SET INDEX

The SET is likely to recover in the near term but is still at risk in the big picture.

In the near term, the SET may recover briefly because there is a bullish divergence with the RSI in the 30-minute picture.

However, the index is in retreat in the big picture after it fails to hover above 1580. In this regard, it may decrease to test its crucial support of 1550 points.

Support	1555	1550
Resistance	1570	1580

Technical Review:

- S50H20: In the hourly picture, the index is hitting a new low. The outlook is negative.
- Momentum Trading : ACE, TISCO
- Swing Trading : AMATA, LH
- DW : DTAC (Call)
