EQUITY RESEARCH - COMPANY REPORT

CARABAO GROUP THAILAND / FOOD & BEVERAGE

CBG TB

Targets appear more challenging

- We have a more cautious outlook after the energy drink market value turned to slow down in April.
- CBG remains confident and guided a positive outlook for 2Q25.
- We have a neutral view on the energy drink sector and suggest investors focus on the market share outlook.

Maintain a challenging market share growth target

Management clarified that AC Nielsen revised its market share by volume for March to 25.8% (+0.3% m-m) from the previous 25.1% (-0.4% m-m), following CBG's objection due to incorrect data. The market value of energy drinks in April dropped by -2-3% y-y (vs +2.6% y-y in 1Q25) due to some impact from a slowdown in domestic consumption. Although CBG's market share in April slightly decreased by 0.1% m-m to 25.7%, lower than 26% in December 2024, management still targets a market share increase to 29% by the end of 2025 from 26% at the end of 2024. There are no plans to launch promotions through traditional trade channels, but efforts will continue in modern trade channels.

Management guides continued growth in 2Q25

We project 2Q25 total revenue to grow both q-q and y-y, driven by 1) domestic energy drink revenue (management guided +13% q-q, +34% y-y), 2) a recovery in export markets, particularly Myanmar (following an improvement in Apr-May) and Cambodia (after a recovery in May), and 3) expected growth in distribution revenue, aligning with all-time high revenue from spirit. We expect 2Q25 gross margin to increase slightly q-q. Despite a higher sugar tax, lower sugar, aluminum, and glass cullet costs would help offset it. CBG decided not to launch new low-sugar drink formulas at this time due to intense market competition and will focus on increasing market share first.

Rising concerns over this year's growth outlook

We received positive information from the meeting and saw CEO's confidence. However, the overall consumption remains weak, posing challenges to the energy drinks market. While perhaps not as severe as other beverage or food categories, this could result in slower-than-expected revenue growth. The plans to establish manufacturing plants in Myanmar and Cambodia are still on track, with expected commercial run in 3Q25 for Myanmar and 1Q26 for Cambodia.

De-rate valuation to reflect higher risks

We maintain our 2025E net profit at THB3.2b (+12.5% y-y). Given the weaker-than-expected consumption and cautious outlook on intense industry competition, we lowered our PE target to 23x (-1 SD) and TP to THB74. We retain our neutral view of the energy drink sector and recommend speculative positions based on the market share outlook.

Investment thesis

We expect the 2025 energy drink market to record a moderate growth of 3-5% y-y. Meanwhile, management sets a domestic revenue growth target of 20-30% y-y, aiming to increase its market share to 29% by the end of 2025, up from 26% by the end of 2024. We view that the goal is aggressive amid increasing competition. In addition, CBG will begin launching several projects in 2025, including 1) a new sugar tax-exempted beverage formula, 2) a raw material usage cut by developing thinner packaging, and 3) a beverage factory in Myanmar in 3Q25. Overall, we need to monitor several factors, as they present both upside and downside risks to performance this year.

Company profile

Established in 2002, CBG is a joint investment of Mr. Sathien Sathientham, Ms. Nutchamai Thanombooncharoen, and Mr. Yeunyong Opakul (Add Carabao). It is a holding company with investments in subsidiaries that manufacture, market, and distribute energy drinks and other beverages in domestic and overseas markets. Its core product is the Carabao Dang energy drink.

Catalysts

Potential catalysts for CBG's earnings growth in 2025 are 1) revenue growth driven by rising market share, 2) lower packaging and raw material costs, 3) successful new product launches, and 4) a successful production line in Myanmar.

Risks to our call

Downside risks to our P/E-based TP are 1) a slower-thanexpected recovery in consumption; 2) higher competition in the domestic energy drink market; 3) a potential rise in packaging and raw material costs; and 4) regulatory risks from domestic and international markets.

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2025 net profit to rise by 1.3%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2025 net profit to rise by 4.2%, and vice versa, all else being equal.
- For every 0.2% increase in SG&A, we estimate 2025 net profit to fall by 1.7%, and vice versa, all else being equal.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 20-May-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
