EQUITY RESEARCH - COMPANY REPORT

GFPT GFPT TB

THAILAND / AGRIBUSINESS

- Expect 3Q25 profit likely flat to rise q-q, beating earlier expectations of a decline.
- While domestic chicken prices fell, feed costs dropped further and lower freight rates added support.
- Recommend trading on short-term momentum.

3Q25 outlook better than expected

We received positive takeaways from the Finansia Exclusive Talk, especially on the short-term outlook. Gross margin in 3Q25 would be flat to slightly higher q-q, better than the earlier forecast of a decline. The negative impact from overtime costs related to the Cambodian labor issue in August turned out smaller than expected. Although the strong THB is a headwind, this should be offset by lower raw material costs and resilient export chicken margins.

Export chicken still more attractive than domestic

Export chicken prices remain higher than domestic. 3Q25 export volume is expected at 8,300–8,500 tonnes, flat q-q but lower y-y due to a high base in Europe last year. Export prices are holding firm at USD4,800 /tonne to Japan (flat y-y) and USD4,400/tonne to Europe (+10% y-y). GFPT is in the process of negotiating price hikes to reflect the stronger THB. Meanwhile, domestic prices have softened: live chicken in 3QTD averaged THB39.8/kg (-0.5% q-q, -6.8% y-y), and chicken carcass averaged THB14/kg (-6.7% q-q, -3.4% y-y). With softer domestic prices and stronger THB, 3Q25 total revenue may not be exciting.

Lower costs provide key support

Raw material costs continued to decline in 3Q25: corn averaged THB 8.9/kg (-18% q-q, -26% y-y) and soybean meal averaged THB14/kg (-6.7% q-q, -32% y-y). This drop outpaced domestic chicken prices. Overtime costs were less severe than expected (impact of 1–1.5 months), while the labor issue has normalized after replacement workers (Myanmar, Laos and Thai) were recruited. We expect 3Q25 gross margin at 17% (vs. 16.7% in 2Q25 and 15.5% in 3Q24), while SG&A to sales should ease slightly q-q with lower freight rates. Profit contribution from McKey is also likely to improve q-q on seasonality.

2025 earnings with modest upside

If 3Q25 earnings are flat to slightly up q-q as expected, 9M25 net profit would reach THB1.92bn (+21% y-y), accounting for 90% of our 2025F of THB2.14bn (+8.4% y-y), implying upside risk. On expansion, the company is doubling slaughtering capacity to 300,000 birds/day (from 150,000), scheduled to operate in 2H26, followed by a cooked chicken processing plant targeted to completion in 2028.

Investment thesis

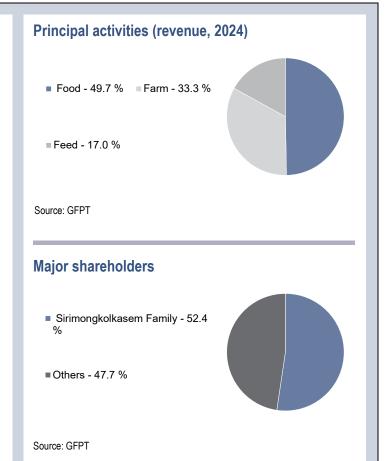

GFPT has doubled the capacity of its slaughterhouse from 150,000 to 300,000 chickens per day from 2H24, partly to match the processing capacity expansion of its associate McKey. GFPT is also preparing to expand its processing plant to cope with export growth since it currently runs at a 100% utilization rate.

The overall chicken export volume in 2025 may be flat or soften slightly y-y. This is partly because European customers had stockpiled large orders last year, and the company did not benefit from the 60-day ban imposed on Brazil due to avian influenza, as their products serve different market segments. However, the avian flu situation in Brazil has eased, and the country is expected to regain its position as a major competitor to Thailand.

Company profile

GFPT operates a vertical, fully integrated poultry business covering feed production, grandparent farms, breeder farms, broiler farms, the production and distribution of chicken meat, cooked chicken products, and other chicken-related products under its own and customers' brands for both domestic and export markets.

www.gfpt.co.th

Catalysts

Potential catalysts for GFPT's earnings growth in 2026 are 1) chicken export volume growth; 2) a higher-than-expected chicken price; 3) the operation of a new slaughterhouse; and 4) lower raw material costs.

Risks to our call

Downside and upside risks to our P/E-based TP include 1) a slower or faster-than-expected consumption recovery; 2) a slower or faster-than-expected decrease in feed costs; 3) a stronger or weaker-than-expected THB; and 4) a minimum wage increase and/or a labour shortage.

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2026 net profit to rise by 0.8%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2026 net profit to rise by 4.1%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A, we estimate 2026 net profit to fall by 3.8%, and vice versa, all else being equal.

Exhibit 7: FSSIA ESG score implication

40.94 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 16-Sep-2025 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
