Disappointing 1Q25 profit missed our estimate; company announces share buyback

Highlights

- SPALI reported a 1Q25 net profit of THB405m (-80% q-q, -34% y-y), the lowest in 12 years. It missed our estimate and the Bloomberg consensus forecast by 14% due to lower-than-expected other income.
- Transfers dropped to THB3.5b (-60% q-q, -21% y-y), the lowest in 18 quarters, split 66:34 between low-rise and condos. Low-rise transfers plunged 64% q-q and 33% y-y to THB2.3b, pressured by sluggish presales and fewer new launches. Meanwhile, condo transfers came in at THB1.2b, down 48% q-q due to no newly built condos, but up 16% y-y from the continuous realization of new condos last year.
- The 1Q25 property gross margin improved to 38.8%, up from 38% in 4Q24 and 36% in 1Q24, supported by the increasing proportion of condo transfers, which had a higher margin than low-rise projects.
- SG&A to sales increased to 23.9% from 13.5% in 4Q24 and 17.1% in 1Q24 due to a greater drop in revenue, while financing costs were slightly down 7% q-q, but up 31% y-y to THB189m following the interest rate hikes.
- Share of profits from its JVs in Australia jumped to THB132m in 1Q25 (vs THB117m in 4Q24 and THB0.3m in 1Q24) since it began realizing from 12 new investments in 4Q24 onward.

Outlook

- The 1Q25 profit accounted for only 9% of our full-year estimate. We expect to see a q-q recovery in performance in 2Q25, as SPALI will complete one newly built condo named Supalai Blue Whale Huahin (THB1.2b, 76% sold) late in the quarter. However, it should drop y-y as there were three newly built condos in 2Q24.
- We still see challenges for 2025 due to the low current backlog. SPALI had a backlog of THB13.2b at end-1Q25. Of that, it will book THB8.2b this year, which is enough to secure 49% of our 2025 transfer estimate. The company will have to rely on presales during the year, while the low-rise segment remains sluggish and condos face the short-term impact from the earthquake. Our 2025 net profit forecast remains at THB4.3b (-30% y-y) and we maintain our REDUCE rating with a TP of THB14.20.
- SPALI announced a share repurchase program of up to THB2b, not exceeding 120 million shares (6.14% of total outstanding shares), with the repurchase period set from 19 May to 18 November 2025.

Exhibit 4: FSSIA ESG score implication

59.80 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
***	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
