Thailand Aviation - Strong earnings flying out of market's radar

Strong 1Q24 core profit may turn the market's attention to the sector

We believe the airline sector is escaping the market's attention and strong 1Q24E earnings growth, and the promising outlook may turn the market's attention to the sector. We expect both AAV and BA to report strong core profits of THB1.0b each in 1Q24. Key drivers are strong load factors of 93% for AAV and 88% for BA (+1 ppt y-y) and ticket fares of THB2,000-2,100 for AAV (+29% y-y and +32% vs 1Q19) and THB4,000-4,100 for BA (+8% y-y and +17% vs 1Q19). Note that AAV should report a net loss of THB1.1b due to an FX loss on its lease liabilities (non-cash item).

Ticket fares likely to stay at high level due to low competition and aircraft supply

In this report, we also address two major concerns for the sector. First, whether ticket fares will decline from high competition? The competition among Thai airlines is much lower compared to the pre-Covid period as Thailand's total aircraft fleet has reduced by 24% from 275 in 2019 to 210 in 2023. Also, new aircraft deliveries in Asia Pacific remain low vs the pre-Covid period. In addition, AAV has reallocated its fare structure to reduce the promotional fare class, while BA has focused on its Samui route which has higher ticket fares. Thus, we should see low competition and a high ticket fare level at least until 2025.

Jet fuel prices declined by 6% YTD and 10% compared to last year

The second concern is increasing costs, especially jet fuel, as Brent spot prices rose 11% YTD. On a positive note, jet fuel prices dropped by 6% YTD to USD94/bbl due to the narrow jet spread, and are still below our assumption of USD110 and last year's average of USD105. We are concerned about maintenance costs, which have surpassed pre-Covid by c30%. However, strong ticket fares should more than offset non-fuel expenses, as indicated by revenue per ASK (RASK), which has remained above cost per ASK (CASK) since 2023.

Potential upside of 20-50% for market cap to convert to its peak

We have BUY ratings for both BA and AAV. The short-term catalyst is a potential earnings upgrade post 1Q24 from the street. If our 1Q24 preview materializes, we should see core profits above THB1.0b in the high season (1Q/4Q for AAV and 1Q/3Q for BA) and slim profits during the low season. This would imply 2024 core profits of THB2.4b-2.6b for each vs BBG's consensus of THB1.6b for AAV and THB2.1b for BA. In addition, their 2024 P/E multiples would narrow to only 12-14x, which is cheap, in our view. Their core profits have a high potential to hit record highs this year (current record for AAV is THB1.9b and BA is THB2.1b in 2016), while their market caps are still lower than their peaks by 23% for AAV and 47% for BA.

S HOTELS AND RESORTS (SHR TB) - 1Q24 results at first glance; Maintain BUY TP THB4.00

SHR booked a core profit of THB129m (+99% q-q) in 1Q24, beat our estimate

Highlights

- SHR reported a 1Q24 core profit of THB129m, improving from THB65m in 4Q23 and beating our estimate by 18%, mainly due to higher-than-expected other income.
- Including a THB17m unrealized loss on FX, net profit was THB112m.
- Maldives hotel (excluding SO/ Maldives) RevPAR grew by 18% y-y in 1Q24, driven by a strong ADR (+16% y-y). The RevPAR of Thai hotels grew by 15% y-y thanks to a 14% y-y higher ADR. Outrigger RevPAR grew by 23% y-y thanks to robust growth at its Fiji hotels. On a negative note, the RevPAR of UK hotels fell by 1% y-y due to the expiration of the long-term exclusive-use contract with the government for the Mercure London Watford hotel.
- Revenue grew 8% y-y and the EBITDA margin improved to 27% in the quarter (vs 26% in 1Q23) thanks to the strong performance of Thai and Maldives hotels.
- SO/ Maldives recorded a share of loss of THB63m in 1Q24 (vs a THB66m loss in 4Q23) due to the initial phase of operation with an OCC rate of 44%.
- Excluding the share of loss from SO/ Maldives, core profit would grow by 30% y-y and hit a record high at cTHB190m.
- 1Q24 core profit accounted for 42% of our 2024E core profit of THB307m.

Outlook and valuation

- We expect operations to improve y-y in 2Q24, and SHR should book a smaller core loss.
- SHR trades at cheap and undemanding valuations of 0.5x 2024E P/BV and 8.8x 2024E EV/EBITDA (vs peers' averages of 1.9x and 20x).

MUANGTHAI CAPITAL (MTC TB) - Key takeaways from analyst meeting; Maintain BUY TP THB50.00

The main discussions in MTC's analyst meeting today were 1) the continual improvement of its asset quality; and 2) the better-than-expected 1Q24 loan expansion and cost of funds. We retain our 2024-26 forecast, as most key assumptions align with its guidance. We maintain our BUY rating. Our 2024 GGM-based TP is THB50, which implies a P/BV of 2.82x under the expected L-T ROE of 18.6% and COE of 10.0%.

Highlights

- **Asset quality:** MTC reaffirmed that its asset quality improvement has exceeded expectations, particularly the vintage NPLs from the Covid-19 period, which showed a continuous decline following its stringent lending policy since the beginning of 2023 and the aggressive NPL management via sales (THB900m vs THB1b in 4Q23) and writing off debts in 1Q24. Moreover, its collection showed positive progress due to improving branch efficiency, in which it put significant effort into debt collection in tandem with granting new loans and helping contain new NPL formation. The NPL ratios from loan receivables (92% of total) – title loans and other unsecured loans – and hire-purchase receivables (8%) showed decreasing figures compared to 4Q23.

MTC guides that the positive trend could continue through the rest of 2024 with a gradual recovery, leading to the possibility of a 2024 guidance review in the middle of the year. However, the company wants to maintain its 2024 NPL ratio below c3.20% and keep the credit cost target at 3.50% despite the better-than-expected 1Q24 figure of 3.16%, while reaffirming the low possibility of a 3.50% credit cost in 2024.

- **Loan expansion and cost of funds:** MTC stated that its 1Q24 loan expansion of 17.4% y-y was much better than expected despite the low season. The company maintains its 15-20% y-y 2024 growth target; the 17% figure should be a minimum. Secured loans remained vital drivers in 1Q, whereas unsecured loans were muted. 2Q24 growth should accelerate, approaching 20% y-y. There were aggressive new branch openings during 1Q24, with 251 branches opened vs the 2024 target of 600. This slightly pressured the overall loan per branch efficiency to THB18.7m, which MTC expects to accelerate to cTHB20m at the end of 2024.

Regarding its 1Q24 better-than-expected cost of funds at 3.90% vs the 2024 target of 4-4.20%, MTC disclosed its advantage of obtaining more bank loans from the Bank of China at a reasonable price worth THB4b during 1Q24. By contrast, the company had no loan yield adjustments and most of the loan expansion focused on secured loans, which have a lower yield compared to the unsecured segment, causing the interest spread to drop sharply to 13.78%.

Exhibit 7: 2024E – FSSIA estimates vs management guidance

	2023	FSSIA 2024E	MTC 2024E
Loan growth (y-y %)	18.2	19.5	15-20
NPL (%)	3.22	3.10	<3.20
Credit cost (%)	3.71	3.08	<3.50
Cost of funds (%)	3.66	4.20	4.00-4.20
Cost-to-income ratio (%)	46.9	46.9	46-47

SRINANAPORN MARKETING (SNNP TB) - 1Q24 results at first glance; Maintain BUY TP THB22.00

1Q24 core profit was in line with our estimate, but it was not exciting

Highlights

- SNNP posted a 1Q24 net profit of THB158m (-4.5% q-q, +2.3% y-y), in line with our expectation and Bloomberg's consensus estimate, but it was not exciting. The decrease q-q was mainly from the low season of its business and the poor purchasing power of the traditional trade channel.
- Its 1Q24 total revenue slightly grew by 1.4% y-y but dropped 12.2% q-q. To elaborate, domestic revenue declined both q-q and y-y as revenue from the traditional trade channel was sluggish, mainly from lower purchasing power. Revenue from overseas grew by 6.8% y-y, but plunged 34% q-q. 1Q24 Vietnam revenue came in at THB160m, increasing y-y but dropping q-q due to the seasonality.
- The 1Q24 gross margin reached a new high at 29.5%, up from 28.2% in 1Q23 and 29.2% in 4Q23. The increased utilization rate at the factory in Vietnam, which has a higher gross margin than the factory in Thailand, led to an improvement in the overall gross margin.
- The overall liquidity remained healthy, with a D/E ratio of 0.54x and current ratio of 1.05x. However, the account receivable days remained high at around 100 days in 1Q24. In addition, we note that accounts receivable aged over 12 months increased to THB66m from THB38m at the end of 2023.

Outlook

- SNNP's 1Q24 net profit accounts for 20% of our 2024 net profit forecast. We think its 1Q24 profit will be the lowest point of the year.
- We assume its profit will continue to grow in 2Q24, due to the summer season to support its beverage products and the ramping up of the Vietnam factory's utilization rate. Aside from that, we expect to see its Vietnam revenue hit a record high in 4Q24 due to the seasonality.

Exhibit 8: SNNP – 1Q24 results summary

GFPT (BUY, TP THB14.2) – 1Q24 profit beat our and consensus estimate by 6%

- GFPT posted 1Q24 net profit of THB466m (+13.5% q-q, +56% y-y). Excluding an FX loss of THB12m and a derivative gain of THB37m, the normalized profit equaled THB441m (+9.4% q-q, +86% y-y), beating our and consensus estimate by 6%.
- Key drivers for impressive growth in 1Q24 came from 1) a significant growth of profit sharing from associates (GFN and McKey), jumped by 17% q-q and 115% y-y; and 2) higher gross margin.
- To elaborate, profit contribution from GFN was at THB91m (+41% y-y) – a six-quarter high. McKey's profit contribution equaled THB141m (+6% q-q, +18% y-y) – a record high, due to higher export volume of cooked processed chicken.
- GFPT's 1Q24 total revenue was not exciting, it dropped by 5.6% q-q and 0.3% y-y, mainly from 1) lower export price, decreased by 4.4% q-q and 8.4% y-y; and 2) a decline in chicken domestic volume by 6.8% q-q and flat y-y.
- Its gross margin performed well at 12.6%, up from 10.4% in 1Q23 and 12.4% in 4Q23 due to lower raw material costs.
- Despite SG&A expenses dropped by 2.3% q-q and slight grew by 1%, but the SG&A-to-sales ratio increased to 8.2% from 8% in 1Q23 and 7.9% in 4Q23 due to a decline in total revenue.
- GFPT's 1Q24 normalized profit accounted for 30% of our full-year estimate. We still expect 2Q24 profit would continue to slightly grow q-q in line with the seasonality and a declining raw material costs.

TACC (BUY, TP THB7.8) – 1Q24 net profit performed well, but we have more negative view on 2H24

1Q24 net profit performed well

TACC reported a 1Q24 net profit of THB61m (+3.8% q-q, +44% y-y). Excluding an impairment of the investment in TCI of THB11m in 4Q23, the normalized profit dropped by 13.2% q-q, due to high base last quarter. We were impressed with a solid revenue growth at 21% y-y, driven by exceptionally hot weather boosting beverage sales. Its gross margin improved to 33.9% from 33.1% in 4Q23 and 31.6% in 1Q23, due to low-cost inventory, particularly for coffee, with prices locked in until mid-2024.

Higher expenses and loss contribution from subsidiary

However, administrative expenses to sales increased to 8.4% of total revenue, up from a below-average 5.6% in 4Q23. Selling expenses rose by 53% y-y due to higher advertising and promotion expenses, causing SG&A to sales to increase to 18% from 15.3% in 4Q23 and 17.1% in 1Q23. In addition, the company still received a loss contribution of cTHB5-6m per quarter from its subsidiary HIP (Health and Wellness).

Higher coffee price would pressure 2H24 earnings

In the short term, we expect 2Q24 net profit would be flat or slightly lower q-q despite it being the high season for business, as the company will start to recognize higher coffee costs. We have more negative view on the earnings trend in 2H24. After depleting low-cost coffee inventory, the company is now in the process of locking in coffee prices that are only sufficient for use throughout 2H24 at a 22% y-y higher price. Coffee cost accounts for 12% of total costs. We estimate higher coffee prices could impact gross margin by c2% and net profit by c12% in 2H24, ceteris paribus. Therefore, it is possible that the earnings trend in 2H24, especially in 3Q24, which is the low season for business, may be lower than in 1H24.

SAV (BUY, THB25.00 TP) - core profit surged by 201% y-y to THB98m in 1Q24, beat our estimate

- SAV reported 1Q24 core profit without withholding tax (WHT) of THB116m (+45 y-y, +13% q-q), beat our estimate by 7% due to lower-than-expected SG&A and higher-than-expected other income.
- Including THB18m WHT, SAV reported core profit of THB98m (+201% y-y, +61% q-q), also beat our estimate by 5%
- Including THB3m FX loss and THB1m impairment loss on financial assets, net profit was THB94m
- Total flight volume grew by 9% y-y driven by 26% y-y higher international landing & take-off flight volume. Overflight volume also grew by 6% y-y. As a result, service income grew 20% y-y.
- Gross profit margin slightly declined to 50% (vs 52% in 1Q23) due to higher number of international landing & take-off flight volume which has higher revenue sharing than overflight. SG&A/sale improve to 15% (vs 19% in 1Q23). As a result, EBITDA margin improve to 42% (vs 41% in 1Q23).
- 1Q23 core profit accounted for 22% of our 2024E core profit forecast of THB436m

Outlook

- We expect the strong growth y-y momentum to continue to 2Q24. International landing & take-off flight volume should continue to improve following strong recovery of Cambodia's tourist arrivals, while domestic landing & take-off flight volume should jump as AirAsia Cambodia will start operation in May 2024
- SAV is trading at an attractive valuation of 24x 2025E P/E. Upside includes 1) a proposal to raise tariffs by 5-7% by end of this year and 2) opportunity in Laos' air navigation services, which had a larger revenue size than Cambodia.

CPAXT (BUY; TP THB36.0) reported a 1Q24 core profit of THB2.48b (-24% q-q, +19% y-y). In line with our estimate and BBG's consensus

- CPAXT reported a 1Q24 core profit of THB2.48b, dropped by 24% q-q due to seasonality but up 19% y-y, supported by higher sales from both Makro and Lotus's, including lower interest expenses. Total sales grow by 6% y-y, 3.4% wholesale SSSG, and 6.9% retail-Thailand and 8.4% retail-Malaysia SSSG.
- Gross margin slightly expanded to 14.1% (vs 4Q23 and 1Q23 of 14.0%) due to higher margin in wholesale business mainly from Makro-Thailand and Foodservice APME (high-end products), while Lotus's Thailand increased by 10 bps y-y but Lotus's Malaysia declined by 200 bps y-y due to higher sales promotions and sales mix of non-food products declined resulting in a decrease in Lotus's to 17.6% (vs 4Q23 of 18.2%, 1Q23 of 18.0%). SG&A expenses increased by 4.5% y-y mainly from higher costs associated with a growth in Omni Channel and the new distribution center.
- The 1Q24 core profit secures 23% of our 2024 forecast. The SSSG trend for the 2QTD continue to grow at a level of 1-3% for the wholesale business and 5% for the retail-Thailand and 4-5% for retail-Malaysia. The trend of gross margin for Lotus's-Malaysia is expected to gradually improve in the remaining period of the year.
- We reaffirm a BUY call at our TP of THB36.0. We retain our robust 2024E core profit growth by 21% y-y, supported by Lotus's recovery and lower interest expense in 1H24. Besides, the synergies from the merger of MAKRO and Lotus's from 2025 onwards.

Sources CPAXT; FSSIA estimates

ASW (BUY, TP THB9.5) - 1Q24 core profit surged y-y, beat our estimate by 6%.

- ASW reported a 1Q24 net profit of THB256m (-47% q-q, -9% y-y). Excluding extra items in 4Q23 and 1Q23, the core profit dropped 36% q-q but surged by 49% y-y, beating our estimate by 6% and consensus expectation by 11% due to a higher-than-expected GPM.
- Transfers came in at THB1.65b, dropping by 20% q-q from high base in 4Q23 but increasing by 9% y-y. This was driven by continuous realisation of Kave Colony from 4Q23, plus one newly built condo named Atmoz Kanaal Rangsit.
- The gross margin increased to 42.5% from 40% in 4Q23-1Q23, supported by realizing project with healthy margins, especially the Kave condo brand.
- Moreover, The contribution from its JVs turned into a profit of THB27m due to the sooner-than-expected transfer of the new Kave Seed Kaset condo.
- 1Q24 core profit accounts for 23% of our 2024 core profit forecast of THB1.1b (+37% y-y). We expect 2Q24 performance to jump q-q and y-y due to transfers of three new condos worth THB5.3b with 80% presales, such as Kave Universe Bangsaen, Kave Town Island as well as TITLE's project in Phuket named The Title Halo 1.
- ASW would benefit from the stimulus measure to cut transfer and mortgage fee to 0.01% for residential units under THB7m due to this price range covering almost all of its portfolio. This should help smooth transfers from its THB9.4b backlog which would be realised within this year.

Economic news

- [Thai food exports expected to see 2% growth this year](#) BANGKOK POST: Thailand expects to stimulate food export growth of 2% this year as it prepares for THAIFEX-Anuga Asia 2024, Asia's leading food and beverage trade show. Phusit Ratanakul Sereroengrit, director-general of the Department of International Trade Promotion (DITP), said the food industry is one of the most important sectors contributing to exports. Food exports expanded by 2.7% in 2023 from the previous year, worth US\$39.8 billion or roughly 1.37 trillion baht.
- [Oil Fuel Fund may collect taxes](#) BANGKOK POST: The Finance Ministry says it does not oppose an Energy Ministry proposal that gives the state Oil Fuel Fund the authority to collect oil taxes. According to Deputy Finance Minister Julapun Amornvivat, the proposal was put forward by Energy Minister Pirapan Salirathavibhaga, who wants the Oil Fuel Fund to be able to set oil tax rates independently.
- [Pact to help Thai entrepreneurs tap prospects in China](#) BANGKOK POST: The National Innovation Agency (NIA) has joined hands with the Thai-Chinese Culture and Economy Association to support innovation-based Thai enterprises tapping the Chinese market. Though China's economy is in a rut, its GDP last year grew 5.2%, in line with Beijing's target of 5%, said Krithpaka Boonfueng, executive director of the NIA.
- [Issue of dollar bonds ruled out this year](#) BANGKOK POST: The government has no plans currently to issue dollar bonds overseas this year as it is still studying the issue while waiting for a clearer market direction, a Ministry of Finance official said on Thursday. In February, the ministry had said it was looking at issuing up to copy billion in overseas bonds, which would have been the first such issue in more than two decades, to help create a reference yield for companies seeking funds in foreign markets.
- [China's exports and imports return to growth](#) BANGKOK POST: BEIJING: China's exports and imports returned to growth in April after contracting in the previous month, customs data showed on Thursday, signalling an encouraging improvement in demand at home and overseas in a boost to a shaky economic recovery. The data suggests a flurry of policy support measures over the past several months is gaining traction and helping to stabilise fragile investor and consumer confidence. Shipments from China grew 1.5% year-on-year last month, in line with the increase forecast in a Reuters poll of economists. They fell 7.5% in March, which marked the first contraction since November.

Corporate news

- [Gas pipeline opens after years-long delay](#) BANGKOK POST: Thailand's longest onshore gas pipeline has opened to facilitate gas transport for power plants and factories, following a delay related to the pandemic, says PTT president and chief executive Auttapol Rerkpiboon. The 417-kilometre pipeline that spans seven provinces should help to secure gas supply, which is a major fuel used for power generation, industrial operation and transport, he said.
- [Revised power plan promotes clean alternatives](#) BANGKOK POST: Nuclear energy and hydrogen fuel will be included in the revised version of Thailand's power development plan (PDP), which emphasises more use of clean energy, says the Energy Policy and Planning Office (Eppo). The move comes as power companies forge cooperation on clean energy development. Among them are a joint project between Global Power Synergy Plc (GPSC), the power generation arm of PTT Plc, and Denmark-based nuclear energy developer Seaborg Technologies, to study small modular reactor (SMR) technology.
- [Court to rule on True lawsuit against NBTC](#) BANGKOK POST: The Central Criminal Court for Corruption and Misconduct Cases is scheduled to rule on May 14 on True Digital Group's lawsuit against the National Broadcasting and Telecommunications Commission's (NBTC) Pirongrong Ramasoota on the grounds of dereliction of duty. The court accepted the case for its consideration in March.
- [Thai stocks tipped to rebound in 2nd half](#) BANGKOK POST: Recovering tourism and exports, backed by a weaker baht, along with growing fiscal budget disbursement could support a rebound of the Thai stock market in the second half this year after the index lost 2.7% year-to-date, one of the worst performers globally. Soraphol Tulayasathien, senior executive vice-president of the Stock Exchange of Thailand (SET), said although the Thai index declined last month, funds have started to flow back as investor concerns over war in the Middle East and oil price trends have eased.
