% y-y) TFG (+33%) และ CPF (+12%) ในขณะที่ประมาณการตัวเลขการเติบโตของเราสำหรับ GFPT ยังคงเดิมที่ 24% y-y

มีข่าวว่ารัฐบาลได้ตัดสินใจไม่นำเข้าหมูหรือเครื่องในสัตว์

การขึ้นภาษีนำเข้าของสหรัฐฯ ไม่กระทบกลุ่มเนื้อสัตว์โดยตรงเนื่องจากสหรัฐฯ ไม่ได้เป็นคู่ค้าหรือคู่แข่งของผลิตภัณฑ์เนื้อสัตว์ไทย อย่างไรก็ตามส่วนหนึ่งของการเจรจาการค้าระหว่างไทย - สหรัฐฯ ที่กำลังดำเนินอยู่เกี่ยวข้องกับการนำเข้าสินค้าเกษตรเพิ่มเติมจากสหรัฐฯ ถ้าสินค้านี้กลายเป็นข้าวโพดหรือกากถั่วเหลือง กรณีดังกล่าวจะเป็นประโยชน์ต่อเกษตรกรที่เพาะปลูก อย่างไรก็ตามการนำเข้าหมูจากสหรัฐฯ กรณีดังกล่าวอาจส่งผลกระทบต่อราคาหมูในประเทศ ทั้งนี้ CPF BTG และ TFG ได้รับประมาณ 17% ของรายได้รวมจากธุรกิจหมูไทย จากการศึกษาความเป็นไปได้เราพบว่าถ้าราคาหมูไทยลดลง 10% จะกระทบกำไรสุทธิประมาณ 5% อย่างไรก็ตามเราเชื่อว่าความเป็นไปได้มีต่ำเนื่องจากมีการใช้ Ractopamine ในหมูจากสหรัฐฯ ซึ่งเป็นสารต้องห้ามในไทยและมีการคัดค้านอย่างรุนแรงจากเกษตรกรผู้เลี้ยงหมู ในส่วนของการนำเข้าเครื่องในสัตว์เพื่อผลิตอาหารสัตว์เลี้ยง ถ้ามีการควบคุมอย่างเหมาะสมและใช้ต้องตรงตามวัตถุประสงค์ ปัจจัยดังกล่าวน่าจะไม่มีผลกระทบต่อราคาหมูไทย อย่างไรก็ตามมีข่าวเมื่อวันที่ 12 เม.ย. 25 ว่ารัฐบาลได้ตัดสินใจไม่นำเข้าหมูหรือเครื่องในจากต่างประเทศ

เพิ่มน้ำหนักเป็นมากกว่าตลาด

จากราคาเนื้อสัตว์ที่ดีเกินคาดและแนวโน้มกำไรที่อยู่ในเกณฑ์ดีใน 1H25 (ซึ่งอาจต่อเนื่องไปใน 3Q25) เราแนะนำซื้อหุ้นทั้ง 4 บริษัทในกลุ่มฯ โดยมี BTG เป็นหุ้นเด่นของเราจากเหตุผล 5 ประการประกอบด้วย 1) การเติบโตของกำไรปี 2025 ซึ่งคาดว่าจะสูงที่สุด 2) สถานะทางการเงินที่อยู่ในเกณฑ์ดีโดยมีสัดส่วนหนี้ต่อส่วนผู้ถือหุ้นและหนี้ต่อส่วนผู้ถือหุ้นที่ 1.25x และ 0.75x ตามลำดับ 3) การได้เข้า the SET ESG Index เป็นครั้งแรกด้วยอันดับความน่าเชื่อถือสูงที่สุดที่ AAA 4) ราคาที่เคลื่อนไหวต่ำกว่ากลุ่มฯ โดยมีผลตอบแทน -21.7% ในปี 2024 และ -1.1% YTD และ 5) Valuation ในระดับที่น่าสนใจโดยมีการซื้อขายในปัจจุบันที่ 9.3x P/E ต่ำกว่าค่าเฉลี่ยในอดีต

Meat sector's 1Q25 profit would be higher than previously expected

We expect 1Q25 net profit of the meat sector at THB 9.4b (+47% q-q, +466% y-y), supported by higher meat prices, led by Thai swine (+12% q-q, +19% y-y), Vietnam swine (+8% q-q, +22% y-y), and Thai chicken (+6% q-q, -1% y-y). Meanwhile, the average price of raw materials remains low or slightly decreased. In particular, soybean meal dropped 11% q-q and 24% y-y, while corn increased 9% q-q and flat y-y. Therefore, we expect both revenue and gross margins to grow in 1Q25.

Although 1Q25 average Chinese swine price declined by 9.2% q-q and flat y-y, which may affect CPF's business in this segment, we believe it will not result in significant losses since raw material prices are also decreasing. In addition, CPF's strong operations in Thailand and Vietnam will help support growth. Therefore, we expect CPF's 1Q25 profit to continue growing.

Although BTG does not have operations in Vietnam, its business in Thailand remains strong and will start recognizing income from its Singapore egg business. It would help boost the 1Q25 profit to reach THB1.2b, setting a new high for the past nine quarters.

TFG looks the strongest in the group for 1Q25 performance because it does not have operations in China. Meanwhile, its businesses in Thailand and Vietnam continued to recover well, and the retail shop segment would contribute to growth. Therefore, we expect TFG's 1Q25 net profit to exceed THB1.2b as well.

Finally, although GFPT does not have a swine business, it has been benefiting from recoveries in live chicken and chicken carcass prices since January. Aside from that, raw material prices have slightly decreased, and we expect its profit sharing from McKey and GFN to recover strongly q-q since they should not have significant one-time expenses like in 4Q24. Thus, we expect GFPT's 1Q25 profit to rebound sharply q-q and remain stable or slightly increase y-y, despite a relatively high base last year.

Assuming in-line 1Q25 results, it will account for 39% of our previous 2025 estimate. As a result, we have increased our profit forecast for the meat sector in this report.

Exhibit 1: Meat sector – 1Q25 earnings preview

Expect 2025 Thai swine production to decrease y-y

The Office of Agricultural Economics (OAE) forecast that Thai swine production in 2025 would total 21.37 million head, dropping 1.6% y-y from 21.72 million head in 2024. Reducing the production capacity of major producers by lowering the number of breeding sows should contribute to the weakness. However, after further investigation and data tracking, it appears that part of the decrease in production should also come from disease outbreaks and flooding in 4Q24, which caused some damage to production. Currently, farmers have returned to maintaining the usual number of breeding sows.

Since the fattening period for swine takes about 180 days, we assume that Thai swine prices will remain stable at a high level of THB80-82/kg during 1H25. After that, we will monitor the production entering the market and consumer demand.

However, we have increased our 2025 Thai swine price assumption by 7% to THB75/kg from the previous THB70/kg, based on the current price of THB80/kg. We maintain a conservative view on swine prices in 2H25. This price assumption remains below the outlook of operators such as CPF, BTG, and TFG, who estimate that the average swine price in 2025 will not fall below THB80/kg.

No impact from the Earthquake in Myanmar

All four companies in the meat sector have no livestock farms or production bases in Myanmar. Their factories in Thailand are safe, undamaged, and continue to operate as usual. The proportion of export revenue to Myanmar is relatively small, with none of the companies in the group earning more than 1% of their total revenue from Myanmar. Therefore, we conclude that the earthquake in Myanmar does not affect the meat group.

Thailand and U.S. are not major trading partners in the meat product sector

Thailand ranks as the 7th largest chicken producer, accounting for 3.4% of global chicken production, and the 4th largest chicken exporter, with 8.5% of global chicken exports. Thailand's crucial markets are Japan (40% of Thai chicken export value in 2024), the UK (17%), the EU (14%), and China (9%).

However, Thailand's pork exports are relatively small at only about 7,000 tonnes/yr, just 0.4% of the country's total pork production. Thai pork exports are mainly processed and chilled pork (70:30), with an annual export value of only THB1.2b and major markets including Japan, China, Cambodia, and Myanmar.

Meanwhile, the U.S. is one of the world's largest chicken and pork producers—much larger than Thailand. It is the world's top pork exporter, accounting for 32% of global pork exports, followed by the EU (29%), Brazil (14%), and Canada (14%). The U.S. also ranks first in global chicken production, accounting for 21% of global output. However, it consumes around 86% domestically, leaving only 14% for export.

We can conclude that the U.S. is neither a key competitor nor a major trading partner of Thailand in the meat export market. However, in recent years, the U.S. has attempted to negotiate with Thailand to allow imports of U.S. pork. These efforts have faced legal restrictions due to Thailand's ban on ractopamine, a feed additive commonly used in U.S. pork production, actively supported by Thai swine farmers and consumers.

Exhibit 16: Thai pork import and % to total production

Sources: OAE, FSSIA's compilation

The issue of pork imports from U.S. has created a negative sentiment, but the likelihood is low.

Under the Trump 2.0 administration, there has been an increase in trade tariffs on many countries worldwide, including Thailand, which faced an import tariff from the U.S. as high as 37% (announced on 2 April 2025). However, it does not affect the meat sector since most companies in the group (CPF, BTG, TFG, GFPT) hardly export to the US—except for CPF, which exports aquatic products to the U.S., accounting for only 0.3% of its total revenue.

Subsequently, on 9 April 2025, Trump announced a reduction in import tariffs to 10% and postponed further tariff increases for 90 days for countries (initially around 75) that did not retaliate and instead sent representatives to negotiate with the U.S. Thailand should meet these conditions and benefit from the postponement.

Nevertheless, Thailand has begun exploring trade negotiations to address the tariff issue. One approach under consideration is increasing imports from the U.S., including agricultural products (such as feed corn or soybeans), pork offal, and energy products. If an agreement is reached to import feed corn from the U.S., it would be a positive development for the meat sector. Thailand has an annual corn production of c5 million and an annual demand of c9 million tonnes, creating a shortfall, partially met through imports from Myanmar and alternative ingredients like wheat.

The U.S. is the world’s top corn producer and exporter, accounting for 31% of global production and exports. CPF’s management has indicated that the cost of corn imported from the U.S. is currently about THB1/kg cheaper than domestic produce.

Exhibit 17: Thai corn production and consumption

Sources: OAE, USDA, FSSIA's compilation

Exhibit 20: Major global corn exporter in 2024/25

Sources: OAE, USDA, FSSIA's compilation

Thailand produces very little soybeans annually at only 18,500 tonnes, just 0.5% of annual demand. Therefore, it primarily relies on imports, bringing in as much as 3.7 million tonnes each year, mostly from Brazil, Argentina, and the U.S.—the top three global soybean producers and exporters, which together account for c80% of global soybean output.

Exhibit 21: Thai soybean production and consumption

Exhibit 24: Major global soybean meal producers in 2024/25

Sources: USDA, FSSIA’s compilation

Finally, the issue of importing pork from the U.S.—if it were to materialize—would negatively impact Thailand’s domestic swine farming industry. U.S. farm-gate swine prices are currently at USD0.88/pound, or roughly THB66.5/kg (based on an exchange rate of THB34/USD), which is lower than Thai farm-gate swine prices of THB80–82/kg. Even when factoring in shipping costs, U.S. pork could still be cheaper, increasing pork supply in Thailand and potentially pushing domestic prices down, creating tougher competition for Thai swine farmers.

Exhibit 25: U.S. daily average price of slaughtered swine

(USD/pound)

Sources: Bloomberg, FSSIA's compilation

Regarding the issue of allowing pork offal imports for use in pet food – although this may have less impact on overall pork or pork part prices and the domestic supply of offal is currently insufficient to meet consumption demand, if imports exceed domestic demand or if there is a failure to ensure that they are used exclusively for pet food, it could still lead to a decline in pork prices.

According to FSSIA, if U.S. pork imports cause Thai swine prices to drop by 10% to THB68/kg from our current assumption of THB75/kg, it could impact the net profit of the meat sector (CPF, BTG, TFG) by c5%.

However, the risk of U.S. pork imports remains low due to the need to amend the laws that ban ractopamine, a feed additive used in U.S. pork production. Any policy shift would impact many stakeholders—including large, medium, and small-scale farmers, as well as consumers. Although there was news on 12 April 25 that the government has decided not to import pork or offal, this issue requires ongoing monitoring.

Exhibit 26: Impact on 2025E net profit in the case of a 10% decrease in Thai swine price

	----- 2025E Thai swine contribution -----		----- 2025E Thai swine price -----		Impact to 2025E NP After swine price -10%	----- 2025 Target price -----	
	to farm and food revenue (%)	to total revenue (%)	FSSIA's assumption (THB/kg)	decrease by 10% (THB/kg)		Current (THB)	After swine price -10% (THB)

Total			75	68	(5.0)		

Source: FSSIA estimates

Raise 2025 profit forecast for meat sector by 45%

We still have a positive outlook for 2Q25. It should remain bright q-q, supported by consistently high meat prices in April. In particular, Thai swine prices climbed to THB86/kg, while Thai chicken remained stable at THB40/kg. Although Vietnam swine prices slightly declined q-q, they were still high at VND65,000–68,000/kg, while Chinese swine prices remained low, staying at the breakeven cost of production.

However, CPF management indicated that Chinese swine prices may rebound toward the end of 2Q25 as raw material costs in China have started to rise—possibly linked to ongoing trade tensions with the U.S. If this price increase materializes, it would be a positive for CPF's performance. Currently, we use a conservative assumption for Chinese swine prices at RMB15.5/kg (revised down from RMB16/kg), with an expected recovery in 2H25.

Similarly, we maintain our assumptions for Vietnam swine at VND60,000/kg and Thai chicken at THB40/kg. However, we have increased our Thai pork price assumption to THB75/kg. This leads to a 45% upward revision in our 2025E net profit for the meat sector to THB31.6b (+16% y-y), led by CPF (+56%), BTG: (+44%), and TFG (+24%). We maintain our forecast for GFPT at THB1.56b (-24% y-y), as there is no strong price catalyst for chicken in 2025 compared to swine.

After the revisions, we project BTG's 2025 net profit to post the highest growth in the group at 62% y-y, followed by TFG at 33% y-y, and CPF at 12% y-y. GFPT is the only one we expect to see a profit decline due to the high base in 2024.

Upgrade meat sector to overweight, with BTG as our top pick

We have upgraded our rating of the meat sector to Overweight, supported by strong meat prices and solid profit momentum in 1H25, which may carry through to 3Q25. As a result, we have raised our 2025 target price for meat producers as follows: CPF-raised to THB30 (from THB28), BTG-raised to THB27 (from THB24), TFG-raised to THB5.3 (from THB4.10), and GFPT-maintained at THB12.5

We assign a target PE of 12–13x for CPF and BTG, higher than GFPT at 10x and TFG at 8.5x, which remains the lowest in the group due to ongoing concerns about the high proportion of shares used as margin collateral—around 43% of total shares. However, management is gradually reducing this ratio, which is a positive signal worth monitoring.

We also maintain a positive ESG outlook for the meat sector. According to FSSIA's ESG scoring:

- CPF scores the highest at 80.1
- BTG at 59.71
- GFPT at 40.94
- TFG has the lowest score at 35.1

The SET recently released its 2024 ESG ratings, with BTG being selected for the first time, receiving an AAA rating equal to CPF. TFG had its rating upgraded to AA (from A), while the SET removed GFPT from its ESG list due to issues with public ESG disclosure. However, we believe that GFPT will keep addressing this and requalify in the next round.

Although we recommend BUY on all four companies in the meat sector, we select BTG as our top pick, based on the following reasons:

1. Strongest expected 2025 net profit growth in the meat sector at 62% y-y.
2. Strong financial position, with estimated end-2025 D/E and IBD/E ratios at 1.25x and 0.75x, respectively — the lowest in the group after GFPT.
3. Inclusion in the SET ESG Index for the first time with the highest AAA rating
4. Underperforming stock within the sector, with a return of -21.7% in 2024 and -1.1% YTD.
5. Attractive valuation, currently trading at a 2025E P/E of 9.3x, below its historical average.

We believe BTG offers the best risk-reward profile in the sector at this point.

BETAGRO BTG TB

THAILAND / FOOD & BEVERAGE

FINANSIA
 FSS INTERNATIONAL INVESTMENT ADVISORY

FSSIA ESG rating

BUY

UNCHANGED

TARGET PRICE	THB27.00
CLOSE	THB18.90
UP/DOWNSIDE	+42.9%
PRIOR TP	THB24.00
CHANGE IN TP	+12.5%
TP vs CONSENSUS	+13.2%

So far so good

- 1Q25 profit outlook is strong and could account for 40% of our previous full-year forecast.
- The overall meat prices have remained strong in 2Q25, both in Thailand and Cambodia.
- Revising up our 2025E profit to grow 62% y-y and TP to THB27

Expect strong profit in 1Q25 due to higher meat prices

We initially expect a 1Q25 net profit of THB1.25b (+26% q-q, a reversal from a loss in 1Q24), driven by higher meat prices, led by Thai swine (+12% q-q, +19% y-y), Thai chicken (+6% q-q, -1% y-y), and Cambodian swine (+6% q-q, +30% y-y). Meanwhile, raw material prices remain low, so we anticipate growth in both revenue and the gross margin, which should continue to improve from 4Q24. There is a high chance of exceeding the upper range of BTG's target of 15%. Assuming an in-line 1Q25 profit, it would account for nearly half of our previous profit forecast.

2Q25 meat prices remain strong

The overall meat prices have remained strong in 2Q25, both in Thailand and Cambodia. The Thai swine price in April has continued to rise to THB86/kg (+6% m-m, +9% q-q), while Thai chicken remains high at THB40/kg and soybean meal prices have continued to decrease to THB15.2/kg (-9% q-q). As the export season begins, BTG has already pre-sold chicken for export, covering 3Q25, with an export revenue growth target of no less than 15% y-y for 2025. In addition, there has been an expansion of higher-value and lower-volatility channels, such as food services, both in Thailand and abroad.

Revising up 2025E net profit to grow 62% y-y

We have raised our 2025-27E net profit by 44-47% to grow by 62%/6%/7%, respectively. We have revised our 2025 average Thai swine price assumption to THB75/kg (from THB70/kg) and Cambodian swine to KHR9,000/kg (from KHR8,400/kg), while also increasing our gross margin estimate to 14.5% from 13.2%, reflecting the higher-than-expected meat prices and overall costs remaining low. The new gross margin assumption is still within management's conservative target range of 13.5-15%.

Maintain BUY with a higher TP to THB27

We raise our TP to THB27 (from THB24), based on a P/E of 13x (in line with the historical average). The current stock price is trading at just 10x 2025E P/E, while meat prices and profits remain strong. Moreover, with no export revenue from the US, BTG is unaffected by US tariffs. Although news of pork imports from the US might negatively impact stock sentiment, we believe the likelihood of this happening is quite low.

Investment thesis

BTG operates a fully integrated food business covering the entire production chain from upstream, mid-stream to downstream. Its production and distribution bases are located in every region of Thailand, and it exports its products to overseas markets. BTG also produces in neighboring countries such as Cambodia, Laos, and Myanmar.

The company has diversified to six distribution channels which consist of Betagro branches, modern trade, traditional trade, food services, industrial customers (OEM business), and the export market (more than 20 countries). The company has strong brand recognition under the well-known BETAGRO brand, S-Pure for hygienic fresh meat, Perfecta, etc.

Company profile

Established in 1967 and listed on the SET in 2022, BTG operates a full range of agro-industry businesses from upstream animal feed, pig and chicken farms, animal health products and supplements, meat processing, and food production to pet products. At the end of 2024, BTG generated revenue from Food & Protein (64.3% of total revenue), followed by Agro (28.6%), International (5.3%) and Pets (1.9%).

Catalysts

Potential catalysts for BTG’s 2025 earnings growth are 1) sales volume growth in line with a purchasing power and tourism recovery; 2) meat price increases; 3) flat or declining feed costs; and 4) an international business recovery.

Risks to our call

Downside risks to our P/E-based TP include 1) a slower-than-expected purchasing power recovery; 2) a slower-than-expected meat price increase; 3) a slower-than-expected decrease in feed costs; and 4) a stronger-than-expected THB.

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2025 net profit to rise by 3.1%, and vice versa, all else being equal.
- For every 0.1% increase in GPM, we estimate 2025 net profit to rise by 4.2%, and vice versa, all else being equal.
- For every 0.1% increase in SG&A to sales, we estimate 2025 net profit to fall by 2.9%, and vice versa, all else being equal.

FSSIA ESG rating

Exhibit 72: FSSIA ESG score implication

59.71 /100

Rating	Score	Implication
★★★★★	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
★★★★★	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
★★★	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
★★	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
★	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

TFG TB

BUY

UNCHANGED

Bright outlook for all businesses

- Expect 1Q25 net profit to jump by 45% q-q and 612% y-y, due to higher meat prices and lower raw material prices.
- Management targets 2025 revenue growth of 10-15% y-y, supported by strong sales volumes and positive meat price outlook.
- Maintain BUY with higher TP to THB5.3 and high dividend yield

Aiming for strong growth in volumes and meat prices

Management targets 2025 revenue growth of 10-15% y-y, driven by the retail shop business, with a target of 50% growth through plans to open 200 new branches, achieving SSSG of 15% y-y. In addition, the goal is to increase swine and chicken sales volumes by 25% and 5% y-y, respectively. They project the 2025 average meat price outlook to remain positive throughout the year, with Thai swine prices staying above THB80/kg (+15% y-y), Thai chicken prices stable at THB40-42/kg, and Vietnam swine at VND65,000/kg (+9% y-y). On the cost side, raw material prices are expected to decrease by 5% y-y, and if raw materials are imported from the US, it will be even more positive for the cost of livestock farming.

Higher meat prices support growth in 1Q25

We expect 1Q25 net profit to grow strongly by 45% q-q and 612% y-y, driven by higher meat prices. Thai swine (+12% q-q, +19% y-y) and Vietnam swine (+8% q-q, +22% y-y) prices have risen significantly. TFG does not have operations in China, and overall raw material costs are still soft, which should support a continued improvement in gross margins. In addition, the full-quarter recognition of revenue from Thai Foods Fresh Market's new branches in 4Q24 should offset the negative impact from the GMT, leading to a net profit increase to cTHB1.2b in 1Q25.

Revising up our 2025-27 net profit forecast

Given the continued strength in Thai and Vietnam swine prices, TFG's profit outlook should remain positive in 2Q25. As a result, we have raised our 2025-27E net profit by 17-24%, expecting growth of 33%/6%/4%, respectively. Assuming in-line 1Q25 results, it would account for 30% of our full-year estimate, indicating that our new profit estimate remains conservative. Since TFG has no export revenue from the US, it is not directly impacted by US tariffs. Despite the negative sentiment surrounding pork imports from the US, we believe the risk of such events occurring is relatively low.

Maintain BUY with higher TP to THB5.3

We raise our TP to THB5.3 (from THB4.1), maintaining a target P/E of 8.5x. While we are positive on the SET ESG rating of AA, we remain cautious about the high proportion of shares used as collateral for margin accounts, which stands at about 43.8% of total shares (as of February 2025). However, management is aware of the market's concerns and is gradually reducing this proportion in the future. We maintain BUY, as the stock currently trades at a 2025E P/E of only 7.6x, with an expected annual dividend yield of c8%.

Investment thesis

TFG is one of Thailand's top three chicken processors and live pig farmers, with a daily production capacity of 500,000 chickens and a monthly supply of over 100,000 hogs.

We maintain a conservative outlook on meat prices in 2025 due to increased production volumes and the continuous decline in raw material prices, meaning that any price increases will largely depend on demand. However, we expect that the expansion of branches and revenue for Thai Foods Fresh Market will help reduce the volatility of the upstream business' performance, and this should become more beneficial in the future.

Company profile

Thai Food Group (TFG) was established in 1987 by Mr. Winai Teawsomboonkij, who currently serves as CEO. It started from a chicken farm in Lopburi before expanding to a vertically integrated food producer specializing in chicken and swine production, with operations in Thailand and Vietnam. Also, it expanded more into downstream businesses by entering the retail market through retail shops. In 2024, the revenue mix from poultry, swine, retail, and feed was 27%/21%/37%/15%, respectively.

www.tfg.co.th

Principal activities (revenue, 2024)

Major shareholders

Catalysts

Potential catalysts for TFG’s earnings growth in 2025 are 1) revenue growth driven by sales volumes; 2) higher-than-expected meat prices; 3) declining raw material costs; and 4) its new Thai Foods Fresh Market store expansion.

Risks to our call

Downside and upside risks to our P/E-based TP are 1) a slower or faster-than-expected consumption recovery; 2) a slower or faster-than-expected decrease in feed costs; 3) a stronger or weaker-than-expected THB.

Thai Foods Group PCL (TFG TB)

FSSIA ESG rating

n/a

Exhibit 89: FSSIA ESG score implication

Rating	Score	Implication
★★★★★	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
★★★★★	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
★★★★	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
★★★	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
★	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

EQUITY RESEARCH - COMPANY REPORT

CHAROEN POKPHAND FOODS

THAILAND / FOOD & BEVERAGE

This report is being republished for reference purposes. No changes have been made to the report from its original date of publication.

1H profit likely better than thought

- 1Q25 net profit recovery should be higher than previously anticipated.
- The direct impact of US tariffs should be limited, but CPF remains focused on its cautious strategy within the global economic volatility.
- Raise 2025E profit to grow 12% v-v and new TP to THB30.

Thailand and Vietnam to support 1Q25 profit

We expect a 1Q25 net profit of THB6.5b (+57% q-q, +5.7x y-y), showing a higher recovery than previously forecasted. Given persistently weak Chinese swine prices, the average in 1Q25 was only RMB15/kg (-9.2% q-q, flat y-y). However, the increase in Thai swine prices (+12% q-q, +19% y-y), Thai chicken (+6% q-q, -1% y-y), and Vietnam swine (+8% q-q, +22% y-y) should help offset it. With consistently stable overall demand and no significant improvement, we project 1Q25 total revenue to grow by 1% q-q and 7% y-y.

Higher meat and lower raw material prices

We anticipate 1Q25 gross margin to remain strong at 15.9%, up from 15.7% in 4Q24 and 12% in 1Q24. The main drivers should come from 1) higher meat prices, 2) lower raw material costs, and 3) positive results from continuous production efficiency improvements, which began showing benefits last year. In addition, they should also help SG&A expenses, keeping them under control. However, we project profit sharing to drop q-q, particularly from the Chinese swine business and CPALL following a weak season.

The direct impact of US tariffs should be limited

CPF operates production facilities in 17 countries worldwide, many of which face US tariffs, including Thailand. However, exports to the US from Thailand represent only 0.3% of total revenue. Most of its overseas business involves production and sales in those countries, with minimal exports to the US. Despite that, CPF has adopted a more cautious strategy, given the global economic volatility from Trump's tariffs, focusing on liquidity management within the organization. We view this strategy positively.

Increase 2025E net profit and TP to THB30

We have raised our 2025E net profit to THB21.9b (+11.7% y-y) from THB14b. Assuming an in-line 1Q25 profit, it accounts for 30% of our full-year forecast. Although our new profit estimate remains conservative, we maintain a cautious view for 2H25, especially regarding global economic volatility. We have also increased our TP to THB 30 (based on a 12x PE target). Regarding potential US pork imports, we believe the likelihood of this happening is very low. Instead, it is more likely that Thailand will allow imports of corn and soybeans from the US, which would be positive for the meat sector.

Investment thesis

CPF operates an integrated agro-industrial and food business under its “Kitchen of the World” vision for sustainable growth. The company owns production bases through investments and joint ventures in 17 countries and exports to over 50 countries. Since CPF starts from upstream, especially farming, which is highly volatile in line with meat prices and feed costs, its annual performance fluctuates sharply. CPF reported a significant turnaround in profit in 2024. Meanwhile, we have a more optimistic outlook for the 2025 meat price trend due to robust meat price recoveries in Thailand and Vietnam in 1Q25. In addition, CPF’s management guided that Chinese swine prices may recover from 2Q25 onward due to stronger demand.

Company profile

Established in 1978 and listed on the Stock Exchange of Thailand in 1987, CPF operates a vertically integrated agro-industrial and food business, from upstream to downstream, covering livestock and aquaculture such as swine, broilers, layers, ducks, shrimp, and fish. As of end-2024, CPF generated revenue from three units, namely Feed, Farm, and Food, with a revenue mix of 23%/55%/22%, respectively.

Catalysts

Potential drivers for CPF’s earnings growth in 2025 are 1) sales volume growth after demand increases; 2) higher meat prices; 3) flat or declining feed costs; and 4) a better-than-expected recovery of overseas associates and subsidiaries.

Risks to our call

Downside risks to our P/E-based TP include 1) slow purchasing power, 2) a slower-than-expected meat price recovery, 3) higher feed costs, 4) Baht strength, and 5) a minimum wage increase and labor shortages.

Earnings sensitivity

- For every 1% increase in 2025 revenue, we estimate net profit to rise by 4%, and vice versa, all else being equal.
- For every 0.1% increase in 2025 GPM, we estimate net profit to rise by 3.5%, and vice versa, all else being equal.
- For every 0.1% increase in 2025 SG&A to sales, we estimate net profit to fall by 4.4%, and vice versa, all else being equal.

FSSIA ESG rating

Exhibit 110: FSSIA ESG score implication

80.10 /100

Rating	Score	Implication
★★★★★	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
★★★★	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
★★★	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
★★	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
★	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

TP vs CONSENSUS	+1.6%

Stock price is undervalued

- GFPT's share price has dropped by 20% in the past two months, and is trading at a 2025E P/E of only 6.6x.
- We expect 1Q25 profit to rebound strongly q-q.
- There are several positive factors – good chicken prices, lower raw material prices, and the recovery of profit sharing.

Valuation has become very low – the lowest in the meat sector

GFPT's stock price has decreased by 20% over the past two months due to the slowdown in 4Q24 earnings and the failure to be selected for the SET ESG index in 2024. This has resulted in the stock currently trading at a 2025E P/E of only 6.6x, calculated based on our rather conservative EPS forecast. This represents the lowest valuation in the meat sector and is too low for GFPT compared to its historical average P/E of 15x. In the short term, we project 1Q25 profit to recover strongly, driven by higher domestic chicken prices and a return to normal profit-sharing from joint ventures. We also expect strong earnings in 2Q25 because the current chicken prices remain favorable and the export season is beginning.

Expect 1Q25 profit to rebound strongly q-q

We forecast a 1Q25 net profit of THB464m (+21% q-q, flat y-y) on higher domestic chicken prices since January. The average live chicken and chicken carcass prices have risen 7.3% q-q and 28% q-q, respectively. Meanwhile, soybean meal prices have decreased (-8.5% q-q, -21% y-y), offsetting the rise in corn prices (+9% q-q, +5.8% y-y). Thus, we expect the 1Q25 gross margin to improve to 13.7% from 12.8% in 4Q24 and 12.6% in 1Q24. We also anticipate profit-sharing from McKey to return to a normal level at THB135m from THB82m in 4Q24, along with GFN, which should report better profits from higher domestic chicken prices.

Export volumes are still in line with our assumptions

We expect the 1Q25 export volume to be 8,700 tonnes (-11% q-q), as 4Q24 exports were unusually high. However, it would increase by 5% y-y, which is a good start to the year and accounts for 24% of our 2025E export volume. The trend is likely to improve further in 2Q-3Q25, as it is the high season for exports, but we do not expect volumes to exceed those of 2Q-3Q24. Achieving similar volumes would still be an improvement over our expectations.

But the overall situation looks better than our projections

Assuming in-line results, 1Q25 earnings would account for 29.7% of our full-year estimate. The earnings outlook for 2Q25 remains positive, similar to 1Q25, due to the high chicken prices. This is a better situation than our assumptions. However, we will need to monitor chicken prices and export volumes in 2H25. For now, we maintain our 2025E net profit at THB1.56b (-21% y-y) and TP at THB12.5 (based on a P/E of 10x).

Investment thesis

GFPT is doubling the capacity of its slaughterhouse from 150,000 to 300,000 chickens per day. It should begin operating from 2H24 onward, partly to cope with the processing capacity expansion of its associate McKey. GFPT is also preparing to expand its processing plant to cope with export growth since it currently runs at a 100% utilization rate.

The situation for chicken exports in 2024 was quite positive, supporting the export volumes of GFPT and its associates, such as GFN and McKey. However, we have relatively conservative assumptions for our 2025 net profit forecast, partly because we have started seeing price decreases in live chicken and chicken carcasses. We will also need to monitor the chicken price trends.

Company profile

GFPT operates a vertical, fully integrated poultry business covering feed production, grandparent farms, breeder farms, broiler farms, the production and distribution of chicken meat, cooked chicken products, and other chicken-related products under its own and customers' brands for both domestic and export markets. In 2022, GFPT had a chicken processing capacity of 150,000 tonnes/year and a cooked chicken product capacity of 30,000 tonnes/year.

Major shareholders

Source: GFPT

Catalysts

Potential catalysts for GFPT's earnings growth in 2025 are 1) chicken export volume growth; 2) a higher-than-expected chicken price; 3) the operation of a new slaughterhouse; and 4) lower raw material costs.

Risks to our call

Downside and upside risks to our P/E-based TP include 1) a slower or faster-than-expected consumption recovery; 2) a slower or faster-than-expected decrease in feed costs; 3) a stronger or weaker-than-expected THB; and 4) a minimum wage increase and/or a labor shortage.

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2025 net profit to rise by 0.8%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2025 net profit to rise by 4.1%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A, we estimate 2025 net profit to fall by 3.8%, and vice versa, all else being equal.

GFPT (GFPT TB)

FSSIA ESG rating

40.94 /100

Exhibit 127: FSSIA ESG score implication

Rating	Score	Implication
★★★★★	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
★★★★☆	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
★★★☆☆	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
★★☆☆☆	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
★☆☆☆☆	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Disclaimer for ESG scoring

ESG score	Methodology	Rating																			
The Dow Jones Sustainability Indices (DJSI) By S&P Global	The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion.	Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe.																			
SET ESG Ratings List (SETESG) by The Stock Exchange of Thailand (SET)	SET ESG quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years.	To be eligible for SETESG inclusion , verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. SETESG Index is extended from the SET ESG Ratings companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks.																			
CG Score by Thai Institute of Directors Association (Thai IOD)	An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations.	Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%).																			
AGM level By Thai Investors Association (TIA) with support from the SEC	It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). <i>(The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)</i>	The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79.																			
Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC)	The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. <i>(Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)</i>	The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements.																			
Morningstar Sustainalytics	The Sustainalytics' ESG risk rating provides an overall company score based on an assessment of how much of a company's exposure to ESG risk is unmanaged. <i>Sources to be reviewed include corporate publications and regulatory filings, news and other media, NGO reports/websites, multi-sector information, company feedback, ESG controversies, issuer feedback on draft ESG reports, and quality & peer reviews.</i>	A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored. <table><tr><th>NEGL</th><th>Low</th><th>Medium</th><th>High</th><th>Severe</th></tr><tr><td>0-10</td><td>10-20</td><td>20-30</td><td>30-40</td><td>40+</td></tr></table>	NEGL	Low	Medium	High	Severe	0-10	10-20	20-30	30-40	40+

0-10	10-20	20-30	30-40	40+																	
ESG Book	The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis.	The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance.																			
MSCI	MSCI ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. It uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. <table><tr><td>AAA</td><td>8.571-10.000</td><td rowspan="3">Leader:</td><td rowspan="3">leading its industry in managing the most significant ESG risks and opportunities</td></tr><tr><td>AA</td><td>7.143-8.570</td></tr><tr><td>A</td><td>5.714-7.142</td></tr><tr><td>BBB</td><td>4.286-5.713</td><td rowspan="3">Average:</td><td rowspan="3">a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers</td></tr><tr><td>BB</td><td>2.857-4.285</td></tr><tr><td>B</td><td>1.429-2.856</td></tr><tr><td>CCC</td><td>0.000-1.428</td><td>Laggard:</td><td>lagging its industry based on its high exposure and failure to manage significant ESG risks</td></tr></table>	AAA	8.571-10.000	Leader:	leading its industry in managing the most significant ESG risks and opportunities	AA	7.143-8.570	A	5.714-7.142	BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers	BB	2.857-4.285	B	1.429-2.856	CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks
AAA	8.571-10.000	Leader:	leading its industry in managing the most significant ESG risks and opportunities																		
AA	7.143-8.570																				
A	5.714-7.142																				
BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers																		
BB	2.857-4.285																				
B	1.429-2.856																				
CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks																		
Moody's ESG solutions	Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term.																				
Refinitiv ESG rating	Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. <i>(Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)</i>																				
S&P Global	The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100.																				
Bloomberg	ESG Score	Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best.																			
Bloomberg	ESG Disclosure Score	Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point.																			

[Rating](#) regarding the sustainable development of Thai listed companies, both on the SET and MAI, are publicly available on the website of the Securities and Exchange Commission of Thailand (SEC). Currently, ratings available are 1) "**CG Score**"; 2) "**AGM Level**"; 3) "**Thai CAC**"; and 4) **THSI**. The ratings are updated on an annual basis. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 11-Apr-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
