

24 JULY 2024

SPOTLIGHT ON THAILAND

Published Reports

- ASIA AVIATION (AAV TB) - Flying higher out of market's radar; Maintain BUY TP THB3.30
- THAI FOODS GROUP (TFG TB) - Strong profit recovery anticipated; Maintain BUY TP THB4.80
- DOHOME (DOHOME TB) - Recovery outlook continues to improve; Maintain BUY TP THB11.80
- SIAM GLOBAL HOUSE (GLOBAL TB) - 2Q24 profit should remain unexciting; Upgrade to BUY TP THB17.30
- Thailand Banks - 2Q24 profit in line; asset quality deteriorated
- KASIKORNBANK (KBANK TB) - More visibility on 2024 performance; Upgrade to BUY TP THB145.00
- KIATNAKIN PHATRA BANK (KKP TB) - 2Q24 profit missed; asset quality dragged; Maintain HOLD TP THB39.10
- SCB X (SCB TB) - Several headwinds continuing in 2H24; Downgrade to HOLD TP THB110.00
- TMBTHANACHART BANK (TTB TB) - Focus on credit quality and cost control; Maintain BUY TP THB2.22
- KRUNG THAI BANK (KTB TB) - 2Q24 results at first glance; Maintain BUY TP THB19.90
- KRUNGTHAI CARD (KTC TB) - 2Q24 results at first glance; Maintain HOLD TP THB40.00

Economics

- Motorcycle sales dip 10% in H1
- Local traders optimistic on price outlook for gold
- Ministry to divest from 25 companies
- Chinese EV makers urged to use locally sourced parts
- TAT expects B18.3bn from July holidays
- Premium EV sales dip 35% in first half

Corporate News

- AirAsia flights back to normal after global IT outage
- Thailand's corporate earnings recovery mixed
- Home construction prices rise 3.8% in Q2

Published Reports

ASIA AVIATION (AAV TB) - Flying higher out of market's radar; Maintain BUY TP THB3.30

Expect passenger volume, load factor and ticket fares to grow y-y

We expect the passenger volume to grow by 7% y-y to 5.0m in 2Q24, driven mainly by strong domestic passenger demand. The load factor should improve to 91% (from 89% in 2Q23) thanks to AAV's strategy to selectively increase seat capacity. In addition, the strong ticket fare trend should continue and grow by 14% y-y to cTHB2,000. On a positive note, the jet fuel spot price dropped by 4% q-q to USD98-99/bbl and ASK should decline by c10% q-q, leading jet fuel costs to decline by 12-14% q-q. We estimate pre-tax profit to jump to THB0.36b in 2Q24 (vs 0.17b in 2Q23). This should be the best 2Q result since 2Q17. AAV should book a cTHB0.3b FX loss on its lease liabilities due to the depreciation of the THB vs USD, resulting in our net profit forecast of THB53m in 2Q24.

Earnings momentum to accelerate in 3Q24 and 4Q24

We expect the profit momentum to continue in 3Q24, led by strong Chinese tourist arrivals in July and Aug following the school break period. Chinese tourists have increased w-w for four consecutive weeks, reaching 22k tourists/day, equivalent to c70% of pre-Covid. In addition, this number hit a record high in 2024 (excluding Chinese New Year period in Feb-24). Therefore, AAV plans to increase capacity from c81-82% in 2Q24 to 85-88% in 3Q24. Note that we expect the load factor of China routes to be strong at c89-90%, which should continue in 3Q24.

Raise core profit to reflect 1H24E and promising outlook in 2H24

We raise 2024E core profit by 8% to THB2.4b to reflect the strong load factor and ticket fares in 1H24. Although our 2024E core profit is ahead of the BBG consensus' THB1.7b, we still see a potential upside from the 2024 profit given that currently our 1H24E profit is THB1.5b-1.6b, and we see the potential for 2H24 core profit to accelerate compared to 1H24.

First low season core profit since 2018 may grab market attention

We raise our TP to THB3.3/shr (based on 18x 2024E P/E). AAV trades at an attractive valuation of 11x 2024E P/E (vs global peers' avg. of 12x). In our view, it deserves to trade at a premium to peers due to its superior earnings growth and operating profit margin (11% for AAV vs 5% average for global airlines). Key catalyst is 2Q24 profit, which should prove that AAV is now focused on profitability rather than capacity expansion.

THAI FOODS GROUP (TFG TB) - Strong profit recovery anticipated; Maintain BUY TP THB4.80

Expected earnings for 2Q24 are strong

We expect a 2Q24 net profit of THB806m (+364% q-q, +12x y-y). Excluding the gain from biological assets from the high prices of Thai and Vietnamese pork, we expect TFG's core profit to be THB726m (+691% q-q, +271% y-y). The strong recovery would be due to the increase in meat prices. We expect TFG's average selling price of Thai pork to increase by 4.2% q-q, chicken by 2.1% q-q, and Vietnamese pork by 20% q-q. Meanwhile, we expect TFG's pork sales volume to remain stable, while chicken sales may grow in line with good export volumes. In addition, we do not expect any new store openings for TFG Fresh Mart by the end of 2Q24, with a total of 350 stores currently.

Gross margin could reach a five-quarter high

Besides the price of livestock adjusting upwards, we expect the cost of raw materials to continue to decline q-q. The price of all types of livestock at TFG is higher than the breakeven price. Therefore, we expect the 2Q24 gross margin to recover to 12.5%, up from 8.6% in 1Q24 and 9.5% in 2Q23. Meanwhile, we expect SG&A to sales to decrease slightly to 6.5%, down from 6.7% in 1Q24. We also expect a small share of loss from Thaifoods Nucleus Genetics, which has just started operating and developing its breeding farm using advanced technology.

Solid growth in 2H24 supported by seasonality and new branches

Assuming in-line results, TFG's 1H24 net profit would be THB980m (+98% y-y), accounting for 47% of our 2024E net profit. The outlook for 2H24 profit remains favorable, driven by 1) stable and high prices for livestock such as Thai pork at THB70/kg, Thai chicken at THB44/kg, and Vietnamese pork at VND68,000-69,000/kg; 2) a slight decline in raw material costs q-q; and 3) the resumption of TFG Fresh Mart branch expansions, with approximately 200 new locations planned for 2H24. It would support the growth of retail shop sales in the same period.

Retain BUY call with strong earnings recovery

We maintain our 2024E net profit at THB2.1b, rebounding from a net loss of THB809m in 2023. Similarly, we retain our target price of THB4.8, based on the same P/E of 14x. There is still an upside of 22%. We like TFG's earnings recovery, which would generate solid growth. Aside from that, we expect TFG's financial position to improve as well. Hence, we maintain our BUY recommendation.

DOHOME (DOHOME TB) - Recovery outlook continues to improve; Maintain BUY TP THB11.80

2Q24 core profit should grow y-y

We expect a 2Q24 core profit of THB201m (-18% q-q, +411 y-y), down 18% q-q due to a lower GPM after a change in the product mix towards its building material product group and higher expenses brought on by transportation expenses after a recovery in contractors and wholesalers but up 411% y-y owing to a higher GPM by 350bps y-y after the absence of a stock clearance as in 2Q23. Specifically, we anticipate a stubbornly negative SSSG of 6% but slightly higher total sales due to sales of the new branches and a positive steel SSSG in 2Q24.

Gross margin should support

We anticipate a 2Q24 gross margin of 17.5% (vs 17.8% in 1Q24 and 14% in 2Q23), down by 30bps q-q due to a higher sales mix from building material products after contractors resumed their buying but up by 350bps y-y after the absence of a stock clearance and a higher gross margin in all product groups. However, expenses should increase in line with new branches and transportation expenses after a recovery in contractors.

3Q24 y-y growth should remain robust with higher expected SSSG

If 2Q24 matches our estimate, the 1H24 profit would secure 45% of our 2024 forecast. In 2H24, we anticipate an improved SSSG recovery outlook due to government disbursement. Since it stood at only 39% YTD, we expect higher disbursement in the remainder of this fiscal year. Also, the farm income index continued to increase in line with agricultural product prices. It should support a recovery in the purchasing power of farmers, a crucial customer base.

Maintain BUY call at our TP of THB11.8

We reaffirm a BUY call at our TP of THB11.8. The 2Q24 core profit should grow outstandingly y-y. Also, we expect continued y-y growth in 3Q24 due to a higher GPM brought on by the absence of a stock clearance and better cost management. We retain our 2024E profit growth of 84% y-y and 2025-26E growth of 26% CAGR.

SIAM GLOBAL HOUSE (GLOBAL TB) - 2Q24 profit should remain unexciting; Upgrade to BUY TP THB17.30

Expect 2Q24 profit to decrease q-q but increase y-y

We anticipate a 2Q24 net profit of THB712m (-2% q-q, +1% y-y), down q-q due to lower sales after Thailand entered its rainy season in late May and higher expenses in line with the opening of new branches but slightly up y-y owing to higher sales from the new branches and a higher GPM. We expect lesser negative SSSG of -2%, improving from -5.3% in 1Q24 due to (1) government disbursement and (2) higher steel prices in May and June. Specifically, the 2Q24 average deformed steel bar price decreased 6% y-y (vs an average loss of 12-13% y-y in 1Q24).

GPM should recover from higher private brand exposure and efficient promotion

We expect the GPM to recover to 26% (vs 25% in 1Q24 and 25.4% in 2Q23) from a higher private brand exposure of 23.5%, up from 23% in 1Q24 owing to the absence of inventory shortage and more efficient sales promotion. However, expenses should increase in line with branch expansion. In 2Q24, GLOBAL opened three new branches, sending the totals to 87. Also, it has introduced four new branches in 1H24 from its plan of eight to hit 91 branches this year.

Expect 2H24 profit to grow y-y and continued SSSG recovery

The 2H24 SSSG should continue to recover due to contractors and in line with government disbursement, which should accelerate in 2H24 after standing at 39% YTD. Also, GLOBAL plans four new branches in the remainder of this year, while purchasing power should recover from 1H24 due to a higher farm income index and purchasing power stimulus measures of the state.

Raise rating to BUY at our TP of THB17.3

We have increased our rating from HOLD to BUY at the same TP of THB17.3. We see an improving gross margin outlook and believe that it will stabilize in 2H24. Also, the negative SSSG should improve and turn positive in 2H24. Hence, we have a bullish view of the performance outlook. Additionally, the share price plunge of 9% YTD is higher than peers while GLOBAL plans continued branch expansion.

Thailand Banks - 2Q24 profit in line; asset quality deteriorated

Contracting 2Q24 net profit following weak core operations and a rise in ECLs

The seven banks under our coverage delivered an in-line aggregate 2Q24 net profit, dropping by 2.5% q-q but increasing by 2.7% y-y, amounting to THB53.5b. PPOP rose slightly by 1.4% both q-q and y-y, amounting to THB116.0b. For the q-q comparison, KKP, SCB, and KBANK posted a net profit decrease, while BBL, KTB, TISCO, and TTB increased, with BBL performing the best and KKP performing the worst. For the y-y comparison, KKP, SCB, and TISCO announced a net profit contraction, while TTB, KBANK, KTB, and BBL grew y-y, with TTB and KBANK performing the best and KKP performing the worst.

Deteriorated asset quality but manageable; NPL uptick with rising credit costs

We view the aggregate asset quality as concerning in 2Q24, particularly in the SME and retail segments, with more alarms in the corporate segment, namely EA. New NPL formations and stage 2 loans increased from 1Q24 following the slow economic recovery and high level of household debt. However, we view this as manageable. Most banks proactively managed and sustained a high credit cost level in 2Q24. The NPL ratio rose to 3.67% with a jump in credit costs to 162bp in 2Q24, sustaining the coverage ratio at 184%.

Lack of positive catalysts with sluggish net profit growth projected in 2024-26

We have made downward revisions of KKP's, SCB's, and TTB's 2024-26E net profit due mainly to rising ECLs and lower loan growth (KKP and TTB), but an upward revision for KBANK following its better-than-expected NIM, net fee income, and non-NII. Consequently, the estimated 2024 aggregate net profit increased slightly to THB198.2b, rising by 1.5% y-y, due to 1) a large base in 2023 following a less positive impact from the interest rate increase compared to 2023; and 2) continued sluggish operating income. For 2025-26, we expect a more remarkable net profit growth rate of 5.4-6.5% y-y, based on our conservative assumptions for loan growth, fees, and a gradual reduction in credit costs.

Maintain UNDERWEIGHT call with TTB as our top Buy

We retain our UNDERWEIGHT call on the Thai banking sector. Despite the deep correction in the SETBANK index, we see no catalysts to drive the sector except for attractive dividend yields. We pick TTB (TP THB2.22) as our top BUY based on the limited downside risks to its earnings from the remaining tax benefits totaling THB12.7b and an attractive dividend yield of c6-7% p.a. In addition, we prefer KTB (TP THB19.90) and KBANK (TP THB145) to SCB (TP THB110), following our reduced concern over their asset quality and attractive dividend yields of c5-7% p.a.

KASIKORNBANK (KBANK TB) - More visibility on 2024 performance; Upgrade to BUY TP THB145.00

2Q24 profit corrected in line with expectation

KBANK delivered an in-line 2Q24 net profit of THB12.6b, dropping by 6.2% q-q but jumping 15.1% y-y, while PPOP rose to THB28.5b, dipping by 3.0% q-q but rising 4.8% y-y. The decrease in net profit q-q was due to 1) weaker-than-expected net interest income by 2.8% q-q (but still increased 2.1% y-y); and 2) higher-than-expected operating expenses (from marketing expenses/IT-related/one-time employee subsidy measure). Thus, the cost-to-income ratio jumped to 43.4% from an abnormal low of 41.3% in 1Q24. However, non-NII increased more than expected, supported by the mark-to-market gains on FVTPL investments of THB3.17b. Net fee income dropped as expected, dragged by decreased credit cards and loan-related fees. 2Q24 loans returned to growth of 1.0% q-q and 1.6% y-y, but were slightly negative at 0.1% YTD, higher than our estimate. The NIM was slightly lower than expected at 3.68%, due to a shrinking loan yield and rising cost of funds.

Asset quality continues to be a critical focus in 2H24

Asset quality was stable in 2Q24 as expected, with no alarms. The NPL ratio (FSSIA's calculation) dipped to 3.64%, while the reported NPL ratio was 3.18%, still in line with its 2024 guidance of not exceeding 3.25%. However, stage 2 loans rose by 1.2% q-q and 3.6% y-y, but the proportion remained stable since 1Q23 at around 7.3-7.4% of total. Credit costs were stable at 189bp, consistent with the 2024 guidance of 175-195bp and below our target of 200bp. Accordingly, the coverage ratio rose to 144% from 142% in 1Q24.

Upward revisions on 2024-26 profit forecast

We have raised our 2024-26 net profit forecasts by 12.1-15.8% due to 1) higher NIM, net fee income, and non-NII assumptions; and 2) the reduction in estimated loan growth and credit cost to align with its 2024 guidance. Consequently, the expected 2024-26 net profit growth rises to 10.1% CAGR, with our anticipated 2026 ROE spiking to 9.4%, close to its guidance of 10%, based on the expected dividend payout ratio increasing to 38-40% compared to 36.3% in 2023.

Upgrade to BUY with a new 2024 TP of THB145

We upgrade our recommendation to BUY from Hold, based on 1) the expectation that KBANK's 2024-26 profit growth will be higher than industry peers; and 2) attractive dividend yields of 6-7% p.a. We also raise the 2024 GGM-TP to THB145 (from THB140) at a P/BV of 0.63x (from 0.61x) under an expected 9.0% LT-ROE (from 7.9%) and 13.80% COE (from 12.36%).

KIATNAKIN PHATRA BANK (KKP TB) - 2Q24 profit missed; asset quality dragged; Maintain HOLD TP THB39.10

Rising ECLs and lower spread caused the hiccup in 2Q24 profit

KKP surprised the market with a disappointing 2Q24 net profit at an abnormal low of THB769m, plummeting 49.0% q-q and 45.4% y-y. The critical drag was the rise in ECLs and credit costs. However, losses on sales of repossessed vehicles reduced significantly to THB1.07b (from THB1.44b in 1Q24) from fewer repossessed cars sold. PPOP rose 9.0% q-q but dropped by 24.5% y-y to THB2.74b, thanks to the operating expense reduction, mainly from the loss on sales of repossessed cars, which lowered the cost-to-income ratio to 58.1% (41.8% excluding losses on sales of repossessed cars from 42.1% in 1Q24). However, operating income – NII and non-NII – contracted meaningfully both q-q and y-y. The lower-than-expected NIM was due to the rising cost of funds – the changes in deposit mix toward term deposits and the lingering high-interest cost of US funding – and the lower loan yield. Regarding non-NII, KKP disclosed that the impact of fewer working days on its capital market and trading business (30% of total in 1H24) was higher than its peers. Stricter SET regulations also hurt its brokerage fees.

Asset quality turned negative with a more deterioration sign

We view KKP's asset quality as unfavorable, with more cause for concern in 2H24. The 2Q24 NPL ratio spiked q-q to 4.11%. In addition to the lower loan base effect, the slippage of the 2021-22 vintage hire-purchase to stage 3 loans and the impact of its qualitative NPL classification in commercial lending were also critical pressures in 2Q24. Moreover, the rising stage 2 loans following the deterioration in the SME and housing segments led to KKP setting an extra THB300m in ECLs for management overlay. However, the coverage ratio was stable q-q at 132%.

Revised 2024 guidance leads to 2024-26E profit cut

We have significantly cut our 2024-26E net profit by 20.8-26.3% to reflect KKP's revised 2024 guidance regarding negative loan growth, a lower loan spread, higher NPL ratio, and a lower comprehensive ROE while maintaining credit costs. We lower our expected net profit growth to -1.2% CAGR during the same period.

Retain our HOLD call for an attractive dividend yield of c5-7% p.a.

We reiterate HOLD for an attractive dividend yield of c5-7% p.a. We trim our 2024 GGM-TP to THB39.10 (from THB50.60), implying a P/BV of 0.53x (from 0.67x) under 7.4% LT-ROE (from 9.4%) and 13.1% COE.

Exhibit 16: 2024E – FSSIA estimates vs. management guidance

SCB X (SCB TB) - Several headwinds continuing in 2H24; Downgrade to HOLD TP THB110.00

Rising ECLs and lower non-NII dragged down 2Q24 profit

SCB reported a 2Q24 net profit of THB10.0b, 5% below our estimate and the BBG consensus, which decreased by 11.2% q-q and 15.6% y-y. Key drags were 1) rising ECLs and operating expenses (mainly from one-off expenses related to the cessation of the Robinhood application); and 2) dropping non-NII, which offset the increase in NII. Loan growth slowed as expected, with a slight drop YTD, far below its 3-5% y-y 2024 guidance and our forecast of 2.5% y-y, primarily pressured by a corporate loan (35%) reduction. The 2Q24 NIM was better than expected, increasing by 17bp to 3.90%, mainly supported by a loan yield expansion on the effect of the Blue Scheme corporate loan prepayment. In contrast, the cost of funds was healthy and in line with expectations. Non-NII decreased by 5.0% q-q and 21.0% y-y, attributed to lower net fee income (bancassurance and loan-related fees) and FVTPL investment gains.

Deteriorated asset quality, particularly in the retail segment

Asset quality deteriorated worse than expected. Despite the stable NPL ratio of 3.90% in 2Q24 (FSSIA's calculation) following its proactive management (sales and write-offs), its stage 2 loans increased q-q by THB11.3b and stabilized at 7.2% of total loans, mainly from the EA lending and partly from the housing (Gen 1) and CardX (Gen 2) loans. SCB stated that the rising 2Q24 credit costs to 190bp were mainly from its Gen 2 segment, while an extra THB800m was for the unsecured portion of EA loans, for which SCB believes the coverage is enough. Hence, the coverage ratio was relatively stable q-q at 156%.

Lower 2024-26 profit forecast on higher credit costs

We have trimmed our 2024-26E net profit by 6.6-8.4%, leading to growth at 1.1% CAGR to reflect the expected higher credit costs following the EA loan issues and the slow recovery of the Thai economy. Despite another potential impairment loss from the remaining assets of THB1b (net book value) of the Robinhood application, we believe our higher expected cost-to-income ratio in 2H24 could support the worst-case scenario.

Downgrade recommendation to HOLD with 2024 TP of THB110

We downgrade our call to HOLD (from Buy) for an expected annual dividend yield of c9-10% p.a. under a payout ratio assumption of 80%. We cut our 2024 GGM-TP to THB110 (from THB120), implying a P/BV of 0.76x (from 0.82x) under 8.8% L-T ROE (from 9.4%) and 11.2% COE.

TMBTHANACHART BANK (TTB TB) - Focus on credit quality and cost control; Maintain BUY TP THB2.22

2Q24 profit in line; sluggish core profit

TTB delivered an in-line 2Q24 net profit of THB5.36b (+0.4% q-q, +17.3% y-y). Following its variable incentive compensation reduction and cost efficiency, a lower operating expense offset weaker operating income and a rising ECL impact. Accordingly, PPOP amounted to THB10.2b, growing by 0.6% q-q and 2.7% y-y. NII remained sluggish as expected, with a slight decrease of 1.5% q-q but an increase of 0.7% y-y, aligning with its loan contraction of 1.4% q-q, 4.9% y-y, and 2.4% YTD, pressured by its low-yield portfolio – hire-purchase lending (24%) for new and used cars and housing loans (25%) – despite increasing high-yield loans (12%). In addition, the 2Q24 NIM dipped lower than expected by 2bp to 3.24%, mainly from the rising cost of funds, which its loan yield management could not offset. However, given TTB's 95% loan-to-deposit ratio, we expect less pressure on the cost side in 2H24. The correction in non-NII by 2.6% q-q and 13.1% y-y was primarily due to a drop in net fee income, particularly bancassurance fees tied to new loan bookings.

Manageable asset quality, more prudent ECL reserves

We think TTB's asset quality has no cause for concern. A lower loan base caused the 2Q24 NPL ratio to increase slightly to 3.09%, while the absolute NPL figures grew minimally. However, the credit costs elevated to 162bp, exceeding their normal level of 133bp, of which THB1.09b was an additional provision for future uncertainties. In addition, the coverage ratio reduced slightly to 152% following its aggressive write-offs.

Minor adjustment on 2024-26E net profit

We trim our 2024-26E earnings by 0.3-2.0% to reflect the higher expected credit costs and weaker loans, net fees, and cost-to-income ratio on the slow recovery of the Thai economy. We reduce our 2024-26E net profit growth to 6.0% CAGR, with the key contributions coming from the high-yield segment (credit quality focus) and continued NIM and cost management. In addition, our projected income tax benefits will balance with our expected extra credit costs to strengthen its coverage ratio.

Retain our top BUY call with an attractive dividend yield of c6-7% p.a.

We retain TTB as our top BUY due to its limited net profit downside and attractive dividend yields of c6-7% p.a. Our new 2024 GGM-based TP is THB2.22 (from THB2.24), based on a P/BV of 0.90x (from 0.91x) under the expected LT-ROE of 8.4% (from 8.5%) and COE of 9.2%.

KRUNG THAI BANK (KTB TB) - 2Q24 results at first glance; Maintain BUY TP THB19.90

2Q24 profit in line with our estimate but 5% below BBG consensus

KTB reported a 2Q24 net profit of THB11.2b, growing by 1.1% q-q and 10.2% y-y. PPOP was THB23.0b, increasing 0.2% q-q and 6.1% y-y, supported by higher net interest income and lower operating expenses, which offset the lower non-NII. In addition, we have no cause for concern about its asset quality in this period. 1H24 net profit grew 10.1% y-y, accounting for 59% of our full-year forecast. We retain our 2024-26 forecast and maintain our BUY call with a 2024 GGM-based TP of THB19.90, implying 0.65x P/BV (expected LT-ROE 8% and COE 11.8%).

Highlights

- (+) Net interest income** amounted to THB30.0b, increasing slightly by 1.7% q-q and 8.2% y-y. Loans contracted by 2.2% q-q, 0.7% y-y, and 0.6% YTD, mainly from corporate (28%) and government and state enterprise (16%) loan repayments. Meanwhile, SMEs continued shrinking following the bank's de-risking policy in the high-risk segment. However, retail – housing (19%) and personal loans (24%) – grew minimally q-q. KTB maintains its 2024 loan guidance at 3.0% y-y, with the expected loan demand to accelerate in 2H24. The 2Q24 NIM increased by 6bp to 3.37% on higher loan yields (more high-yield concentration) and accelerating interest expenses. Overall, the 1H24 NIM spiked to 3.39%, exceeding its 2024 guidance of 3.00-3.30% and our target of 3.28%.
- (-) Non-interest income** was worse than expected due to lower net fee income by 5.4% q-q (seasonality), but increased by 10.0% y-y (from credit card transactions and mutual fund fees). The 1H24 net fees grew by 9.2% y-y, exceeding its 2024 guidance of low to mid-single-digit growth and our forecast of 1.5% y-y. Moreover, the bad debt recovery decreased more than expected in 2Q24 to THB2b vs our expectation of THB3.3b and THB3.11b in 1Q24.
- (+) Operating expenses** were better than expected in 2Q24, mainly due to a decrease in impairment losses from properties for sale to THB1.61b vs THB3.79b in 1Q24. KTB expects the figure to be lower in 2H24. The 2Q24 cost-to-income ratio decreased to 41.7% from 43.6% in 1Q24. Overall, the 1H24 cost-to-income ratio finished at 42.6%, aligning with its 2024 guidance of below mid-40% and our expectation of 43.4%.
- (0) Asset quality** – no cause for concern in 2Q24. As expected, the NPL ratio slightly increased to 3.85% from 3.77% in 1Q24, partly due to a decreased loan base, while the NPL amount dipped q-q. Stage 2 loans also reduced by 3.7% q-q to 7.5% of total loans from 7.7% at the end of 1Q24. Credit costs and the coverage ratio were stable q-q as expected at 124bp and 176%, respectively. Overall, the 1H24 credit costs rose to 125bp, below its 2024 guidance of 120-130bp and our target of 140bp. For the EA lending exposure, KTB disclosed no details but indicated a minimal impact on its 2024 guidance.

KRUNGTHAI CARD (KTC TB) - 2Q24 results at first glance; Maintain HOLD TP THB40.00

2Q24 profit in line; loans missed

KTC reported a 2Q24 net profit of THB1.83b, marginally increasing by 1.3% q-q and 1.1% y-y, aligning with our estimate but 5% above the BBG consensus. PPOP was at THB3.98b, which increased by 0.8% q-q and 7.4% y-y, bearing the credit cost pressure, but was offset by a more prominent contribution from debt recovery income. Loans showed flat growth of 0.4% q-q and 0.2% y-y, coming short of our +1.9% y-y estimate for 2024 because of stricter lending criteria, which led to a lower approval rate, and accelerated write-off practices. The effect manifested in both the credit card (66%) and personal loan (32%) segments, while the leasing portfolio of KTBL (2%) continued its sharp contraction, where the current effort is on quality control of the existing portfolio. The 1H24 net profit accounts for 47% of our 2024E. For 2H2 4 the high season for its business, we believe both loan and spending growth are likely to accelerate h-h along with the net profit.

We foresee some downside to our estimates from underperforming loan growth. However, upsides from the rising recovery income should compensate, leaving only marginal deviations from our 2024-26E net profit. Meanwhile, we retain our unfavorable outlook for the unsecured finance industry over asset quality concerns. Therefore, we maintain our HOLD recommendation with a GGM-based 2024 TP at THB40.00, implying a 2.57x PBV ratio (LT ROE 18.0%, COE 9.0%).

Highlights

(-) Net interest income (NII): 2Q24 NII was flat on both a q-q and y-y basis, which aligned with the dim loan growth due to slowing lending activity and increased write-offs. The 2Q24 cost of funds continued to rise, but, thanks to the higher-than-expected loan yield, the loan spread of 12.24% showed a 36bp q-q increase (but declined 27bp y-y).

(+) Non-NII increased moderately more than expected, moving by +0.8% q-q and sharply rising by 21.8% y-y. On the y-y basis, the figure was boosted by 1) merchant discount fees with 2Q24 spending volume growth of 11.5% y-y (but remained lower than KTC's aggressive 15% target for 2024); and 2) bad debt recovery income (collections from written-off loans) at THB1.0b compared to its usual level of cTHB800m/quarter.

(-) OPEX was flat q-q but increased 10.5% y-y, moderately higher than expected. It realized rising service fee expenses, following the expanding spending volume and IT expenses during the period. The 2Q24 cost-to-income ratio finished at 37.2% (we estimated 35.4%).

(0) Asset quality: The weakening conditions of KTC's asset quality reflect the rising credit costs in 2Q24 to 6.44%, which moderately increased from 6.23% in 1Q24. From the amount, management stated that the company has set aside some additional overlay for prospective uncertainties. However, thanks to its faster write-off practices, the 2Q24 NPL ratio fell moderately to 1.96%, lower than our estimate of 2.01%, and declined from 1.98% in 1Q24. Accordingly, the coverage ratio rose to 363% from 354% in 1Q24.

Economic news

- [Motorcycle sales dip 10% in H1](#) BANGKOK POST: Motorcycle sales fell by 10% year-on-year during the first half, with Thai Honda Co, a major motorcycle manufacturer and distributor, also experiencing a sales drop in the sluggish market. The unfavourable circumstances resulted from slow economic growth of 1.5% in the first quarter, banks' stricter criteria in granting auto loans and an unhealthy export sector, said Yuichi Shimizu, president of Thai Honda.
- [Local traders optimistic on price outlook for gold](#) BANGKOK POST: Local gold traders remain bullish about bullion's price trend, saying prices could top US\$2,500 an ounce by end-2024 with a significant price increase expected after the US Federal Reserve (Fed) cuts US interest rates in September. Gold was quoted at \$2,395 an ounce by midday in Asian trade on Tuesday after it was announced that President Joe Biden had dropped out of the US presidential race and that he backed vice-president Kamala Harris as the new Democratic candidate, sending the price up to top \$2,400 overnight, according to gold trader Hua Seng Heng. Prices were also pressured by a stronger US dollar and a slight downward trend is likely to continue in the short term, it added. Gold prices scaled an all-time high of \$2,483.60 last week, with markets broadly pricing in a 25-basis-point US rate cut by September. Lower interest rates increase the appeal of gold.
- [Ministry to divest from 25 companies](#) BANGKOK POST: The State Enterprise Policy Office (Sepo) looks set to divest Finance Ministry shares in 25 non-listed firms, with a total estimated value of 20 billion baht. According to Tibordee Wattanakul, Sepo's director-general, the plan to dispose of the Finance Ministry's shares held in non-listed companies by Sepo is expected to be completed by the end of this year.
- [Chinese EV makers urged to use locally sourced parts](#) BANGKOK POST: The Industry Ministry is requesting Chinese electric vehicle manufacturers assemble their EVs with at least 40% of parts sourced locally in a move to support the automotive supply chain in Thailand. The 40% threshold was suggested following talks involving the ministry and GAC Aion New Energy Automobile, an EV maker under Guangzhou Automobile Corporation (GAC), which has promised to use 40% local content. Thai auto parts makers, which are mostly familiar with components designed for internal combustion engines (ICE), still require support from car manufacturers, though the latter are shifting their focus to electric mobility technology, said Industry Minister Pimphattra Wichaikul.
- [TAT expects B18.3bn from July holidays](#) BANGKOK POST: Two consecutive national holidays this month are expected to generate 18.3 billion baht in tourism revenue from 5 million domestic trips, according to the Tourism Authority of Thailand (TAT). TAT governor Thapanee Kiatphaibool said domestic tourism sentiment during the Buddhist holidays marked last weekend -- Asarnha Bucha Day and Khao Phansa (Buddhist Lent) -- and His Majesty the King's 72nd birthday on July 28 remains positive.
- [Premium EV sales dip 35% in first half](#) BANGKOK POST: Sales of premium electric vehicles (EVs) in Thailand plunged 35% year-on-year during the first half of this year, but German luxury car maker BMW remains positive about its EV sales, with newly launched models in the Mini family in Bangkok expected to thrill the public. The drop in premium EV sales to 3,844 units between January and June this year was noted by Krisda Utamote, former president of the Electric Vehicle Association of Thailand (EVAT) and BMW Group Thailand's director for corporate communications.

Corporate news

- [AirAsia flights back to normal after global IT outage](#) BANGKOK POST: Thai AirAsia says the global IT outage on Friday delayed 200 of its flights, affecting about 40,000 passengers, but the airline managed to operate every scheduled flight. Tansita Akarittiprom, head of commerce, said on Tuesday that the AirAsia group had carried more than 500,000 travellers on 3,000 flights since Friday's failed CrowdStrike system security update crashed its departure control system. Having to revert to manual processing had caused delays for two days. As of Tuesday, the airline had resumed normal operations, having recovered all systems affected by the outage. However, it continued to run service recovery for customers impacted over the weekend.
- [Thailand's corporate earnings recovery mixed](#) BANGKOK POST: Thai businesses across several sectors are witnessing improved earnings, although leverage remains high due to large investments, according to Fitch Ratings. The view was among those expressed at the firm's recent 2024 Bangkok briefing on the global financial market and Thailand's corporate credit outlook. Participants also explored asset allocation strategies and the framework for credit investing. Obboon Thirachit, senior director of corporate ratings at Fitch Ratings (Thailand), noted in his presentation that a steady tourism recovery and a resumption of government spending should support continued earnings growth at Fitch-rated corporates in the aviation, hospitality and building material sectors.
- [Home construction prices rise 3.8% in Q2](#) BANGKOK POST: The price index of standard home construction in the second quarter of 2024 rose 3.8%, with the biggest increases seen in the prices of wood and wooden products, as well as labour wages. Vichai Viratkapan, acting director-general of the Real Estate Information Center (REIC), said while home construction prices continued to rise, the increase in the second quarter was not significant. "The highest year-on-year increase in prices was for wood and wooden products like formwork wood, framework wood, and flooring and doors with a rise of 6.8%," he said. "Their prices were driven by operational and transportation costs." Wood and wooden products were also limited in supply, while demand was driven by ongoing public sector construction projects and private sector projects, particularly industrial factories.
