Slowdown tests new leadership

- We foresee growth headwinds dragging collections to some extent, despite new positive developments under Dr. Rak's early tenure.
- We expect BAM to post a 2025 net profit of THB2,932m, an increase of 83% y-y, on the back of large-ticket collections.
- We maintain our HOLD rating for BAM with a new TP of THB6.85

New leadership put to the test

Under BAM's newly appointed CEO, Dr. Rak Vorrakitpokatorn, BAM is positioning for sustainable growth through two key initiatives: 1) restoring NPL debtors to financial solvency via flexible repayment terms offered through its digital platform, *BAM Choice*; and 2) enhancing the marketability of NPAs by leveraging newly formed partnerships to refurbish properties into move-in ready units. While we are positive on these strategies, we remain cautious in the near term given the persistent macroeconomic headwinds that could weigh on collection momentum.

A soft macro backdrop to pressure base collections

With more clarity on the Trump tariff situation, sluggish 2025 and 2026 Thai GDP growth appears inevitable, in our view. With a sub-2% GDP growth projection looking more likely for both years, we expect some challenges to BAM's collection capabilities despite the new developments under Dr. Rak. While we expect a sound 2025 collection of cTHB17.8b based on two large-ticket collections (NPL: THB2.8b, NPA: THB1.45b), 2026-27E are more conservative. Thus, we project collections in 2026 and 2027 to be THB15.5b and THB16.4b, respectively.

Flat investment in NPL growth despite expected supply surge

According to 1Q25 data from the Bank of Thailand, NPLs across the Thai financial system rose 1.5% y-y to cTHB510b. BAM, as the largest player in the distressed asset space, is well-positioned to benefit the most from the rising NPL supply, we believe. However, given the financial constraint from its D/E ratio, we expect BAM to remain highly selective in purchasing NPLs and thus maintaining a flat NPL investment rate of c9.0-9.3%, bringing projected NPL acquisitions to cTHB8bn in 2025 and 2026, before decreasing to THB7.8b in 2027. Meanwhile, we expect a stable dividend payout ratio of c70% in the next three years.

Maintain our HOLD rating with a new TP of THB6.85

We maintain our HOLD call on BAM. Despite what is likely to be a strong 2025 earnings result driven by large collections in 2Q25, we believe the period just beyond 2025 will be less certain, given Thailand's subdued economic growth outlook and elevated household debt levels. Our GGM-based 2025 TP is THB6.85, referencing a target P/BV of 0.48x (sustainable ROE of 6.5%, COE of 12.2%). With this report we transfer coverage of BAM to Nathapol Pongsukcharoenkul.

Investment thesis

We have a HOLD rating on BAM for the following:

- 1) We expect a slowdown in growth to pressure BAM's collection to some extent. We project 2025 collections to total cTHB17.8b, in line with BAM's target. Subsequently, we expect toned down collections in 2026 and 2027 totaling THB15.5b and THB16.4b, respectively.
- 2) We project a relatively flat NPL investment rate of 9.0-9.3%, bringing the nominal amount to cTHB8b in 2025 and 2026 before decreasing slightly to THB7.8b in 2027, reflecting BAM's cautious approach amid existing funding constraints. The D/E ratio then should remain around 2.2x-2.15x over the period.
- 3) We expect BAM's net profit in 2026-27 to normalize down from 2025 high (THB2,932m) to cTHB1,626 (-45%y-y) and cTHB1,947m (20% y-y), reflecting a slowdown in collections.

Company profile

BAM was established in 1998 following the financial crisis in Thailand. Its key businesses include the purchase or transfer of non-performing loans (NPLs) and non-performing assets (NPAs) for management or for further disposal or transfer.

www.bam.co.th

Principal activities (revenue, 2024)

- NPLs management - 78.8 %
- NPAs management - 20.2 %
- Other income - 1.0 %

Source: Bangkok Commercial Asset Mngt.

Major shareholders

- FIDF - 45.8 %
- Others - 54.2 %

Source: Bangkok Commercial Asset Mngt.

Catalysts

- 1) Better-than-expected collections from NPL and NPA business.
- 2) Better-than-expected investment in NPL receivables.
- 3) Lower-than-expected interest expense and cost of funds.

Risks to our call

Downside risks to our GGM-based TP include 1) lower cash collection than estimated; 2) lower-than-expected bad debt acquisition; and 3) a downturn in the property market. Upsides include 1) better-than-expected economic conditions and debt repayment momentum; and 2) an acceleration in the demand for NPAs.

Slowdown tests new leadership

Maintain HOLD call on BAM with a new TP of THB6.85

Dr. Rak Vorrakitpokatorn’s early tenure as CEO has been off to a promising start, highlighted by the successful collection of THB4.25b from large-ticket NPL and NPA deals in 2Q25. Concurrently, under his new leadership, BAM is also pivoting toward sustainable growth by building new partnerships and adopting more flexible debtor-centric restructuring strategies, aimed at supporting long-term value recovery. That said, despite what is likely to be a strong 2025 earnings result driven by large collections in 2Q25, we believe the period just beyond 2025 will be less certain, given that Thailand’s subdued economic growth outlook and elevated household debt levels could continue to pressure the retail and SME segments.

Thus, while new partnerships could enhance NPA collection efficiency and the softer macro environment may create attractive opportunities for NPL acquisitions, we expect these positives to take time to materialize, with some delays in overall collections. While we see BAM positioning itself well under the new leadership to offer promising long-term growth, given the current price, we see limited upside in the near-term from macro headwinds.

We maintain our HOLD call on BAM, awaiting clearer catalysts for re-rating, particularly around collection efficiency. Our GGM-based 2025 TP is THB6.85, referencing a target P/BV of 0.48x (sustainable ROE of 6.5%, COE of 12.2%).

New leadership put to the test

Appointed in April 2025, Dr. Rak Vorrakitpokatorn assumed the leadership of BAM at a time when the company is navigating a shift in the economic and policy landscape. With a background in banking, public finance, and debt restructuring, including his recent tenure as president of the Export-Import Bank of Thailand, Dr. Rak brings a proactive system-oriented leadership style. His early focus has been on operational reform and direct customer engagement, repositioning BAM from a passive debt collector to a more outreach-driven distressed asset manager.

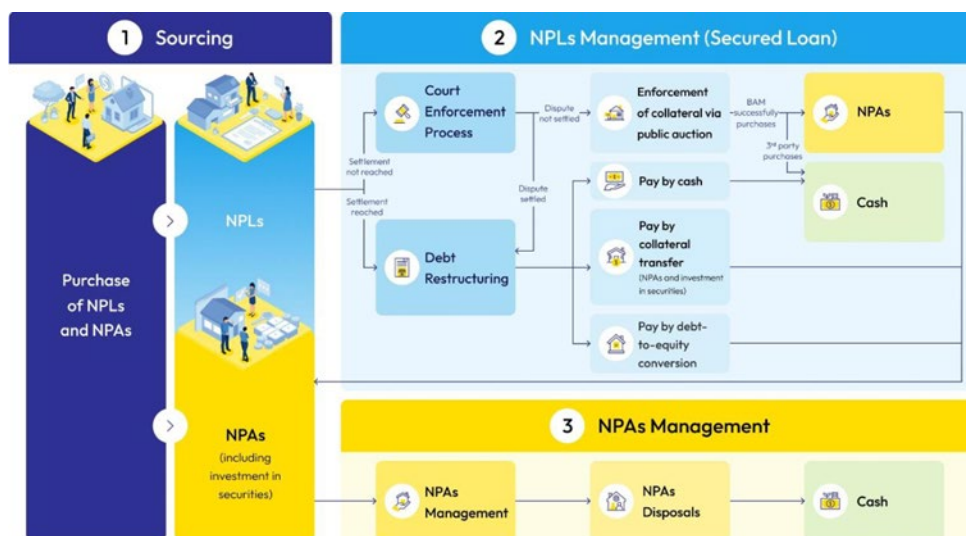

For NPLs, BAM plans to leverage its digital platform, *BAM Choice*, as an enabler of its “TDR (troubled debt restructuring) Factory” strategy. The initiative is designed to streamline and standardize the restructuring process by tailoring repayment plans with more flexible terms, thereby improving retail debtors’ debt servicing ability. As part of the initiative, BAM is also planning to establish a dedicated Financial Advisory Center, which will act as a platform to support distressed debtors by providing restructuring guidance and rewarding good payment behavior (i.e. debtors with regular payments over 12 months) with refinancing opportunities from financial partners.

Exhibit 7: Dr. Rak’s 3P strategy

Source: BAM

Exhibit 8: Overview of BAM's business model

Source: BAM

In terms of NPAs, BAM is shifting its NPA sales strategy from simple assets to actively marketing NPAs as an investment opportunity. The company is promoting three potential return sources for buyers:

1. Immediate purchase discounts: NPAs are being offered at c10-16% below appraised value as well as zero percent financing, supported by targeted promotions and campaigns.
2. Long-term capital appreciation: Buyers are encouraged to view purchased properties as medium- to long-term investments, with BAM highlighting potential price recovery as the property market stabilizes.
3. Rental opportunities: For income-seeking investors, BAM promotes the potential to generate stable rental yields, particularly in urban and tourist-heavy areas.

Furthermore, BAM has signed MOUs with two new partners so far in 2025, namely Vbeyond Development PCL and Siamese Asset PCL. These partnerships aim to enhance BAM's ability to efficiently convert NPA inventory into cash collections by leveraging the partners' marketing channels for greater asset exposure. Moreover, through initiatives such as "fix-and-flip" strategies, residential NPA assets can be refurbished into move-in ready properties at reasonable prices, adding value and increasing resale potential.

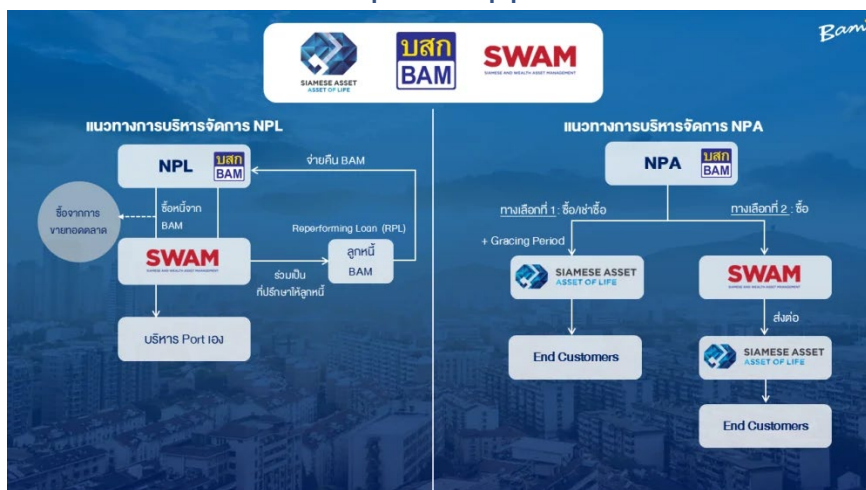

We view these developments as positive and supportive of long-term growth, however in the near term there are some caveats. The effectiveness of these initiatives depends heavily on macro sentiment and buyers' confidence in the property market, both of which remain soft in the near term. The coming quarters and years will be critical in assessing the effectiveness of Dr. Rak's turnaround strategy for BAM, as executing such initiatives in the current macro and policy environment presents significant operational and execution challenges.

A soft macro backdrop to pressure collections

With more clarity on the Trump tariff situation, where we expect tariffs on Thai exports will likely be ranging between 19-36% (c19-20% being in line with rates imposed on other SEA countries such as Vietnam, Indonesia, and the Philippines), we believe sluggish Thai GDP growth appears inevitable. With multiple research houses now expecting sub-2% GDP growth in 2025 and 2026. The National Economic and Social Development Council (NESDC), for instance, expects US tax measures to weigh on export performance and erode investor confidence, thereby dampening private investment. Consequently, the latest 2025 projection shows Thai GDP growth in the range of 1.3-2.3% (down from the 2.3-3.3% range), with a median estimate of 1.8%. Adding to the pressure, Thai household debt, though gradually declining, remains elevated at approximately 87% of GDP, leaving consumers with limited capacity for discretionary spending.

Exhibit 11: NESDC's 2025 Thai GDP growth projection, as of May 19; multiple downward revisions, namely investment and private consumption

	----- Actual data -----			----- Projection for 2025 -----	
	2022	2023	2024	17-Feb-25	19-May-25
GDP Growth (%)	2.6	2.0	2.5	2.3 – 3.3	1.3 – 2.3
Investment (%)	2.2	1.2	0.0	3.6	0.9
Private (%)	4.6	3.1	(1.6)	3.2	(0.7)
Public (%)	(3.9)	(4.2)	4.8	4.7	5.5

(%)

Sources: BOT; FSSIA compilation

While Dr. Rak's "TDR Factory" initiative supports long-term NPL collection growth, near-term challenges remain, in our view. In the current weak macroeconomic environment, we believe that such concessions may weigh on near-term performance. More generous repayment terms could risk lengthening amortization on NPLs and delay gains to be realized from collections, particularly as debtors' repayment capacities remain limited. However, one key advantage for BAM, as the largest AMC operator with the biggest asset share, is its active participation in the NPL market. We anticipate that its scale will allow BAM to acquire NPLs at relatively attractive prices, which could help offset some of the pressure from its flexible debt restructuring strategy. This is particularly true in the current environment, where the NPL supply is expected to remain high due to persistent macro headwinds in the Thai economy.

Exhibit 13: AMC industry asset shares, as of Dec 2024; BAM remains a leading player in the industry with 45% of AMC industry's total assets

Sources: BAM; FSSIA compilation

From an NPA standpoint, despite optimism surrounding BAM's new partnerships, we remain cautious. Thailand's residential property market has yet to show clear signs of recovery, with 2Q25 presales projected to plunge 23% q-q and 28% y-y to an 18-quarter low of THB50.2b. High-rises such as condominiums have been hit the hardest, with 2Q25E presales dropping to just THB16b, further pressured by disruptions following the earthquake in late March. Meanwhile, low-rise properties appear to be much more resilient to the challenging macro backdrop, partly supported by a shift in demand from condo buyers.

Exhibit 14: Property sector quarterly presales, 1Q24-2Q25E

Exhibit 15: BAM's NPA breakdown as of 1Q25

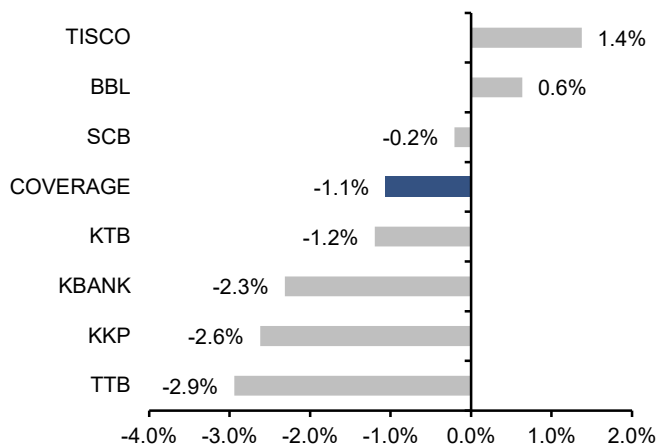

Sources: Company data; FSSIA estimates

Sources: BAM; FSSIA compilation

In our view, the fragile property market environment could continue to weigh on NPA sales momentum, limiting the immediate earnings impact from BAM's new partnerships. However, there is some room for optimism. For one, we estimate that condominiums account for only 5-7% of BAM's residential NPA portfolio, suggesting room for better-than-expected NPA sales given the resilient demand for low-rise properties. Furthermore, we expect that the newly appointed Bank of Thailand (BOT) governor, Mr. Vitai Ratanakorn, will adopt a more business-friendly stance, with the potential for multiple rate cuts going forward. The recent relaxation of mortgage LTV rules to 110%, effective through 2Q26, may also provide marginal support to NPA sales by easing financing constraints for buyers.

Nevertheless, overall financial conditions ultimately depend on banks' lending appetite, and most commercial banks under our coverage are reporting negative YTD loan growth, as they shift focus from yield generation to balance sheet protection, favoring lower-risk corporate lending. Ultimately, while we expect a sound 2025 collection of cTHB17.8b (+18% y-y) from BAM based on two large-ticket collections in 2Q25, we remain prudent in our 2026-27 estimates. Subsequently, we expect BAM to post 2026 and 2027 collections of THB15.5bn (-13% y-y) and THB16.4bn (+5% y-y), respectively.

Exhibit 16: Loan growth of commercial banks under our coverage, %YTD 6M25; negative loan growth on aggregate of -1.1% YTD

Sources: Company data; FSSIA compilation

Exhibit 17: Collection mix, 2020-27E; 18% growth in 2025 collection from two large-ticket collections worth THB4.25b

Sources: BAM; FSSIA estimates

Exhibit 18: Collection-to-asset ratio, 2019-27E

Sources: BAM; FSSIA estimates

Exhibit 19: Income-to-collection ratio, 2019-27E

Sources: BAM; FSSIA estimates

In terms of collection efficiency, BAM's historical collection-to-asset ratio averages c0.11-0.12x, while its income-to-collection ratio stands at c53-56%. We believe that any sustained acceleration in these metrics through 2025-27 above these ranges could suggest that initiatives under Dr. Rak's leadership are beginning to yield results, presenting potential upside risk to our current HOLD call despite the macro headwinds.

Flat investment in NPL growth despite expected supply surge

According to the BOT, NPLs across the Thai financial system rose 1.5% y-y to approximately THB510bn in 1Q25, pushing the system-wide NPL ratio to 2.82%. Meanwhile, special mentioned (SM) loans also increased substantially by 9.8% y-y to cTHB1.2tr, with the SM loan ratio increasing above 6.7%. Dr. Rak projects that a portion of these SM loans could migrate into NPLs by year-end, creating a significant opportunity for distressed asset players such as BAM to capitalize on through strategic NPL acquisitions.

Exhibit 20: SM loans and NPL ratio in Thai financial institution system, 1Q15-1Q25; SM loans above 6.7% of total loans as of 1Q25

Sources: BOT; FSSIA compilation

Exhibit 21: Commercial banks' NPL outflow, 1Q15-1Q25; outflow rate could remain stagnant due to loan forbearance programs

Sources: BOT; FSSIA compilation

While we view this as a positive development in terms of investment, some risks remain. Financial institutions may continue to prioritize internal debt restructuring over writing off NPLs for auction, either voluntarily or through government initiatives such as the "You Fight, We Help" program. Given the current macroeconomic environment, the emergence of similar government support programs would not be unexpected. This could slow NPL acquisition momentum for BAM and limit the available NPL supply in the market.

Nonetheless, BAM can still gain early access to financial institutions' NPLs through its joint-venture AMCs. BAM's JV with Kasikornbank (Arun) and with Government Savings Bank (Ari) was established to expand BAM's reach into a higher volume of NPLs while sharing risk with its financial institution partners. Contributions from these JVs remain small at this stage (cTHB8m, 3.7% of net profit in 1Q25), as they are likely still in the ramp-up phase, having only been formed in late 2024. We expect their contribution to increase over time as operations scale up and more NPL portfolios are channeled through them.

That said, we still expect BAM to benefit meaningfully from the anticipated rise in NPL supply, supported by its scale and active market presence. However, given several factors limiting BAM's funding capacity, which we address in the following section, BAM is likely to remain pragmatic and selective in its acquisitions, prioritizing NPLs with attractive pricing, strategic locations, and strong recovery potential, rather than simply targeting higher volumes. Thus, we expect a stable investment rate from BAM at c9.0-9.3% throughout 2025, 2026, and 2027, translating to a nominal investment of cTHB8bn in each year.

Exhibit 22: JVs' contribution to net profit, 2024-27E

Sources: BAM; FSSIA estimates

Exhibit 23: Investment in NPLs and investment rate, 2019-27E

Sources: BAM; FSSIA estimates

A delicate balance between funding, leverage, and capital preservation

We foresee limits to BAM's ability to pursue NPL acquisitions in the upcoming period. To start, BAM's leverage profile has already been edging higher, with its D/E ratio rising from the low 2x range in 2022 to around 2.2x by the end of 2024. Looking ahead, we expect collection headwinds in 2H25 and 2026 stemming from weaker economic growth and the weak property market, which are likely to pressure both BAM's internal cash flow and profitability. In this context, we believe that aggressively leveraging up to acquire NPLs may not yield immediate returns—the higher interest expenses would burden earnings without guaranteeing faster collections or recovery in the near term.

Capital preservation adds yet another layer of complexity. BAM has maintained a high dividend payout ratio of c65-80% and is a constituent of a high-dividend index (SETHD), making dividend stability an important market signal for the company, in our view. We believe that any initiative to cut dividends in order to alleviate its interest burden or to fund aggressive NPL purchases could weigh heavily on investor sentiment, particularly given the recent TRIS credit rating outlook downgrade from stable to negative (current rating: A-), a signal of heightened pressure on BAM's financial flexibility.

As such, we expect BAM's management to remain cautious on incremental leverage in the near term, prioritizing stability and shareholder payouts over rapid NPL portfolio expansion. We expect BAM's D/E ratio to remain relatively stable (in the range of 2.22x to 2.15x) over the next three years. The company is likely to wait for clearer visibility on the collection trend before materially scaling up acquisitions. Likewise, we expect BAM's cost of funds to be benign, declining gradually from 3.50% in 2024 to around 3.42% in 2025 and 3.38% in 2026, reflecting the BOT's rate cuts implemented in late 2024 and the further cuts expected in 2025. Lastly, we expect a stable DPR of c70% for the next three years, given BAM's objective to build confidence among shareholders.

Exhibit 26: DPS and DPR, 2019-27E

Sources: BAM; FSSIA estimates

2Q25E earnings preview

We expect BAM to post a 2Q25 net profit of approximately THB1,707m, a significant increase of 690% q-q and 274% y-y, driven primarily by large-ticket NPL and NPA collections totaling THB4.25b during the period (NPL: THB2.8b, NPA: THB1.45b). We estimate total collections for the quarter to reach around THB7,359m, representing a substantial rise of 131% q-q and 87% y-y, which would push 1H25 collections to approximately THB10.5b, accounting for 59% of BAM's full-year 2025 collection target of THB17.8b.

Net interest income, supported by the large NPL collections, is expected to rise to THB3,131m (84% q-q and 76% y-y), while total non-interest income, driven by the sizable NPA transactions, is projected to increase to cTHB1,000m (114% q-q and 23% y-y).

NPL investments for the quarter are also expected to increase q-q to cTHB3.4b from zero in 1Q25, as BAM did not deploy cash for NPL acquisitions in 1Q25 due to delayed auctions by financial institutions, which hindered timely due diligence. These postponed acquisitions are now likely to be recognized in 2Q25.

Bangkok Commercial Asset Mngt. (BAM TB)

FSSIA ESG rating

55.19 /100

Exhibit 34: FSSIA ESG score implication

Rating	Score	Implication
★★★★★	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
★★★★★	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
★★★	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
★★	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
★	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Disclaimer for ESG scoring

ESG score	Methodology	Rating																			
The Dow Jones Sustainability Indices (DJSI) By S&P Global	The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion.	Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe.																			
SET ESG Ratings List (SETESG) by The Stock Exchange of Thailand (SET)	SET ESG quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years.	To be eligible for SETESG inclusion , verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. SETESG Index is extended from the SET ESG Ratings companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks.																			
CG Score by Thai Institute of Directors Association (Thai IOD)	An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations.	Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%).																			
AGM level By Thai Investors Association (TIA) with support from the SEC	It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). <i>(The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)</i>	The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79.																			
Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC)	The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. <i>(Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)</i>	The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements.																			
Morningstar Sustainalytics	The Sustainalytics' ESG risk rating provides an overall company score based on an assessment of how much of a company's exposure to ESG risk is unmanaged. <i>Sources to be reviewed include corporate publications and regulatory filings, news and other media, NGO reports/websites, multi-sector information, company feedback, ESG controversies, issuer feedback on draft ESG reports, and quality & peer reviews.</i>	A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored. <table><tr><th>NEGL</th><th>Low</th><th>Medium</th><th>High</th><th>Severe</th></tr><tr><td>0-10</td><td>10-20</td><td>20-30</td><td>30-40</td><td>40+</td></tr></table>	NEGL	Low	Medium	High	Severe	0-10	10-20	20-30	30-40	40+									
NEGL	Low	Medium	High	Severe																	
0-10	10-20	20-30	30-40	40+																	
ESG Book	The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis.	The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance.																			
MSCI	MSCI ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. It uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. <table><tr><td>AAA</td><td>8.571-10.000</td><td rowspan="3">Leader:</td><td rowspan="3">leading its industry in managing the most significant ESG risks and opportunities</td></tr><tr><td>AA</td><td>7.143-8.570</td></tr><tr><td>A</td><td>5.714-7.142</td></tr><tr><td>BBB</td><td>4.286-5.713</td><td rowspan="3">Average:</td><td rowspan="3">a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers</td></tr><tr><td>BB</td><td>2.857-4.285</td></tr><tr><td>B</td><td>1.429-2.856</td></tr><tr><td>CCC</td><td>0.000-1.428</td><td>Laggard:</td><td>lagging its industry based on its high exposure and failure to manage significant ESG risks</td></tr></table>	AAA	8.571-10.000	Leader:	leading its industry in managing the most significant ESG risks and opportunities	AA	7.143-8.570	A	5.714-7.142	BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers	BB	2.857-4.285	B	1.429-2.856	CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks

AA	7.143-8.570																				
A	5.714-7.142																				
BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers																		
BB	2.857-4.285																				
B	1.429-2.856																				
CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks																		
Moody's ESG solutions	Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term.																				
Refinitiv ESG rating	Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. <i>(Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)</i>																				
S&P Global	The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100.																				
Bloomberg	ESG Score	Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best.																			
Bloomberg	ESG Disclosure Score	Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point.

All share prices are as at market close on 30-Jul-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
